

Skills

- SQL (MySQL, SQLite, Postgres, procedural queries)
- Python (pandas, matplotlib; data cleaning & automation)
- ETL & Data Pipeline Development (data mapping, automation, ingestion)
- Database Management & Exploration (100+ tables, linkages, querying)
- Data Analysis & Reporting (Python, Excel, SQL, support ticket investigation)
- Client Communication & Data Consultation (meetings, QBRs, SOPs, advocacy)
- Project Management & Implementation Planning (deliverables, workplans, cross-team collaboration)
- Data Visualization (Tableau, matplotlib, Seaborn)

Projects

STOCK PORTFOLIO ETL – [GitHub](#) – Personal Project August 2025

- Built a modular Python ETL pipeline to extract client, account, transaction, and stock price data; loaded into SQLite.
- Calculated holdings, market values, and portfolio summaries; automated Yahoo Finance data retrieval
- Created a Jupyter notebook for exploratory analysis and visualizations (bar charts, top holdings, client diversification).

LARGE HEALTH PLAN IMPLEMENTATION – Professional Client Project 6+ months 2025

- Led implementation of a major health plan into the system, serving as primary contact and project coordinator.
- Scoped requirements, mapped client data, coordinated deliverables with product and dev teams.
- Conducted regular meetings (3x weekly), generated reports, and ensured data readiness for pipeline automation.

DATABASE & DATA WAREHOUSE CREATION – [GitHub](#) – Personal Project April 2024

- Designed and Implemented an SSMS database and data warehouse.
- Conducted CRUD operations using My SQL and Procedural SQL.
- Utilized triggers and functions to keep warehouse current with database.
- Ensured data integrity and data normality.

Work Experience

CLIENT DATA ANALYST – Cúratús – Provo, UT November 2024 - Current

- Map new client data fields and coordinate with internal developers for ingestion and pipeline automation.
- Clean and combine client data using Python scripts and Excel; prepare data for system ingestion.
- Query company databases (100+ tables) to investigate data issues and resolve support tickets.
- Lead weekly client meetings, QBRs, and ongoing support; draft SOPs and strategic account plans.
- Advocate for clients internally to prioritize deliverables and ensure successful project implementation.
- Track billing, invoices, and project timelines; act as project manager for new client onboarding.

INFORMATION SYSTEMS MANAGER – COS Accounting & Tax – Provo, UT September 2021 - October 2022

- Developed interactive branching forms for client onboarding to improve data collection accuracy.
- Designed and exported client forms into Excel databases to streamline data management.
- Co-designed and troubleshooted an automation bot with the lead accountant, **reducing filing time by 50%**.
- Maintained data quality and implemented cleaning procedures to support automation.

OWNER – Revive Window Cleaning – Provo, UT October 2022 – November 2024

- Founded and operated a window cleaning company generating \$80k+ yearly revenue.
- Managed website, digital campaigns, scheduling, finances, and client relations efficiently.

Education

B.S. IN BUSINESS INFORMATION SYSTEMS – Utah Valley University August 8, 2025

DATABASE ADMINISTRATION & DATA WAREHOUSING – Certificate of Proficiency – Utah Valley University
