

Kalpesh Patil

Business Analyst

AZ | 480-309-3517| mrkalpesh1010@gmail.com

SUMMARY

Business Analyst with 4 years of experience in developing machine learning models, automating ETL workflows, and creating interactive dashboards using Python, Tableau, Power BI, and cloud platforms (AWS, Snowflake, Azure). Expertise in optimizing data pipelines, enhancing decision-making by 20%, and improving marketing strategies by 30% through advanced analytics, customer segmentation, and churn prediction. Skilled in reducing processing times by up to 35% and improving data quality by 40%. Adept at collaborating with cross-functional teams to deliver actionable insights and drive business success.

SKILLS

Methodologies: SDLC, Agile, Waterfall
Languages: Python, R, SQL, SAS
Packages: NumPy, Pandas, Matplotlib, SciPy, Seaborn, Ggplot2
Machine Learning Skills: Supervised Learning, Unsupervised Learning, Classification, Linear Regression, Logistic Regression, Decision Trees, Random Forests, Naive Bayes, KNN, K-means, CNN, NLP
Visualization Tools: Tableau, Power BI, Microsoft Excel, QlikView, Google Analytics
Cloud Platforms: AWS, Google Cloud Platform (GCP), Azure
Big Data Technologies: Hadoop, Hive, Apache Spark, Databricks
ETL Tools: Informatica, Talend, Alteryx
Reporting Tools: SAS BI, Cognos, Business Objects
Database: MySQL, SQL Server, MongoDB, Snowflake
Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Problem-Solving, Communication, Presentation

EDUCATION

Master of Science in Business Analytics W. P. Carey School of Business at Arizona State University	May 2025
Bachelor of Engineering, Mechanical Engineering Savitribai Phule Pune University, Pune, India	May 2020

EXPERIENCE

McKesson, AZ | Nov 2024 - Current | Business Analyst

- Developed and implemented machine learning models (e.g., Linear Regression, Logistic Regression, Random Forests, K-means) using Python (NumPy, Pandas, Scikit-learn) to uncover actionable insights from large datasets, improving decision-making by up to 20% for business stakeholders.
- Created interactive dashboards and reports using Tableau, Power BI, and Seaborn to present complex data insights to non-technical stakeholders, reducing report turnaround time by 30% and driving strategic initiatives.
- Leveraged Apache Spark and AWS (S3, Redshift) to process and analyze large-scale datasets, optimizing data pipelines and reducing processing time by 25% for real-time analytics projects.
- Designed and automated ETL workflows using Informatica and Alteryx to integrate data from multiple sources (MySQL, Snowflake), ensuring data accuracy and seamless reporting for cross-functional teams.
- Performed extensive data wrangling and cleaning using Pandas and SQL, resolving inconsistencies in datasets and improving data quality by 40%, enabling accurate predictive modeling and reporting.

Cognizant, Pune, India| Jan 2023 - July 2024 | Data Analyst

- Led database management projects, optimizing ETL workflows using SQL, Python, and Tableau, reducing processing time by 35% while enhancing predictive analytics, API integration, trend forecasting, and data governance, impacting over 50+ business reports.
- Engineered advanced customer segmentation models using A/B testing, machine learning, regression, classification, and clustering, enhancing marketing strategy effectiveness by 30% across 10+ product lines.
- Managed reporting automation with Power BI, Snowflake, Google Analytics, business process optimization, and dashboard development, reducing manual efforts by 25% and improving monthly reporting speed by 40%.

Cognizant, Pune, India| Apr 2022 – May 2023| Junior Business Analyst

- Designed cloud-based data pipeline solutions utilizing Snowflake, R, and Azure, improving data pipeline optimization, data wrangling, and insights generation by 50% efficiency gain through real-time visualization and reporting automation.
- Executed churn prediction modeling, hypothesis testing, trend analysis, and time-series forecasting through statistical analysis, experimental design, and machine learning, increasing customer retention by 15% and optimizing over \$1M in revenue.
- Formulated market research algorithms, product lifecycle analysis, and campaign performance using conversion rate and funnel optimization, increasing competitive benchmarking accuracy by 30% and enhancing strategy, supporting 5+ cross-functional teams.

Cognizant, Pune, India | Apr 2021 – Mar 2022 | Programmer Analyst

- Collaborated in ETL process optimization, API integration, and business intelligence reporting through SQL database tuning, improving data ingestion efficiency by 35% and reducing query execution time by 40% with cross-functional collaboration.
- Facilitated business intelligence teams in creating interactive dashboards and KPI measurement tools with Power BI, Tableau, and GCP, increasing data accessibility and performance tracking insights by 20% and managing over 200K+ data points.
- Orchestrated performance tracking reports, marketing mix modeling, and reporting automation tools, driving strategic insights, experimental design, and business process improvements for competitive market research, improving forecast accuracy by 18%.

PROJECT EXPERIENCE

Bitcoin Data Analysis & Prediction

- Developed predictive trading models, customer journey analysis, and business impact assessment using Scikit-learn, Pandas, NumPy, and Azure, integrating AWS cloud storage and improving forecasting accuracy by 22%, analyzing 500K+ trading records.
- Implemented risk assessment analytics, funnel optimization, and marketing mix modeling, utilizing trend analysis, machine learning pipelines, and A/B testing, improving decision support systems and product performance metrics by 30%.

COVID-19 Data Analysis: Impact Assessment and Forecasting

- Analyzed global COVID-19 datasets, attribution modeling, consumer behavior analysis, and KPI measurement, leveraging PowerBI, Tableau, SQL, competitive benchmarking, increasing insight generation efficiency by 25%, supporting 50+ policy reports.
- Designed epidemiological tracking and analytics using forecasting models and AWS, improving public health predictions by 85%.

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate, Salesforce Certified Tableau CRM Consultant, Salesforce Certified Business Analyst, Google Cloud Certified Data Engineer, Generative AI Certified, AWS certified.
