PROFILE SUMMARY

Self-directed and Detail-oriented Business Analyst with hands-on experience in implementing scalable solutions to solve complex business challenges across customer-focused domains and financial services. Skilled in application development, querying databases, performance monitoring, quality assurance, and leveraging metrics to inform prioritization and improvement. Proven ability to support system design, functional testing, and business analysis by analyzing large datasets and building scalable data solutions using cloud warehouses. Adept in agile delivery environments with hands-on experience in cross-functional collaboration, user acceptance testing, and stakeholder engagement to help shape product strategy and improve operational efficiency.

SKILLS

Business Analysis: Requirements Gathering, Process Improvement, State Process Mapping, Ticket tracking

Project Delivery: Agile (Scrum, Kanban), Sprint Planning, Retrospectives, Process Flow Documentation

Data Management: SQL, ETL, Data Wrangling, Data Manipulation, Data Warehouse, Data Mining

Testing: Quality Assurance, Test Plans, Regression cycles, UAT Planning, Functional Testing, Debugging, Issue Resolution

Tools: MySQL, MS SQL Server, Python, JavaScript, React, HTML/CSS, AWS, MS Office Suite (Excel, PowerPoint, Word), Jira, Visio, Confluence, Figma, CI/CD, Git, Jenkins, Postman, REST APIs Integration

PROFESSIONAL EXPERIENCE

Analyst (Application Specialist), Development Bank Singapore **September 2020 – Nov 2022** | Remote, India

- Facilitated backlog refinement and sprint planning via Jira across 20+ agile sprints to define scope, translate business needs into technical requirements, and documented current-to-future state business process flows in Confluence to streamline handoffs to the IT and QA team, ensuring 100% on-time execution.
- Collaborated with Product, Engineering, and QA teams throughout the SDLC phase to design and develop framework components & modular architecture for reusability and scalability.
- Led end-to-end application development, building new features in React, mock JSON-based payload samples, and API request templates to validate backend integration, supporting end-to-end application design.
- Orchestrated 10+ sprint demo reviews and drove UI/UX improvements across multiple digital workflows, balancing trade-offs between technical feasibility and stakeholder demands.
- Led UAT cycles and defect triage by automating test scripts and validating user stories against user acceptance criteria, closing 95% of JIRA tickets before pre-production, ensuring compliance with best practices.

Business Analyst, Kiranaawala **January 2023 – June 2023** | Remote, India

- Collaborated with cross-functional team in daily agile standups and milestone reviews to reprioritize backlog and resolve delivery blockers, maintained technical documentation, and accelerated project delivery by 2 weeks.
- Orchestrated requirements gathering workshop and mapped system workflows into configurable modular processes, validated deliverables against user stories, enabling sign-off for 10+ release approvals.
- Enhanced defect tracking and reporting efficiency using Jira to systematically track, manage, and report on issues and release builds, ensuring timely resolution and reducing response time by 25%.
- Documented detailed process flows and business logic across application workflows in Jira and Confluence, creating configuration logs for internal business users, and encouraging knowledge transfer.
- Created test-cases, identified and mitigated potential bugs early across UAT, supported CI/CD deployment using Git, enabling version-controlled, rollback-ready builds across staging and production deployment.

Graduate Associate (Analytics, Web Design & Development), UTD **July 2024 – Dec 2024** | Texas, USA

- Guided 200+ students in functional and user-centric design, HTML/CSS, JavaScript, DOM manipulation, and user experience workflows.
- Introduced best practices in application development (mobile/web platforms) and platform usage guides, improving system integration, helping students stimulate UI/UX mock-ups and Figma wireframes.
- Reviewed application prototypes, providing feedback aligned with business KPIs and system design clarity.
- Improved project outcomes by addressing usability gaps and queries with a 48-hour turnaround time.

WISE Mentee, Microsoft Corporation **October 2018 – Apr 2019** | Hyderabad, India

- Developed "CareChat", an NLP-powered chatbot for personal care using Azure Cognitive services and Dialogflow, enabling user sentiment classification and support for real-time escalation alerts.
- Partnered with mentors to iterate user experience flows and gained hands-on exposure to product lifecycle concepts through shadowing sessions and case-based learning with Microsoft products.

EDUCATION

Master of Science, Business Analytics & Artificial Intelligence (Dean's Excellence Scholarship)

The University of Texas at Dallas

GPA 3.89

May 2025
