EDUCATION

Master of Science in Software Engineering

Arizona State University, Tempe, AZ

May 2024

GPA: 3.91/4

Bachelor of Engineering in Information Technology

Maharashtra Institute of Technology, Pune, India

May 2020

GPA: 3.7/4

TECHNICAL SKILLS

Certifications: AWS Certified Developer - Associate, GCP - Associate Cloud Engineer

Programming Languages: Python, Java, JavaScript, TypeScript, R, C, C++, C#, HTML5, CSS, SQL.

Frameworks: Angular, Django, Flask, Express (Node.js), Spring Boot, Vue.js, WPF.

Libraries: React, jQuery, Bootstrap, Chai, Mocha, JUnit, PyTest.

Databases and Tools: MS SQL Server, MySQL, PostgreSQL, MongoDB, Git, Docker, Linux, Jira.

PROFESSIONAL EXPERIENCE

Software Developer - MS Capstone Project, Auto BIM Route, Tempe, AZ

January 2024 - May 2024

- Orchestrated migration of a legacy Windows Forms application to WPF, resulting in a 20% reduction in application load times.
- Constructed an advanced data viewer leveraging OpenGL and OpenTK, enriching visual representation of electrical power grids and facilitating intuitive interaction with its JSON file data, and performed testing using the NUnit testing framework and automated CI/CD pipeline integration with GitHub Actions, potentially cutting down post-release bug reports by 30%.
- Conceptualized and executed a secure web-based anonymizer application with Flask and Angular, boosting user trust and diminishing data breach incidents by 50%.

Software Developer, Learning Engineering Institute, Tempe, AZ

December 2022 - May 2024

- Rebuilt and maintained highly responsive front-end web applications for two e-learning platforms leveraging Angular and Bootstrap, resulting in a 30% increase in page load speed and a 40% improvement in responsiveness.
- Collaborated closely with the UX team to integrate human-factor principles and develop immersive animations with GSAP, reducing bounce rates and increasing user satisfaction by 25%.
- Architected robust RESTful APIs with Django Rest Framework, achieving 99.9% uptime and a 30% reduction in response time.
- Optimized front-end performance by implementing lazy loading and code splitting, resulting in a 30% reduction in load times.
- Enhanced security and performance via JWT, leading to a 40% decrease in security vulnerabilities and a 35% improvement in system performance.

Software Developer, Quantiphi Analytics, Mumbai, India

August 2020 - July 2022

- Spearheaded the development of a large-scale data-sharing platform for a US State agency, transitioning to GCP, improving operational efficiency by 75% and diminishing turnaround time by 60%.
- Collaborated closely with UX teams and the client to build a responsive user interface in Angular and a robust Django backend to process requests to 100s of datasets with 10000+ entries in real-time.
- Consolidated two dialogflow chatbots with third-party services leveraging Express, improving user satisfaction by 50% and reducing issue resolution time by 40%.
- Devised an automated easy-to-use application on Express that sends regular SMS messages from an Excel database to users, resulting in a 45% increase in user engagement.
- Mentored new team members and joiners, cutting down project onboarding time by 25%.
- Recognized with the **Star Performer** award for exceptional contributions.

ACADEMIC PROJECTS

LAKY Programming Language

January 2023 - May 2023

- Designed a beginner-friendly Turing complete language "LAKY" utilizing Prolog.
- Directed the development of a UI interface with Angular and Flask to create an interactive editor; deployed it on EC2

Onegen – OneDrug Inc.

June 2023 - August 2023

- Worked with OneDrug Inc. on a medical platform web application that allows patient interaction with doctors via appointments, chatting and medication prescriptions. Utilized React for a dynamic and responsive front-end with a NodeJS backend.
- Delivered a customized video calling feature using Stream SDK on React and a live chat feature using socket.io.
