EDUCATION

BSc in Computer Science | Minor in Mathematics | Texas Tech University | GPA: 3.78

Lubbock, TX | December 2024

Relevant Coursework: Software Engineering, Computer Architecture, Intro to Artificial Intelligence, Object Oriented Programming, Discrete Mathematics, Data Structures, Calculus, Modern Digital System Design, Statistics

AREAS OF EXPERTISE

Tools: NetBeans, Figma, GitHub, IntelliJ, Jira, AWS Management Console, Tableau, Copilot, Canva, Google Workspace, Palo Alto

Programming Languages: SQL, Python, C, Java, JavaScript, HTML/CSS, React

Soft: Public Speaking, Communication, Time Management, Problem Solving, Critical Thinking, Adaptability, Collaboration, Conflict Management, Negotiation

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern | Amazon

Austin, TX | May 2024 – August 2024

- Developed a serverless web application to streamline multi-tenant onboarding, new cell/business partition onboarding, and site-specific onboarding for tenants within Amazon's Inventory Instance Management (IIM) team.
- Designed and implemented a comprehensive AWS Lambda package that processed client requests, validated data, updated configuration files, generated automatic code reviews, and stored client information in DynamoDB.
- Pioneered the automatic code review system within the team, ensuring every configuration change triggered a code review, significantly improving code quality and collaboration.
- Successfully integrated the Simple Issue Management (SIM) client into the application, automating the creation and tracking of tickets for new client requests.
- Utilized AWS services, including DynamoDB, SES, and Lambda, to create a scalable and efficient backend for client data processing and onboarding automation.

Consulting Extern | PwC

Remote | August 2023 – September 2023

- Developed strategic outreach plans to identify potential donors, leveraging data analysis to segment and target high-value donor prospects.
- Increased donor engagement by researching and implementing best practices for donor relations, helping the nonprofit expand its donor network.
- Generated reports and presentations for nonprofit leadership, translating complex donor data into clear, actionable strategies that led to increased contributions.

Logistics Operations Intern | Angelic Solution Spot Inc

Capitol Heights, MD | June 2023 – August 2023

- Handled **15-20** weekly bookings, verifying documentation and initiating shipments within **24** hours.
- Processed and tracked orders using logistics software, reducing delays by **15%** and enhancing overall operational efficiency.
- Coordinated with **10+** carriers and **100+** clients, maintaining a **95%** on-time delivery rate and improving customer satisfaction by **20%**.
- Managed **50+** daily emails, resolving queries within **2** hours, leading to a **30%** increase in communication efficiency.

Research Assistant | Louisiana Aerospace Catalyst Experiences for Student

Lake Charles, LA | September 2022 – May 2023

- Co-developed and implemented MegaSat interfaces, enhancing data accuracy and functionality for atmospheric sensors at altitudes up to **30km**.
- Engineered and calibrated critical sensor systems, achieving data precision within **98%** of targeted objectives.
- Advanced system architecture with robust data logging via GPS integration, which enhanced tracking accuracy by over **90%**.
- Assisted in developing and testing flight software, ensuring reliable operation during mission-critical phases and compliance with design specifications.
- Contributed to the creation of detailed technical documentation, outlining design choices and operational procedures to guide future project developments and enhancements.

PROJECT EXPERIENCE

Software Developer/ Project Lead | Smart City Environmental Monitoring System

Lubbock, TX | August 2024 – December 2024

- Built a Flask backend to process real-time environmental data (air quality, noise levels) via APIs, enhancing system performance.
- Developed a VAR model to predict environmental trends using historical data, improving forecast accuracy.
- Created a responsive React.js dashboard to visualize real-time data with graphs, heatmaps, and charts, boosting user engagement.
- Designed a notification system for threshold-based alerts, enabling proactive decision-making.
- Aggregated and managed environmental data in MongoDB for predictive modeling and analysis.

Software Developer | Cellular Life Simulator

Lubbock, TX | January 2024 – May 2024

- Developed a Python-based simulation of cellular life processes, which increased understanding of complex biological systems.
- Implemented command-line interfaces for dynamic input/output management, facilitating robust data handling and file operations.
- Led a dual-phase computation project using serial and concurrent processes, reducing simulation time by over **50%**.
- Conducted rigorous testing to ensure accurate simulations and performance optimization, significantly reducing computational processing times.

Software Developer | Tetris Game

Lake Charles, LA | August 2022 - November 2022

- Revitalized the classic Tetris game with advanced object-oriented design, improving gameplay interaction and graphical user interface.
- Introduced new game functionalities like brick rotation and line clearance, which increased user engagement by **40%**.
- Implemented dynamic scoring and game state features, leading to a 30% increase in user retention.
- Created a comprehensive menu system that improved navigation efficiency and user experience satisfaction by over **35%**.

LEADERSHIP EXPERIENCE

Student Government Association Representative | National Society of Black Engineers (NSBE)

Lake Charles, LA | August 2022 – May 2023

- Liaison between NSBE and Student Government Association. Worked on policies to help the NSBE chapter.

Financial Officer | ColorStack

Lubbock, TX | January 2024 – December 2024

- Ensured chapter activities aligned with goals and by-laws, achieving **100%** compliance with organizational standards.
- Managed financial reporting, enhancing transparency and accountability by maintaining detailed transaction records.
- Developed and presented bi-semester financial reports and budgets, boosting informed decision-making among members.
- Led fundraising efforts, optimizing resource allocation and increasing funding by **25%** to support chapter objectives.
