PROFESSIONAL SUMMARY

- Detail-oriented Data Analyst with hands-on experience in healthcare, business data, and reporting. Proficient in data analysis, data management, cleaning, record management, ETL, and dashboard development using Excel, SQL, Python, Tableau, and Power BI. Experienced with data pipelines, business intelligence, data governance, and supporting analytics-driven decisions in cross-functional teams. Strong foundation in data quality, resolving discrepancies, and transforming data into actionable insights.

EDUCATION

- **University at Buffalo** Buffalo, NY
Master of Science in Industrial Engineering Jan. 2024 – May 2025
- **BVRIT Hyderabad** Hyderabad, India
Bachelor of Technology in Information Technology Jun. 2019 – Jun. 2023

WORK EXPERIENCE

- **AR Innovations Ltd.** Hyderabad, India
Data Analyst Intern Jan. 2023 – Jul. 2023
 - Assisted in setting up automated data pipelines using AWS S3 and Athena for extraction and querying of over 10,000 records monthly, reducing manual report preparation time by 20% and improving data management and business intelligence support.
 - Contributed to building 5+ Power BI dashboards by integrating multiple data sources, supporting automated reporting processes and the visualization of 15+ KPIs for stakeholders.
 - Developed basic Python scripts for performing data validation and quality checks, which helped the team identify and resolve more than 100 data discrepancies in Excel and SQL files.
 - Collaborated with cross-functional team members to troubleshoot and resolve data issues using SQL, Excel, and cloud tools, ensuring timely delivery of 8+ monthly client reporting requests and supporting data governance practices.
 - Helped with data collection, cleaning, and basic analysis of over 5,000 records in SQL and Excel, applying data analytics and statistical techniques to provide operational insights to management.
 - Validated and corrected 50+ data inconsistencies per month, assisting in maintaining data integrity, quality assurance, and accurate reporting for business processes.
- **Sunesis Innovations Core. Tech Pvt Ltd** Hyderabad, India
Data Intern Dec. 2022 – May 2022
 - Assisted with the acquisition and electronic validation of over 2,000 records, and helped test 3 data transmission procedures, supporting process improvement and data governance.
 - Supported data entry and preliminary analytics projects for 5+ business units, and verified accuracy of 500+ electronic records to ensure data quality.
 - Helped optimize 10+ SQL queries and maintain 4 relational database tables, which led to a 15% improvement in reporting speed and business intelligence for the team.
 - Contributed to redesigning and normalizing 2 key database schemas, supporting improved data integrity and system scalability for up to 10,000 rows.
 - Assisted in developing 3 interactive dashboards in Tableau and Power BI, enabling KPI reporting and data visualization that cut reporting preparation time by 10%.

PROJECTS

- **Data-Driven Analysis of Low Patient Visit Rates Using CMS Hospital and Outpatient Data** (May 2025 – Jun. 2025): Used Tableau, Python, and data analytics to manage and clean large CMS datasets (>5,000 records), designed KPIs for hospital ratings and emergency services, and created interactive dashboards for stakeholder insights.
- **Customer Churn Prediction in Telecommunications** (Aug. 2024 – Dec. 2024): Applied R programming and machine learning models to analyze telecom records, preparing structured datasets and visual reports on churn trends for business users.
- **CitiBike Data Analysis (Urban Mobility Trends)** (Aug. 2024 – Dec. 2024): Cleaned and analyzed CitiBike trip records using Python and SQL, built simple predictive models for demand and provided actionable trend insights.
- **Smart Cart with Automatic Billing and Anti-theft** (Jan. 2023 – May. 2023): Supported development of an IoT-enabled smart cart system with automatic billing and anti-theft using embedded systems and basic data pipelines.

SKILLS

- **Data Analytics & Processing:** Data cleaning, transformation, profiling, validation, advanced Excel (VLOOKUP, Pivot Tables), data quality assurance, reporting, data integration, data pipelines, ETL.
- **Programming & Database:** Python (Pandas, NumPy, Matplotlib), R (dplyr, ggplot2), SQL (query optimization, normalization), Power Query, PL/SQL, relational databases.
- **Visualization & Reporting:** Power BI, Tableau, dashboarding, KPI/metrics reporting, MS PowerPoint.
- **Cloud & Big Data:** AWS S3, Athena, Azure Data Studio, cloud data pipelines.
- **Other Tech:** Git, Linux, Minitab, VBA, ETL tools, embedded systems (Arduino, ESP32).
