EDUCATION

Northeastern University, Khoury College of Computer Sciences, Boston, MA Sep 2023 – Dec 2025
Candidate for a Master of Science in Computer Science GPA: 3.9/4.0
Courses: Cloud Computing, Web Development, Database Management Systems, DSA, Mobile App Development, HCI

University of Mumbai, Mumbai, India Jun 2021
Bachelor of Engineering in Electronics and Telecommunication GPA: 9.31/10.0
Related courses: Object Oriented Programming, Structured Programming Approach

SKILLS

Languages & Frameworks: C#, JavaScript, TypeScript, Python, Java, .NET, Angular, React.js, Node.js, Express.js
Databases: Microsoft SQL Server, PostgreSQL, MySQL, MongoDB, Oracle, Redis
Cloud Native: Microsoft Azure, Amazon Web Services (AWS), Docker, Kubernetes, Azure DevOps
Tools: ServiceNow, Git, GitHub, Postman, Visual Studio, VS Code, IntelliJ IDEA, PyCharm, Android Studio, Figma

WORK EXPERIENCE

LTIMindtree (formerly Larsen & Toubro Infotech) – (Client: Chevron), Mumbai, India Jun 2021 – Aug 2023
Software Engineer

- **Migrated legacy .NET applications to .NET 6 APIs with Angular 15 and React 18** front-end on **Microsoft Azure** and **Amazon Web Services (AWS)**, achieving **zero downtime**, **60%** fewer outages, and **40%** performance gains.
- Designed and developed **RESTful APIs** and **intuitive UIs** in **React** and **Angular 12+** for enterprise **HR, Logistics** and **Finance** modules, serving **150,000+** users and boosting adoption by **20%**.
- Architected cloud-native **ASP.NET Core microservices** deployed via **Azure App Services** and **AWS ECS** using **Docker** and **Kubernetes**, reducing **cloud costs by 25%** and improving **reliability by 30%**.
- **Collaborated** with QA and release teams to implement **CI/CD** pipelines via **Azure DevOps**, enabling **smoother QA integration** and **halving** deployment failures, reducing deployment time by **40%** and **doubling** release cadence.
- Conducted **security audits** including **SAST/DAST** scans, remediated vulnerabilities, and enforced **SSO (MSAL)** and **RBAC controls**, enhancing data integrity and reducing risk exposure by **45%**.
- **Analyzed over 1M+ log events weekly** via **Azure Application Insights** and **AWS CloudWatch** to detect patterns, failures, and anomalies, reducing mean incident response time by **50%**.
- Progressively owned **Agile delivery cycles** across **3** product teams, **mentored 4 junior developers**, and elevated velocity by **20%** over **3** quarters.
- Piloted **GPT-3.5 integration** to **auto-generate** log summaries, alert insights, and documentation, reducing triage and onboarding time. **Established a reusable framework** adopted for future **LLM-powered** observability tools.
- Served as primary **24x7 technical point of contact** for **three business-critical** applications, orchestrating cross-departmental triage and mentorship to strengthen stakeholder confidence and sustain uptime.

PROJECTS

Kanbas - React.js, Node.js, MongoDB, Express.js

- Built a full-stack LMS inspired by Canvas with **React front-end**, **Node APIs**, and **Role-based access control (RBAC) with JWT**, enabling smooth course and discussion management.
- **Integrated OpenAI GPT APIs** for **personalized course suggestions** and **AI-assisted feedback**, increasing student engagement by **25%** and reducing instructor load.

ePayslip - .NET 6, Angular 15, MS SQL, MS Azure Cloud

- Spearheaded the migration of a legacy payroll system to a **modern three-tier architecture** using **.NET & Angular**, delivered **zero-downtime rollout** and **100%** data integrity.
- Enhanced performance by **40%**, **boosted UX for 150,000+** users through **responsive UI revamp**, increasing system adoption by **20%**, reducing payroll errors by **25%**, and automated workflows saving **200+ hours/month** across payroll operations—streamlining HR workflows and **reducing operational costs**.

HomiLoan - .NET Core, React 18, MS SQL, AWS

- Delivered the organization's first **end-to-end digitized** loan approval system, earning 'Most Innovative Project' recognition from senior leadership and influencing 2 future platform initiatives.
- Added **GPT-based FAQ assistant**, improved form validations using **Jasmine**, and reduced front-end support load by **30%**.
