

SUMMARY

Business Analyst with 5+ years of experience translating complex data into actionable strategies that optimize operations and drive business value. Skilled in stakeholder engagement, process improvement, and data tools such as SQL, Tableau, and Excel, with a strong foundation in Agile methodologies.

SKILLS

Business Analysis & Strategy: Requirements Gathering, Business Process Improvement, Gap Analysis, Root Cause Analysis, Workflow Optimization, Strategic Decision Support, Change Management
Data & Analytics: SQL, Excel (Pivot Points, VLOOKUP, Macros), Tableau, Power BI, Data Modeling, Data Visualization, KPI Tracking, Reporting & Dashboarding, Forecasting & Trend Analysis
Project Management & Methodologies: Agile, Scrum, Waterfall, Project Coordination, Sprint Planning, JIRA, Confluence, Risk Management, Stakeholder Collaboration
Technical Tools & Modeling: MS Visio, Lucidchart, BPMN, UML Diagrams, Wireframing, Python (for data analysis & automation), ETL Concepts, CRM Systems (e.g., Salesforce)
Soft Skills: Cross-Functional Collaboration, Stakeholder Engagement, Requirements Documentation (BRD, FRD, User Stories), Presentation & Reporting, Conflict Resolution, Client Relationship Management

EXPERIENCE

Business Analyst, JPMorgan Chase & Co.

Sep 2024 – Present

- Automated monthly reconciliation reports using SQL and Excel, reducing manual processing by 40% and saving 15 analyst hours monthly, while ensuring 98% accuracy across \$250M in transaction volume.
- Developed Tableau dashboards to monitor credit risk across 8 loan portfolios, enabling leadership to identify exposure changes 2x faster and improve capital allocation decisions for structured products.
- Collaborated with 5 cross-functional teams to streamline onboarding workflows, cutting average onboarding time from 12 to 7 business days and reducing data handoff errors by 60%.
- Captured and prioritized 60+ business requirements in JIRA/Confluence during treasury enhancement projects, aligning delivery scope with compliance needs and audit readiness requirements.
- Conducted root cause analysis on processing errors, uncovering logic flaws causing a 3.7% failure rate; led remediation work that reduced error rates to under 1% within one quarter.

Analyst, Texas Workforce Commission

May 2024 – Aug 2024

- Audited over 25,000 unemployment claims using Excel and Power BI, identifying fraud indicators in under 10 hours per batch and supporting over 15 compliance investigations across regional offices.
- Built Power BI dashboards to visualize key program metrics across 12 regions, leading to targeted interventions that improved client resolution rates by 15% in under 3 months.
- Standardized quarterly reporting processes across departments, reducing preparation time from 5 days to two while maintaining compliance with federal data reporting benchmarks.
- Performed a gap analysis on the claimant tracking platform, recommending workflow changes that cut duplicate data entries by 60% and reduced system support requests.
- Translated new unemployment policy changes into 25+ user stories and process diagrams, working directly with IT and program leads to update eligibility workflows and audit procedures.

Business Analyst, Humana

Jun 2022 – May 2024

- Designed Tableau dashboards to track utilization across 30+ provider networks, enabling the negotiation team to save \$1.4M annually through better contract insights and proactive network adjustments.
- Identified 22% reduction in false claims denials using SQL queries to uncover validation gaps; implemented logic improvements that enhanced member satisfaction and reduced appeals processing costs.
- Led evaluation of 3 care management programs, building outcome models and delivering insights that informed leadership's decision to expand 2 programs covering over 70,000 members.
- Partnered with compliance and actuarial teams to convert federal policy updates into technical documentation and system rules for 4 insurance product lines, ensuring timely implementation.
- Facilitated Agile ceremonies for a 10-member cross-functional team during a major claims platform overhaul, supporting sprint planning, backlog grooming, and stakeholder demos over 14 sprints.

Analyst, AIG

Dec 2020 – May 2022

- Built SQL-driven reporting tools for underwriting and claims teams, reducing report turnaround time by 60% and supporting over \$500M in insurance policy reviews across 15 business units.
- Created Tableau dashboards to monitor risk trends for 15 insurance products, which helped reduce overexposure by 18% and improved underwriting team's responsiveness to market changes.
- Analyzed policy lapse rates across 100,000+ policies, identifying 3 key process issues that, once resolved, reduced lapse rates within 6 months.
- Documented 20+ Functional Requirements Documents (FRDs) for compliance projects addressing HIPAA and GDPR changes, ensuring on-time delivery for internal audits and external reviews.
- Produced BPMN process diagrams for 10+ workflows in Visio, enabling streamlined training for new hires and supporting process improvement workshops across two operational departments.

EDUCATION

Masters of Business Administration in Information Systems

Dec 2024

University of Texas, Arlington

Bachelors in Information Technology

Nov 2020

University of Mumbai, India
