SUMMARY

Experienced in multiple programming languages, with a strong proficiency in JavaScript and Python. Demonstrated ability to develop interactive web applications, including a table tennis game in JavaScript and a form table for record entry. Proficient in Python for data analysis, including statistical analysis and data visualization.

EDUCATION

Bachelor of Science in Computer Information Systems, University of Houston; Houston, Texas

Expected Graduation Date: May 2024

SKILLS:

Programming Languages: Python, JavaScript, HTML, CSS, Java, C++, SQL

CERTIFICATION: AWS Cloud Practitioner (in progress)

PROFESSIONAL EXPERIENCE

Salesforce Quality Assurance Engineer intern - AMSYS

January 2024 - February 2024

- Developed comprehensive test plans outlining test objectives, scope, approach, and resources to ensure thorough testing coverage.
- Methodically executed 50 test cases per day, identifying and documenting software defects to enhance product reliability and functionality.
- Supported the project team in identifying and resolving technical issues, system glitches, and workflow challenges, ensuring the seamless progress of the project

Tax Consultant Summer - KSM Motor Fuels Tax Consultant

July 2023 - Dec 2023

- Managed the preparation and submission of U.S. Federal and State motor fuel tax returns, ensuring accuracy and meeting deadlines.
- Spearheaded the implementation and upkeep of advanced tax automation software and data analytics tools, significantly streamlining the preparation of tax returns and bolstering overall efficiency.
- Achieved 10% accuracy in gallon and general ledger reconciliations, streamlining audit exposure evaluation.

Software Engineering Intern - Omega 365

May 2023 - July 2023

- Created a front-end application that was a course plan using Javascript, HTML, and CSS for users to track their college courses
- Developed REST APIs to make CRUD actions and integrate with the front-end
- Developed and executed a comprehensive testing plan for Omega's cloud-based project management software, resulting in a 20% decrease in bugs and errors

Administrative Assistant - Javeria Enterprises Inc.

May 2021 - July 2021

- Conducted comprehensive research and analysis using Excel to identify trends and insights, resulting in a 15% increase in productivity and efficiency.
- Implemented an organized Excel-based system, reducing retrieval time for critical documents and files by 20%
- Operated a variety of office machines including check-cashing systems and computers, ensuring accurate financial transactions for over 200 clients daily without any errors or discrepancies.

RELEVANT PROJECTS

- Developed a full-stack app to store personal records, allowing users to add, edit, and delete information
- Designed and managed a functional SQL database for secure data storage and retrieval
- Created an advanced Excel application for efficient data analysis, featuring automated cleansing, pivot tables, and interactive visualizations, enhancing decision-making processes.
- Produced Entity Relationship Diagrams (ERDs) to visualize business requirements and system flow
- Developed a Python program utilizing concepts such as classes, dictionaries, and file input/output to manage student records.
- Created a table tennis game in JavaScript, HTML, and CSS
