SOFTWARE ENGINEER AT XCHANGEWORX

Solutions-Focused • Strategic Thinker • Collaborative • Open-Minded • Effective Planner • Results-Driven

PROFILE SUMMARY

- Software Engineer with over 2 years of experience in application development, system integration, and automation.
- Skilled in Java, Python, SQL, and modern frameworks with exposure to U.S.-based healthcare projects.
- Strong knowledge of the software development life cycle (SDLC), Agile methodologies, REST APIs, and CI/CD practices.
- Adept at designing scalable, secure software solutions and collaborating with cross-functional teams to deliver reliable and innovative systems.

CAREER CONTOUR

XchangeWorx - Software Engineer Aug 2023 - Present

- Developed and validated backend data workflows using Java and Python in compliance with HIPAA standards.
- Worked on HL7 interfaces and AWS-based automation scripts for clinical data processing.
- Involved in Identity & Access Management (IAM) testing and documentation to support a transition project from ForgeRock to Azure AD.
- Participated in SDLC practices including design, code reviews, and deployment using Git, Jenkins, and scripting tools.
- Created internal tools and performed REST API integrations for data services in a regulated healthcare environment.
- Developed and validated clinical documents (CCD, C-CDA) according to HL7 CDA standards and HITSP C32 specifications; implemented and tested XDS.b for document exchange and ensured compliance with HIPAA guidelines.
- Collaborated on FHIR-based interoperability solutions, leveraging expertise in HL7 message types (ADT, MDM, ORM, ORU, Query), Java, Cache ObjectScript, and security standards (SAML, XACML) to streamline secure clinical data exchange.

May 2023 – Aug 2023: MTX as Salesforce Developer Intern

- Assisted in development of Salesforce modules using JavaScript and logic-based scripting tools.
- Collaborated with teams in Agile sprints and used Git for version control and continuous integration tasks.

Jul 2021 – Jul 2022: Wipro as Project Engineer - Identity & Access Management

- Managed user access, provisioning, and automation scripting using Shell and Python.
- Worked with enterprise IAM systems to enable secure system integration and monitoring.
- Gained exposure to cloud-native app logic, user access controls, and testing processes.

PROFESSIONAL ENHANCEMENTS

- Languages: Java, Python, JavaScript, SQL, C++, Shell, PHP
- Frameworks: Spring, Hibernate, Flask, React (basic), ASP.NET (intro), Salesforce, MVC, Angular
- Databases: MySQL, PostgreSQL, SQL Server
- Tools & Libraries: Git, Jenkins, Docker, JIRA, Visual Studio Code, OpenCV
- Concepts & Techniques: OOP, MVC, Agile/Scrum, Classification Algorithms, REST API Integration, Secure Coding, CI/CD
- Platforms: Linux, Windows, AWS (EC2, RDS, IAM, Lambda, CloudWatch)
- IAM tools: Sailpoint, OKTA, Cyberark
- Web Technologies: HTML5, CSS3, jQuery, Responsive Design

ACADEMIC PROJECTS

- **Face Recognition System using Python**
Developed a facial recognition system using OpenCV and Python for real-time detection and identity verification.
- **Android App Privacy Analysis Using Classification Algorithms**
Built a privacy-focused machine learning model to analyze Android applications based on permissions and behavioral data.
- **Government Scheme Alert System for Healthcare Services using Cloud Computing**
Designed a cloud-based notification platform to alert users of relevant government healthcare schemes. Integrated user profiling and location-based filters to deliver targeted alerts using cloud services like AWS and Firebase.
- **Infrastructure Cybersecurity in a Hybrid Cloud Environment**
Conducted a research project focused on identifying vulnerabilities and best practices in hybrid cloud systems.
- **Research Intern – Insurance Regulatory Technology (NCC State Internship)**
Worked on the evaluation and improvement of digital insurance claim processes. Researched fraud detection models and policy compliance mechanisms under the supervision of academic and industry mentors.

EDUCATION & CREDENTIALS

- Master's in Computer and Information Systems Security, SUNY Albany - 3.8 CGPA (2023)
- Bachelor's in Computer Science Engineering, Sathyabama Institute of Science & Technology - 8.82 CGPA(2021)
- 12th from Tirumala Junior College (State Board), Andhra Pradesh with 97.9%(2017)
- 10th from Dr. K.K.R's Gowtham English Medium School (State Board), Andhra Pradesh with 85%(2015)
