Detail-oriented & results-driven Data Analyst with a proven track record in analyzing health data to deliver actionable insights, support stakeholder decision-making, and optimize healthcare processes.

Professional Summary

Analytical Data Professional with 1+ years in healthcare data analytics and over a decade in pharmaceutical data and compliance. Adept at using SQL, Power BI, Excel, and Python to create actionable insights and streamline business processes. Proven success in delivering cross-functional data solutions, building automated reporting pipelines, and supporting strategic decision-making in regulated environments. Passionate about improving business systems through meaningful, scalable data practices.

Core Skills & Tools

Data Tools: SQL (PostgreSQL), Power BI, Tableau, Excel (Pivot Tables, VLOOKUP), KNIME

Programming & Automation: Python (Pandas, NumPy), GitHub

Techniques: Business Intelligence, Dashboard Development, EDA, Data Cleaning, Report Automation, KPI Design, Cross-Functional Collaboration

Other: Agile Methodology, Jira, Regulatory Compliance (FDA/ICH), Data Documentation, Stakeholder Communication, Empower, Analytical Instrumentation.

Professional Experience

Numpy Ninja

Data analyst, Remote

2024 - present

Gaining hands-on experience on real-time healthcare projects with large-scale clinical datasets, focusing on end-to-end data extraction, cleaning, modeling, and visualization to drive strategic decisions and deliver actionable business intelligence.

- Built interactive Tableau, Power BI dashboards and automated SQL pipelines for clinical datasets across healthcare domains.
- Created a maternal health analytics tool linking ultrasound metrics to fetal outcomes, uncovering 30% higher risk of preeclampsia.
- Led data modeling and ETL for an organ transplant project; optimized trigger-based systems reducing delays by 60%.
- Performed cohort analysis for gestational diabetes and sepsis risk, improving early detection KPIs by 18–30%.
- Collaborated across teams to translate clinical workflows into actionable BI solutions.

DrReddy's Laboratories Ltd, Hyderabad, IN

Deputy Manager, Analytical Lead

2003 - 2016

- Directed pharmaceutical data analytics initiatives supporting method validation and global DMF submissions.
- Built standardized Excel/VBA-based templates for impurity trend tracking, improving decision-making and audit readiness.
- Used statistical modeling and data mining to reduce process deviations and analytical cycle time by 20%.
- Led cross-functional data review meetings and developed regulatory documentation from large, complex datasets.
- Mentored 15+ junior analysts in data interpretation, documentation, and automated reporting.

Capstone Project

Post Graduate Program, Artificial Intelligence for Leaders, The University of Texas at Austin, TX

2023 - 2024

Pharma IntelliX, AI-Enabled system for DMF Submissions

Developed AI-enabled platform using NLP and ML to enhance Drug Master File (DMF) submission quality, streamline regulatory query management and enhance audit readiness thereby reducing compliance delays.

Education

- Post Graduate Program, Artificial Intelligence for Leaders | The University of Texas at Austin, TX
- Master of Science in Organic Chemistry | Osmania University, Hyderabad, IN
- Bachelor of Science in Genetics, Botany, Biological Chemistry | Osmania University, Hyderabad, IN

Certifications

- Regulatory Affairs, Expert level – June 2019

Publications

- Data Visualization in Tableau
- Guide to Seaborn Library (Violin Plot, Heatmap, Joint Plot) in Python
