EXPERIENCE	EDUCATION & ACHIEVEMENTS
• Data Analyst Intern , Metus Lykos Debt Law Firm February 2025 - Present Optimized and analyzed the firm's CRM system to deliver accurate client data and actionable business insights. • Student Marker, System Programming Course at Trent University January 2025 - May 2025	• BSc Honors in Computer Science (Specialization: Data Analytics) Sept 2022 - Present Trent University • GPA - 81.77 • DEANS HONOUR ROLL (2023-2024AY) • Relevant Courses: Introduction to Data Science, Systems Programming, Database Management Systems, Data Structures & Algorithms, Data Visualization

PROJECTS

- **HackTrent 2024 : Airport Runway Optimization:** Designed an algorithm-driven solution to improve runway scheduling and air traffic management, reducing delays and optimizing airport operations.
- **End-to-End Sentiment Analytics Pipeline (Reddit + Azure + Power BI) :** Built an end-to-end Reddit sentiment analysis pipeline using Python and Azure (Event Hub, Blob Storage, Text Analytics) to process thousands of comments, then cleaned and modeled the data in Power BI to deliver an interactive dashboard with sentiment trends and insights.
- **Secure CRUD :** Python DB Solution: Built a fully normalized SQL database and Python CRUD app with secure authentication and image-upload support.
- **OFP Data Analysis:** Analyzed income, employment, and health data to uncover socio-economic patterns and provide insights through visual reporting.
- **FitMint Case Study :** Conducted data analysis and visualizations on 2,000 entries for a Japanese fitness startup's AI-powered app, blending traditional fitness with modern tech, and performed PESTEL analysis to inform market entry strategies.
- **Power BI HR Dashboards :** Built interactive dashboards consolidating ,1,500 employee records, delivering insights on promotion, attrition, satisfaction, and overtime to support HR decision-making.
- **FedEx Logistics Dashboard (sample) :** Created an interactive Power BI dashboard using web-scraped data, classifying cities by tier, cleaning and transforming data, and developing advanced DAX measures for detailed analysis; replicated the workflow in Python for automation and scalability .

CERTIFICATES & TRAINING

- **Google Data Analytics(Coursera)**
- **Meta Database Engineer Professional Certificate(Coursera)**

SKILLS

- **Programming & Data Tools:** Python [proficient], R, C# [experienced], SQL; skilled in scripting, data manipulation, and handling diverse formats (CSV, JSON, XML, flat files); familiar with DB2/MySQL.
- **Visualization & Reporting:** Power BI, Tableau, Excel, CRM systems; experienced in dashboards, trend analysis, forecasts, and KPI reporting for non-technical stakeholders.
- **Analytics & Problem-Solving:** Strong in cleaning, transforming, and interpreting large datasets; adept at identifying trends, patterns, and solutions using critical thinking and statistical modeling.
- **Business & Collaboration:** Experienced in business intelligence and communication; able to translate complex data into actionable insights and support teamwork in managing processes and deliverables.
