

KARTHIKEYAN TUMMA

Senior Data Analyst | USA | +1 689-248-1166 | tkarthik1166@gmail.com | [LinkedIn](#)

EXECUTIVE SUMMARY:

- Data Analyst with 5+ years of experience in healthcare, education, and finance domains, driving data-driven decision-making through predictive analytics, automation, and business intelligence.
- Skilled in Python, R, SQL, and BI tools like Power BI and Tableau, with a proven track record of improving operational efficiency, reducing costs, and enhancing reporting accuracy.
- Experienced in building and automating ETL pipelines, integrating over a million records, and developing dashboards impacting over 50,000 users.
- Adept at statistical modeling, machine learning, forecasting, and cloud data platforms, including Azure, Oracle Cloud, and AWS.
- Certified in Azure Data Science, Google Data Analytics, and Tableau Desktop with strong cross-functional collaboration and stakeholder engagement.

TECHNICAL SKILLS:

Data Analysis & Modeling	Predictive Modeling, Statistical Analysis, A/B Testing, Forecasting, Risk Modeling, Cost Optimization
Cloud & Big Data	Azure (ADF, Fabric, Azure ML), AWS (EC2, S3), Oracle Cloud (OIC, EPM), Hadoop, TensorFlow, Docker
ETL & Automation	Python, SQL, R, Oracle Integration Cloud, Data Cleaning & Validation
BI & Visualization	Tableau, Power BI, Smart View, OTBI, BI Publisher, Excel (Power Query, Tables), SPSS, SAS
Databases	SQL Server, Oracle, PostgreSQL, MySQL, MongoDB, MS Access
Programming	Python, R, SQL, VBA, Java, C, C++, JavaScript, Shell Scripting
Tools	GitHub, Jira, Postman, Wireshark, Visio, MS Office Suite

PROFESSIONAL EXPERIENCE:

Client: Resilience Inc., Tampa, FL

May 2025 – Present

Senior Data Analyst

Project: K-12 Social Emotional Learning (SEL) Program Analytics

- Analyzed adoption data for 10+ K-12 SEL programs using Python, R, and SQL, enabling data-driven funding and curriculum decisions.
- Designed and mechanized 5 ETL pipelines, integrating over 1M records in real time, reducing manual effort by 40% and improving data quality.
- Built 12 Power BI dashboards tracking engagement, mental health for 50,000+ students, uncovering trends, and cutting reporting time by 50%.

Environment: Python, R, SQL, Power BI, Azure Data Factory, Azure SQL, Tableau, ETL Pipelines, K-12 SEL Data, GitLab, Data Modeling, Real-Time Analytics

Client: Resilience Inc., Tampa, FL

Oct 2024 – Apr 2025

Financial Data Analyst

Project: Payroll & Workforce Compensation Dashboarding

- Analyzed 500K+ employee and payroll records with Python, R, and SQL, uncovering discrepancies and improving reporting accuracy by 30%.

- Built 10 Power BI and Tableau dashboards visualizing payroll and performance trends, cutting reporting time by 40%.
- Led 8 audits and performed statistical analysis on workforce compensation for 5,000 employees, reducing payroll errors by 20%.

Environment: Python, R, SQL, Tableau, Power BI, Payroll Systems, Audit Reporting, ETL Pipelines, Statistical Analysis, Workforce Compensation, Dashboards

Client: Morgan Stanley, Detroit, MI
Financial Data Analyst

Sep 2024 – Nov 2024

Project: Enterprise Financial Planning and Reporting

- Developed BI Publisher and OTBI reports to deliver real-time financial insights across business units.
- Automated data flows using Oracle Integration Cloud, reducing manual work by 40% and improving reporting cycle efficiency.
- Built forecasting models and dashboards using Oracle EPM and Smart View for executive financial reporting.

Environment: Oracle Integration Cloud (OIC), BI Publisher, OTBI, Oracle EPM, Smart View, Forecasting Models, Budgeting & Planning, Financial Dashboards

Client: Saint Louis University, MO
Data & Operations Analyst

Aug 2023 – Aug 2024

Project: Institutional Risk and Staffing Analytics

- Automated dashboards in Power BI and Excel, reducing manual reporting time by 35%.
- Created Key Risk Indicator trackers using Tableau, SQL Server, and SharePoint, improving risk reporting accuracy by 40%.
- Built Python and R forecasting models for staffing strategies, achieving 15% cost savings and SLA optimization.

Environment: Power BI, Excel (Advanced), Tableau, SQL Server, SharePoint, Python, R, Forecasting Models, SLA Metrics, Risk Reporting, Staffing Optimization

Client: Carelon Global Solutions, Hyderabad, India
Data Analyst

Dec 2020 – Dec 2022

Project: Policyholder Communication & Medicare Automation

- Led automation projects for policyholder communication, streamlining workflows by 45% through gap analysis and testing.
- Designed data warehouses and transactional databases using SQL Server and Teradata, improving Medicare accuracy.
- Developed HIPAA-compliant EDI validation scripts in Python and R; built Power BI dashboards boosting the Facets system efficiency by 40%.

Environment: SQL Server, Teradata, Python, R, Power BI, HIPAA, EDI Validation, Facets System, Data Warehousing, Healthcare Analytics

Client: Optum (UnitedHealth), Hyderabad, India

Jun 2019 – Nov 2020

Data Analyst

Project: Federal Health ETL Optimization & Compliance Reporting

- Built a scalable backend for federal health data warehouses, increasing data retrieval efficiency by 35%.
- Designed robust Azure Data Factory pipelines for full/incremental ETL loads, reducing runtime by 40%.
- Implemented disaster recovery across Azure storage, improving accessibility by 50% and backup success rate to 95%.

Environment: Azure Data Factory, Azure Storage, SQL, Python, ETL Framework, Federal Health Standards, Compliance Data, Disaster Recovery, Data Warehousing

Education

Saint Louis University, Saint Louis, MO, USA

Jan 2023 - Dec 2024

Master of Science in Data Analytics

Relevant Courses: Data Modeling, Data Warehousing, Project Management, Data Mining, Machine Learning

Birla Institute of Technology and Science (BITS), Pilani, India

Dec 2020 - Jan 2023

Master of Business Analytics

Relevant Courses: Advanced Analytics, Business Intelligence, Data-Driven Decision Making, Predictive Modeling

Bhavans Vivekananda Degree College, Hyderabad, India

Jun 2016 - Jun 2019

Bachelor of Science in Computer Science

Relevant Courses: Database Management Systems, Probability and Statistics, Linear Algebra, Calculus
