SUMMARY

With 4+ years of experience as a Data Engineer, expertise includes database development, ETL processes, data modeling, report generation, and advanced big data technologies. Proficient in managing the full Software Development Life Cycle (SDLC) using Agile and Waterfall methodologies. Demonstrates advanced skills in the big data ecosystem with technologies such as Hadoop, MapReduce, Hive, Apache Spark, Pig, Sqoop, and Pyspark. Skilled in designing and implementing scalable ETL solutions with tools like SSIS, Apache NiFi, Apache Kafka, and Talend. Knowledgeable in data analytics and machine learning using Python libraries including NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, and TensorFlow. Experienced in leveraging visualization tools such as Tableau, Power BI, and SSRS to craft interactive dashboards and detailed reports. Familiar with cloud platforms including AWS, Azure, and Databricks, integrating solutions across these environments. Proven ability in managing and optimizing databases such as MongoDB, MySQL, Teradata, and Snowflake, ensuring efficient query performance and data handling.

EDUCATION

Master in Computer Science

University of Central Missouri, Warrensburg, MO

Bachelor in Electronics and Communication Engineering

SASTRA Deemed University, Thanjavur, Tamil Nadu

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Language: R, Python, SQL, SAS

IDE's: PyCharm, Jupyter Notebook

Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig, Sqoop, Pyspark, Databricks, Snowflake

ETL Tools: SSIS, Apache NiFi, Apache Kafka, Talend, Apache Airflow, Informatica

Visualization Tools: Tableau, Power BI, SSRS, Microsoft Excel

Cloud Technologies: AWS, Azure, GCP

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow

Database: MongoDB, MySQL, SQL Server, HBase, Cassandra, DynamoDB, PostgreSQL

Version Control: Git, GitHub, GitLab

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving

Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE

HCL Tech, USA | Data Engineer

Jan 2024 - Current

- Utilized Agile methodologies to guide the various stages of the Software Development Life Cycle (SDLC), ensuring iterative progress and continuous improvement.
- Employed Python, R, SQL, and SAS for sophisticated data manipulation, analysis, and modeling, significantly enhancing decision-making processes.
- Designed comprehensive application frameworks, data strategies, and technology stacks, integrating Big Data and Cloud technologies.
- Implemented technologies such as Hadoop, MapReduce, Hive, Apache Spark, and Pig to enhance big data processing capabilities and efficiency.
- Developed SSIS packages for asynchronous ETL workflows, ad hoc reporting, and leveraged SSRS and SSAS for extensive data mining and reporting functionalities.
- Conducted regular performance optimizations on Tableau dashboards to improve user experience and reduce loading times.
- Deployed and managed cloud-based data solutions utilizing AWS services (S3, EC2, RDS, Lambda, Redshift) and Snowflake for scalable and efficient data management.
- Designed and implemented end-to-end data pipelines on GCP for efficient streaming and batch data ingestion, transformation, and loading.
- Managed databases across MySQL, HBase, DynamoDB, and MongoDB, ensuring high availability, optimal performance, and scalability of data storage solutions.

Hexaware Technologies, India | Data Engineer

Jan 2019 - Nov 2022

- Adhered to Waterfall project management methodologies for executing large-scale, structured projects, ensuring systematic progress and alignment with project goals.
- Enhanced the efficiency of MapReduce jobs and Spark applications to accelerate data processing operations.
- Developed and managed data workflows using Apache NiFi, Apache Kafka, and Talend for the ingestion and processing of extensive data sets.
- Integrated machine learning models created with Scikit-learn and TensorFlow into data processing pipelines for advanced analytical capabilities.
- Generated detailed reports for various organizational departments utilizing SQL Server Reporting Services (SSRS).
- Designed and delivered interactive Power BI dashboards and reports, providing business stakeholders with real-time insights into key performance metrics.
- Created and implemented data pipelines on Azure, improving data processing efficiency compared to traditional on-premises solutions.
- Developed custom ETL solutions and real-time data ingestion pipelines using Python and shell scripts to facilitate data movement in and out of Hadoop environments.
- Managed and optimized relational databases on MS SQL Server and MySQL to support comprehensive data warehousing needs.
- Employed Git for data version control, facilitating effective tracking of changes and enhancing team collaboration.
