Excels at system architecture, developer experience optimization, and cross-functional collaboration to drive business impact.

SKILLS

Oracle: Human Capital Management(HCM), Oracle BI Publisher reports, OTBI Reports, SQL, Python, Scripts Writing, Command Prompt Tools, ALM Octane(testing tool for defects),Excel, Word, functional design development, user acceptance testing, training and deployment activities. I also have a background in web development using JavaScript(ES6+), React, Node.js, and CSS3.

EXPERIENCE

Accenture, Custom Software Engineer

Oracle HCM Reporting Analyst at one of the top insurance providers in the United States 2023 - Present

- Created complex custom reports by utilizing SQL, Oracle BI publisher, and Oracle OTBI to provide actionable insights.
- Worked very closely with the client to understand their specific reporting needs and ensure the reliability of the data.
- Ensured project plans align with client expectations and maintain regular status updates.
- Implemented automated workflows that streamlined automations and enhanced the user experience.
- Oversaw data migration audits to validate that the data transferred successfully and accurately post migration.
- Willingness to thrive and learn new features and tools as the oracle field continues to grow.
- Mentored associate analysts through code reviews, pair SQL programming, and documentation of best practices.

Accenture, Packaged App Development Associate

Oracle HCM Reporting Analyst at one of the top insurance providers in the United States 2022 - 2023

- Associate Developer that primarily focused on analyzing data and analytics to support business needs.
- Create, modify, and test scripts, codes, and forms that allow systems to successfully run in development environments to successfully launch new business tools for UHG(UnitedHealthGroup).

- Architected and implemented report search functionality to enable the client to quickly navigate complex applications using OTBI and BI Publisher reports.
- Optimized resource creation workflows that increased conversion from signup to active builder by 20%, directly impacting user retention.
- Collaborated across engineering, product, and design to prioritize and deliver high-impact features based on customer feedback and business metrics.
