WORK EXPERIENCE

Client: Bank Of America

Mar. 2025 – Present

Role: SDE III

Plano, TX

- Led migration of legacy Perl codebase to Python using **OpenAI** APIs, cutting project timeline by **67%** while ensuring accuracy and high code quality.
- Worked with product managers and platform teams to build a reliable Kafka streaming API, enabling ingestion and processing of large-scale data volumes with efficient persistence into Teradata for downstream analytics.

Client: Microsoft

June. 2024 – Feb. 2025

Role: SDE II

Remote, USA

- Developed delta file scanning logic for secrets and private keys in source code, reducing VM workload by **92%**.
- Reduced API latency by **37%** by introducing async task-based logging and notifications.
- Performed dump analysis identifying 3 critical patterns (deadlocks, race conditions, memory leaks) and resolved those preventing potential outages.

Client: Apple

Dec. 2023 – May. 2024

Role: SDE II

Austin, TX

- Engineered automation solutions including a FastAPI ACL service and Python-based AD group management reducing manual effort by up to **80%**. Enabling teams to focus on core product development.
- Strengthened system reliability and security by migrating sensitive data to secure vaults and deploying a health monitoring service, reducing down time by **30%**.

Client: Apple

Jan. 2022 – Dec. 2024

Role: SDE

Hyderabad, TS

- Worked on implementing several key Spring Boot APIs for provisioning service.
- Designed and implemented key microservices including notification service and approval service that the provisioning service relies on to complete its workflow.
- Developed ETL pipelines using python to sync Snowflake and PostgreSQL data.

Client: Macys

Jan. 2021 – Dec. 2021

Role: SDE

Remote, INDIA

- Enhanced real-time and batch data workflows by leveraging Kafka streaming, and fine-tuning SQL queries, improving reliability, reducing downtime, and aligning performance with business goals.

EDUCATION

KHIT (JNTUK)

Oct. 2020

Bachelor of Science in Computer Science

Guntur, IN

- Designed and implemented SafeShare, focused on solving secrets leak on screen share.
- Champions of the Inter-College Volleyball Tournament.

SKILLS & INTERESTS

- **Languages:** Python, Java.
- **Frameworks:** FastAPI, Flask, SpringBoot.
- **Databases:** Postgresql, Oracle, Snowflake.
- **Others:** Kafka, Apache Airflow, SQLAlchemy, Pandas, Numpy, PySpark, Microservices, REST API, Linux, Docker, Kubernetes, GitHub Co-pilot.
- **Tools:** Git, Postman, Swagger, Lens, VS Code, JIRA.
- **Interests:** Workout, Yoga, Volleyball, Traveling, Cooking.
