Clinical Research Analyst with experience improving trial processes and maintaining data integrity in healthcare settings. Served as the lead analyst on the two FDA-approved Alzheimer's treatments, working closely with physicians and research teams to ensure protocol compliance and patient safety. Skilled in EDC platforms and trial management. Currently seeking roles in clinical research coordination or health policy analytics to apply my background in a meaningful, impactful way.

Employment history

Clinical Research Analyst, Alzheimer's Research and Treatment Center — 2023 - Present

- Design trial processes with partners, ensuring insights drive clinical advancements.
- Manage data entry across EDC platforms, maintaining accuracy in clinical research.
- Verify patient documentation, enhancing study reliability and data integrity.
- Lead study activities from start to finish, improving operational efficiency.
- Evaluated trial outcomes using statistical analysis, leading to enhanced study protocols and improved patient safety measures.

Minimally Invasive Surgical Care Specialist, Palms West Hospital — 2022 - 2023

- Assist in surgeries, ensuring sterile setup and resolving technical issues, boosting team efficiency.
- Supervised operating room standards, maintaining documentation protocols, enhancing procedural accuracy.
- Provided real-time surgical support, improving team performance and patient outcomes.

Patient Service Representative/Radiology Assistant, Rayus Radiology — 2020 - 2022

- Reviewed radiology images, ensuring accurate reporting and timely physician communication.
- Facilitated efficient image transfer, enhancing patient care coordination.
- Assessed patient status for further analysis, optimizing clinical outcomes.
- Provided compassionate assistance to patients, ensuring a comfortable experience while addressing questions and concerns.
