CAREER SUMMARY:

Detail-oriented pharmacy technician with 3 years of hands-on experience in specialty medication management and EMR workflows. Currently completing a Master's in Health Informatics & Analytics, building advanced skills in data analysis, health IT systems, and business intelligence. Seeking to transition into a business analyst role where healthcare expertise and analytical capabilities can drive data-informed decisions and operational efficiencies.

WORK EXPERIENCE:

CVS Specialty Pharmacy

FE Pharmacy Technician | 2022 – Present

- Accurately entered and processed specialty medication prescriptions, ensuring compliance with state regulations and insurance requirements.
- Collaborated with pharmacists and back-end technicians to streamline workflow, improve patient adherence, and ensure timely medication delivery.
- Conducted refill reminder calls and coordinated medication refills with healthcare specialists
- Utilized pharmacy software systems (e.g., SPRX) to manage patient profiles, verify eligibility, and document all interactions.

EDUCATION:

- 2010–2015 | University of California Riverside | Bachelor's Degree of Science in Biology
- 2019–2020 | San Bernardino Valley College | ASHP Accredited Pharmacy Technician Program
- 2024–August 2025 | University of Arizona | Master of Science in Health Informatics and Analytics

RELEVANT PROJECTS:

Vertex Launch

- Collaborated with the pharmacy team to facilitate the successful rollout of newly attained medications, ensuring accurate data entry and engaged with medical practices to obtain necessary documentation

Oregon Patient Support Initiative

- Accurately entering prescriptions and managing patient accounts with a focus on Oregon state regulations and requirements

SPU Initiative

- Early contributor to transitioning pharmacy services from cystic fibrosis to pulmonary arterial hypertension, helping to establish and unify the Specialty Pulmonary Unit team for improved patient care coordination

SKILLS:

- Data Analysis & Interpretation
- Statistical Analysis
- Microsoft Office Suite (Word, Outlook, Excel)
- Problem Solving & Root Cause Analysis
- Verbal and Written Professional Communication
- Attention to Detail & Accuracy
- Strong Organizational Skills
