

ADITYA KATRAGADDA

PROFESSIONAL SUMMARY

Highly skilled Azure Data Engineer with nearly 4 years of hands-on experience designing, implementing, and optimizing data pipelines in cloud environments. Expert at leveraging Microsoft Azure tools, Apache Spark, Python, SQL, and the Hadoop ecosystem (HDFS, HBase, Hive). Strong problem-solving skills and attention to detail to deliver high-performance, scalable, and secure data solutions. Adept at driving cloud supply chain optimization and sustainability initiatives, resulting in significant cost savings and operational efficiencies. Seeking to leverage strong technical, interpersonal, and communication skills in a fast-paced environment for managing multiple tasks simultaneously.

CORE SKILL

Programming Languages:	SQL, Python, Pyspark
Data Processing Frameworks:	Apache Spark, Apache Hadoop
ETL Tools:	Azure Data Factory, Azure Databricks, SQL Server Integration Services (SSIS)
Storage:	Azure Data Lake Storage, Azure Blob Storage, HDFS
Relational Databases:	MySQL, PostgreSQL, Microsoft SQL Server, Azure SQL Database, Oracle DB
NoSQL Databases:	Azure Table Storage, HBase
Data Warehouses:	Azure Synapse Analytics, Snowflake
Data Models:	Entity-Relationship (ER) Model, Dimensional Data Model
Visualization Tools:	Power BI
Version Control:	Git
CI/CD:	Azure DevOps
IDE:	VS Code, SSMS, MySQL Workbench, PgAdmin
VM:	Azure Virtual Machine

PROFESSIONAL EXPERIENCE

Azure Data Engineer | CVS Health - Boston, MA **Jun 2023 - Present**

- Implemented data masking techniques to protect sensitive data across multiple data pipelines, ensuring compliance with regulatory requirements such as GDPR and HIPAA
- Designed Data pipelines using a Data Factory to perform incremental loading
- Implemented SCD Type-1 mechanisms using Databricks Notebooks
- Leveraged the PolyBase feature of Azure Synapse Analytics to load and query data from external sources
- Optimized and automated ETL processes for integrating data from multiple sources into data lakes and data warehouses
- Implemented Star and Snowflake schema models
- Oversaw and optimized data pipelines for improved data quality, reliability, and performance
- Collaborated with data scientists and analysts to translate business requirements into technical solutions

Azure Data Engineer | State Farm - Bloomington, IL **Feb 2023 - Jun 2023**

- Managed identity access management (IAM), creating and enforcing security policies to control data access and maintain data integrity across Azure resources
- Developed and managed ETL pipelines using Data Factory and Databrick, facilitating seamless data integration
- Enhanced database and data processing performance through partitioning, indexing, and caching
- Generated visualizations and reports in Power BI to support data-driven decision-making

Azure Data Engineer | TransDyne - Hyderabad, India **Aug 2019 - Jul 2021**

- Implemented ETL solutions using Apache Spark and Azure Data Factory for large-scale data processing
- Designed and implemented data models to support analytics and reporting needs
- Collaborated with cross-functional teams to understand business needs and deliver technical solutions
- Developed data solutions and ETL processes, ensuring data integration and quality

PROJECTS

Pharmacy Inventory Optimization System

Client: CVS Health

Technologies: Azure Data Factory, Azure Databricks, Spark, Azure Synapse Analytics, Azure SQL Database, Azure Data Lake Storage, Python, SQL, Azure DevOps

Accomplishments:

- Reduced stockout incidents by 30% by implementing real-time inventory tracking and predictive analytics
- Improved inventory turnover by 25% by optimizing replenishment processes through automated data pipelines using Azure Data Factory and enhancing data analytics with Azure Synapse Analytics, leading to more accurate demand forecasting and inventory management
- Automated inventory management processes, reducing manual intervention by 50% and increasing overall efficiency

Customer Interaction and Policy Insights Platform

Client: State Farm

Technologies: Azure Data Factory, Azure Data Lake Storage, Azure Databricks, HDFS, Spark, Power BI, Python, Azure Synapse Analytics

Accomplishments:

- Improved customer satisfaction scores by 15% by providing actionable insights into customer behavior and policy trends
- Increased query performance by 40% by optimizing data pipelines and using Hadoop's distributed storage
- Optimized policy offerings, resulting in a 10% increase in policy renewals and cross-selling opportunities

Transcription Data Management and Reporting System

Client: TransDyne

Technologies: Azure Data Factory, Azure Databricks, Spark, Azure Synapse Analytics, Azure SQL Database, Azure Blob Storage, Python, SQL

Accomplishments:

- Streamlined data processing, reducing data ingestion time by 40% through automated ETL workflows
- Increased reporting accuracy by 35% by implementing advanced data validation techniques
- Enhanced data accessibility and optimized storage costs by utilizing Azure Blob Storage tiers, ensuring that frequently accessed data is stored cost-effectively
- Optimized data processing costs by 20% by using Azure Synapse Analytics for high-performance analytics and Azure Blob Storage for cold storage, significantly reducing overall expenses

EDUCATION

Master of Science in Computer Science | Auburn University

Dec 2022

Bachelor of Science in Computer Science | Gandhi Institute of Technology and Science

Jul 2019

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate

Certification number: 25D9EM-9A7D4E
