SUMMARY

A recent Computer Science & Engineering graduate with strong foundations in C++, Python, and software engineering Principles. Skilled in algorithms, data structures, debugging, and source control, with hands-on experience building software-intensive projects and collaborating in team environments.

EDUCATION

University of Nevada, Reno

Reno, NV

Bachelor of Science in Computer Science & Engineering, Minor in Mathematics

May 2025

- **Dean's List:** Spring 2025
- **Relevant Coursework:** Analysis of Algorithms, Statistics, Data Structures and Algorithms, Design Patterns, Testing & DevOps, Machine Learning, Internet Security, Reliability and Security of Computing Systems, Computer Systems Administration, Engineering Physics

TECHNICAL SKILLS

Languages: C++, C, Python, Java, SQL, JavaScript, HTML, CSS,

Frameworks: React JS, Django, Vue.JS, Ruby on Rails, Flask, Next.JS, Playwright, React

Software & Databases: Linux, Git, GitHub

Soft Skills: Writing, Communication, Strategic Thinking, Team Collaboration

EXPERIENCE

Perpex

Remote

Django Developer Intern

Aug 2025-Present

- Supported backend development using Python and Django Framework, increasing site reliability and app scalability by 20%
- Maintain and enhance existing web applications, enhancing their reliability by 10%
- Contributed to integrations with databases using SQL, increasing precise and efficient fetching of data in the database by 90%
- Participated in Code Reviews to reduce errors by at least 20%

Wells Fargo Software Engineering Job Simulation on Forge

Remote

Software Engineer

May 2025-May 2025

- Analyzed and documented 10+ functional and non-functional requirements for a financial portfolio management system made in Java
- Crafted data schemas to track 20+ financial attributes and coded a prototype GUI that increased data visibility by 40%.
- Constructed an ERD with 8+ entities and 15+ relationships, streamlining data modeling for system architecture, reducing ambiguity by 30%
- Implemented ERD-backed models in IntelliJ and published project artifacts to GitHub, achieving 100% reproducibility

PROJECTS

SageScripture: AI-Powered Spiritual Guidance Chatbot | Python, NLP, Machine Learning, Flask, React

- Developed an AI-powered chatbot that handled 500+ unique queries with 90% response accuracy, leveraging NLP and machine learning to provide personalized philosophical insights..
- Implemented a Flask backend with OpenAI's GPT model and a React frontend for cross-platform web deployment, and utilized Git for version control with a production-linked master branch.

SkyPath – Airline Search Engine | Python, Flask, MySQL, React, Apache Spark, AWS

- Created a full-stack airline search engine that processed over 100K flight records, enabling users to visualize data with a <1s response time
- Implemented Spark-powered trip recs with 95% route accuracy, ETL pipelines with AWS Glue to handle 10GB+ datasets
- Deployed scalable services on AWS EC2

CivicNest - Property Search and Real Estate Marketplace | Heroku, Python, PostgreSQL, SQL, HTML, CSS, Typescript, Next.JS, React

- Spearheaded the creation of a GIS real estate investment platform for Reno residents, mapping over 10,000 properties
- Collaborated with 3 Individuals to integrate 5 key GIS data feeds for enhanced location insights on the web application
- Innovated new features beyond basic listings, including cluster-based property mapping, AI generated market insights using Gemini, and zipcode-based employment trend predictions in order to provide potential home buyers with up to 4x the information on neighborhoods
- Implemented a secure user authentication system for protecting confidential user information, increasing user privacy by 40%
- Developed a statistical dashboard utilizing Machine Learning to display up to date Crime Data in the Neighborhood

Youtube Data Analyzer | Python, Pandas, NumPy, Matplotlib, NetworkX

- Established an analytics engine that processed 100,000+ YouTube video records, identifying trending categories with 95% accuracy.
- Engineered Top-K ranking algorithms that benchmarked content by views/ratings, reducing analysis time by 40%
- Designed multi-parameter range-based filters to locate videos by length, size, and category, increasing precision by 30%
- Mapped 10,000+ nodes and 50,000+ edges in recommendation graphs, improving recommendation transparency by 25%
- Programmed interactive visual dashboards (Matplotlib, Pandas) that cut analysis-to-insight time by 50%

NBA Calendar Sync App | Javascript, Python, FastAPI, React, TailwindCSS, MongoDB, JWT, Google OAuth, NBA API, Google Calendar

- Built a full-stack application for users to sync favorite NBA teams' schedules with Google calendar, reducing manual entry time by 100%
- Orchestrated a React & TailwindCSS UI featuring interactive team selection and calendar views, improving user satisfaction levels by 35%.
- Produced REST APIs with secure authentication and role-based access

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Nevada Hawai'i Club

Reno, NV

Culture Outreach Leader

November 2023 – May 2025

- Led a team in organizing cultural events that fostered community engagement, increasing event attendance by 40%.
