PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with **8+ years** of progressive experience in data interpretation, statistical analysis, and business intelligence. Proven expertise in **SQL, Python, and PostgreSQL** with demonstrated success in **reducing reporting time by 20%** and **increasing data reliability by 15%**. Specialized in **ETL processing, data visualization, and predictive analytics** using **Tableau and Power BI**. Seeking to leverage advanced analytical skills and automation expertise to drive data-driven decision making and optimize business processes.

CORE COMPETENCIES

Programming & Databases

- **SQL** (Advanced) • **Python** (Pandas, NumPy, Scikit-learn)
- **PostgreSQL** • **MySQL** • **Java** • **BigQuery**
- **GCP** • **AWS**
- **Data Mining** • **ETL Processing**

Technical Tools

- **Jupyter Notebooks** • **Google Sheets**
- **Business Intelligence (BI)** • **KPI Development**
- **Data Cleaning** • **Process Automation**

Analytics & Visualization

- **Tableau** (Advanced) • **Power BI**
- **Microsoft Excel** (Advanced) • **Statistical Analysis**
- **Predictive Modeling** • **Data Visualization**

Business Skills

- **Requirements Analysis** • **Stakeholder Management**
- **Cross-functional Collaboration** • **Project Management**
- **Data Governance** • **Performance Optimization**

PROFESSIONAL EXPERIENCE

Senior Data Analyst

April 2022 - July 2023

Upstream Services, Minneapolis, MN

Technologies: Python, SQL, Tableau, Power BI, PostgreSQL

- **Reduced reporting time by 20%** through development and maintenance of automated dashboards in **Tableau and Power BI**, serving 50+ stakeholders across 3 departments
- **Increased forecasting accuracy by 25%** by conducting advanced **statistical analysis** and implementing **predictive modeling** to identify market trends and optimize business processes
- **Improved executive decision-making efficiency by 30%** through collaboration with cross-functional teams to define KPIs and deliver actionable insights for strategic planning
- **Automated data collection processes using Python**, reducing manual work by **30 hours weekly** and minimizing human error by 40%

Data Analyst

May 2013 - August 2019

Liberty Oil Mills, Mumbai, India

Technologies: Python, SQL, PostgreSQL, Microsoft Excel, Power BI

- **Designed and implemented complex SQL queries** to extract data from multiple sources, supporting analytics for 5+ business units with 1M+ records monthly
- **Increased marketing ROI by 18%** through comprehensive analysis of campaign performance and **customer segmentation** using advanced statistical methods
- **Enhanced data reliability by 15%** by streamlining data validation and error-checking workflows, reducing data quality issues by 60%
- **Improved stakeholder engagement by 35%** through preparation of compelling presentations and visual reports for non-technical audiences
- Developed automated **ETL processes** that reduced data processing time from 8 hours to 2 hours daily, improving operational efficiency

EDUCATION

Bachelor of Science in Computer Science

2011

Mumbai University, Mumbai, India

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Google Data Analytics Professional Certificate** (In Progress - Expected 2025)
- **Microsoft Excel Specialist** - Advanced Data Analysis & Visualization
- **Python for Data Science** - Pandas, NumPy, Scikit-learn Specialization
- **SQL Database Administration** - PostgreSQL & MySQL Optimization
- **Tableau Desktop Specialist** - Advanced Data Visualization

KEY PROJECTS & ACHIEVEMENTS

SQL to PostgreSQL Migration & Optimization

Upstream Services | 2022

Technologies: PostgreSQL, Python, SQL, ETL, Data Validation

- Architected and executed migration of **500GB+ legacy data** from multiple SQL Server instances to PostgreSQL, ensuring **zero data loss** and maintaining 99.9% uptime during transition
- Developed custom **Python ETL scripts** with pandas and psycopg2 to automate data transformation, reducing manual migration time from 200+ hours to **48 hours**
- Implemented advanced indexing strategies and query optimization, resulting in **40% faster query performance** and 25% reduction in storage costs

Marketing Campaign Analytics & Customer Segmentation

Liberty Oil Mills | 2018-2019

Technologies: Python, SQL, Tableau, Statistical Analysis, Machine Learning

- Built comprehensive **customer segmentation model** using Python (sklearn, pandas) analyzing **1M+ customer records** across demographics, purchase behavior, and geographic data
- Designed **RFM analysis framework** (Recency, Frequency, Monetary) that identified **5 distinct customer segments**, enabling targeted marketing strategies that increased conversion rates by 22%
- Created interactive **Tableau dashboards** for marketing team with drill-down capabilities, tracking campaign performance across 12+ channels

Automated Financial Reporting System

Upstream Services | 2022-2023

Technologies: Python, SQL, Power BI, Excel VBA, Task Scheduler

- Developed end-to-end automated reporting pipeline using **Python scheduling** and SQL stored procedures, eliminating **30+ hours of manual work weekly** across finance and operations teams
- Built dynamic **Power BI executive dashboards** with real-time KPI tracking for revenue, costs, and profitability metrics, serving **C-level executives and 15+ department heads**
- Implemented data quality monitoring using Python logging and email alerts, achieving **99.5% data accuracy** and reducing reporting errors by 85%

Predictive Inventory Optimization Model

Liberty Oil Mills | 2017-2018

Technologies: Python, Scikit-learn, SQL, Time Series Analysis, Tableau

- Developed **machine learning forecasting model** using Python (sklearn, numpy) incorporating seasonal trends, economic indicators, and historical sales data to predict demand for **200+ product SKUs**
- Implemented **time series analysis** using ARIMA and exponential smoothing techniques, improving demand prediction accuracy by **25%** compared to traditional methods
- Created optimization algorithm that balanced inventory carrying costs with stockout risks, resulting in **\$2.1M reduction in excess inventory** and 15% improvement in service levels
