

KARTIK TANEJA

Boston, MA | (857) 364 9195 | taneja.ka@northeastern.edu | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

EDUCATION

Northeastern University | Boston, MA

Expected Dec 2023

Master of Science in Information Systems | GPA: 3.46

Relevant Coursework: Data Structures & Algorithms, Web Design & User Experience, Cloud Computing, Database Management, Software Testing & Quality Assurance

WORK EXPERIENCE

Software Engineer – Alepo Technologies | Mumbai, IN

Jan 2023 - Dec 2023

- Architected and deployed cloud-native telecom billing solutions on AWS, implementing comprehensive test automation frameworks that reduced manual testing time by 70%
- Established CI/CD pipelines using GitHub Actions with integrated automated testing suites, improving deployment frequency by 60% and reducing production defects by 75%
- Developed automated testing scripts using Python and Selenium for end-to-end validation of telecom applications, ensuring quality across 1M+ concurrent user scenarios
- Collaborated with QA teams to design test strategies for microservices architecture, creating reusable test frameworks that accelerated testing cycles across 15+ customer projects

Software Engineer – Appnomic Systems | Bangalore, IN

Jun 2021 - Jan 2023

- Engineered automated testing and monitoring solutions using Python and Go, implementing test-driven development practices that reduced system defects by 50%
- Built and tested RESTful APIs using automated testing frameworks including JUnit and TestNG, ensuring 99.9% uptime for services handling 500K+ daily requests
- Created comprehensive test suites for security validation including IAM policies and data encryption, identifying and resolving critical vulnerabilities before production
- Mentored junior developers on testing best practices and automation frameworks, establishing team standards that improved code quality and reduced bug reports by 30%

ACADEMIC PROJECTS

Cloud-Optimized Content Delivery Platform

- Architected scalable CDN solution using AWS CloudFront, S3, and Lambda with comprehensive test automation suite reducing manual validation time by 65%
- Implemented Infrastructure as Code using Terraform with automated testing for infrastructure changes and deployment validation
- Developed monitoring and automated alerting system with CloudWatch, creating custom test scenarios achieving 99.95% availability SLA
- Built CI/CD pipeline with automated unit, integration, and performance testing using GitHub Actions for zero-downtime release

Distributed Metrics Collection with Test-Driven Development

- Designed container orchestration platform using Docker and Kubernetes with integrated test automation supporting 100+ microservices validation
- Configured GitOps workflow with ArgoCD including automated testing gates for deployment validation and rollback capabilities
- Implemented security testing frameworks including automated vulnerability scanning, RBAC validation, and penetration testing using custom scripts
- Developed automated performance and load testing suites with resource optimization validation, improving system reliability

Enterprise Cloud Migration Framework with Quality Assurance

- Created comprehensive test documentation and validation frameworks for enterprise cloud adoption, reducing post-migration issues by 40%
- Implemented automated cost and performance testing strategies, validating optimization improvements 35% cost reduction
- Built custom testing dashboards using Grafana and Prometheus for real-time infrastructure and application health monitoring

TECHNICAL SKILLS

- **Languages:** Python, Java, Go, JavaScript, SQL, C#, TypeScript, HTML, CSS
- **Testing & QA:** Selenium, JUnit, TestNG, Test Automation Frameworks, Test-Driven Development, Integration Testing, Performance Testing
- **Cloud Platforms:** AWS (EC2, S3, Lambda, RDS, CloudFormation), Azure, Digital Ocean
- **DevOps & Infrastructure:** Docker, Kubernetes, Terraform, Packer, CI/CD, GitHub Actions, Automated Testing Pipelines
- **Databases:** MySQL, PostgreSQL, MongoDB, Amazon RDS, DynamoDB
- **Frameworks:** React.js, Next.js, Node.js, Express.js, Angular.js, Redux
- **Monitoring & Security:** CloudWatch, Grafana, Kibana, Prometheus, IAM, SSL/TLS, Encryption, Security Testing
- **Development Tools:** VS Code, Git, Jira, Linux, Microservices Architecture, Bug Tracking Systems
