

KANISHK AGGARWAL

ka3506@nyu.edu linkedin.com/in/kanishkaggarwal1 github.com/k9a9 (929) 877-6596 New York, NY

Profile

M.S. Computer Science candidate with 2 years of experience in data analysis, scalable data workflows, and predictive modeling. Skilled in delivering actionable insights through advanced analytics, data engineering, and effective data visualization.

Education

New York University

M.S. in Computer Science

Sep 2024 – May 2026

GPA: 3.6

Thapar Institute of Engineering and Technology

B.E. in Computer Engineering

Sep 2018 – Jun 2022

GPA: 3.5

Skills

Languages: Python, SQL, C++, R

Tools: Airflow, AWS (EC2, S3), Pandas, Flask, Git, Power BI, Streamlit

Modeling & Techniques: Feature Engineering, Uplift Modeling, ML (XGBoost, LightGBM), Sales Forecasting, Anomaly Detection, Statistical Modeling, Data Engineering

Projects

Marketing Campaign Uplift Modeling

- Built models to predict customer uplift and optimize targeting, improving conversion uplift by 12%.
- Engineered advanced customer features, improving model AUC by 8%, and compared logistic regression, uplift trees, and causal forests.
- **Designed** interactive dashboard to communicate uplift metrics and causal insights to marketing teams.

Sales Forecasting for Retail Demand

- **Implemented** time series forecasting models and statistical models to predict product demand across retail stores.
- Engineered calendar, lag-based, and promotional features, improving model MAE by 12%.
- **Delivered** Power BI dashboard to visualize sales forecasts and trends, enabling data-driven decision making for business stakeholders.

Anomaly Detection and Monitoring Dashboard for Operational Data

- Built anomaly detection pipeline with automated data validation to monitor unusual patterns, reducing false positives by 30%.
- Engineered statistical and lag-based features, improving model precision by 18% and recall by 22%.
- **Constructed** interactive Streamlit dashboard, reducing anomaly investigation time by 35% and automating reporting.

Experience

ZS Associates, Data Analyst, Pune, India

Aug 2022 – Jun 2024

- Implemented and deployed data pipelines and segmentation models with CI/CD validation, improving customer targeting accuracy by 20% and driving 15% uplift in campaign conversion rates.
- Optimized ETL pipelines (Pandas, Airflow, SQL), reducing processing time by 50%, enabling real-time reporting.
- **Developed** Power BI dashboards for leadership teams, increasing reporting adoption by 40% and improving visibility.
- Led validation and monitoring for production pipelines, enabling automated anomaly detection and maintaining 98% data quality across business units.

ZS Associates, Data Analyst Intern, Pune, India

Feb 2022 – Aug 2022

- Designed predictive models (XGBoost, LightGBM) with advanced feature engineering to predict customer engagement outcomes, improving click-through rates by 200%.
- **Created** dashboards to track model performance and key metrics, reducing manual reporting time by 40%.
- Conducted A/B testing and causal impact analysis to quantify marketing campaign effectiveness, improving ROI estimation accuracy by 15%.

Defense Research & Development Organization, Data Analyst Intern, Chandigarh, India

Jul 2021 – Sep 2021

- Built classification model for avalanche prediction, achieving 90% accuracy and automated batch reporting.
