

# KAUTIK SARIDEY

Fairfax, VA, 22030, United States

3464342346 |kautik0031@gmail.com

## Summary

Data Analyst with 3+ years of experience leveraging SQL, Python, and advanced visualization tools to transform complex data into actionable insights. Demonstrated ability in building interactive dashboards and automating processes for enhanced operational efficiency and strategic decision-making. Skilled in collaborating across functions to align data initiatives with business objectives, while continuously improving data practices and infrastructure.

## EDUCATION:

Master's in Management Information Systems-Campbellsville University-Louisville, KY (Aug 2022-May 2024)

Bachelor's in Computer Science-KL University Hyderabad (July 2018-March 2022)

## Core Skills

- **Data Visualization:** Tableau, Power BI
- **Microsoft Suite:** Excel, PowerPoint, Word
- **Programming Languages:** Python, R, SQL, Scala, Java, C
- **Data Engineering Tools:** DBT, ETL, Spark, HDFS, Sqoop, Glue, Redshift, Data Architecture
- **Data Analytics & BI:** Tableau, Power BI, Excel, Metabase
- **Cloud Technologies:** AWS (S3, EMR, Lambda, Redshift), Azure, Snowflake
- **Workflow & DevOps:** Git, GitHub, Docker, CI/CD, Shell Scripting
- **Statistical Methods:** A/B Testing, Regression, Hypothesis Testing, Data Governance, Data Pipelines, Data Quality Assurance
- **Soft Skills:** Communication, Attention to Detail, Critical Thinking, Business requirement gathering

## Work Experience

### Blue Health Intelligence

Sep 2024 - PRESENT

Data Analyst

Fairfax, Virginia

- Work closely with cross-functional teams including clinicians, administrators, and finance to collect, clean, and analyze patient care and operational data.
- Develop and maintain **Power BI dashboards** and **SQL-based reports** to track KPIs such as patient throughput, discharge efficiency, and appointment scheduling trends.
- Design automated data pipelines using **Python (pandas, NumPy)** and **Azure Data Factory** to optimize daily reporting workflows.
- Perform advanced **SQL querying** for large relational databases (Epic Clarity, Cerner, and Snowflake) to extract insights supporting quality-of-care initiatives.
- Supported compliance and audit-related data reviews.
- Apply **data validation and quality assurance** methods to ensure compliance with **HIPAA** and internal data governance standards.
- Support clinical research projects by providing cleaned datasets and developing predictive models for readmission and patient risk scoring.
- Collaborate with leadership to transform raw healthcare data into actionable insights that guide hospital operations and patient-experience strategies.
- Conduct ad-hoc analyses to support **budget forecasting, claims accuracy, and resource allocation decisions.**
- Partner with IT teams to enhance **data security and interoperability** between EHR systems and reporting environments.
- Present analytical findings to non-technical stakeholders through interactive visualizations and clear business summaries.
- Developed interactive dashboards and visual reports in Power BI and Excel to communicate usage trends, space occupancy, and peak hour congestion to senior stakeholders, enhancing decision-making efficiency by 40%.
- Automated manual data collection and reporting processes by building Python-based pipelines, significantly reducing weekly report generation time by over 10 hours and enabling more timely insights.
- ☐ Familiarity with **FINRA, SEC, and CAT** reporting frameworks for trade and compliance data.
- ☐ Experience building automation scripts using **VBA, PowerShell, or UiPath** to streamline data validation and reporting workflows.
- Partnered with data, trading, and compliance teams to ensure integrity of trade and transaction datasets.
- Collaborated with operations and IT teams to define KPIs and align data strategies with business objectives, achieving a 15% improvement in parking zone utilization and optimizing shuttle deployment during high-demand periods.
- Performed data cleansing and transformation on large, multi-source datasets to maintain data integrity and support advanced analytics and visualization efforts.

### EP SOFT

May 2021 - July 2022

Data Analyst

Hyderabad, India

- Collected, processed, and analyzed large datasets using **SQL** and **Python** to generate business intelligence reports supporting decision-making.
- Designed and automated **Excel** reports with pivot tables, Power Query, and advanced formulas to improve reporting speed and reduce manual effort.

- Developed workflow automations using Python and Excel macros to reduce manual review time. If you've used Power Automate or similar, note that as well.
- Partnered with data, trading, and compliance teams to ensure integrity of trade and transaction datasets..
- Worked with cross-functional teams to streamline audit and data validation workflows.
- Ensured accuracy of regulatory and operational data used for external reporting.
- Analyzed data discrepancies and exceptions to identify operational risks and support remediation efforts.
- Built and deployed **Power BI** dashboards to track key performance indicators (KPIs) for sales, marketing, and operations teams.
- Utilized **Python (pandas, NumPy)** and **R** for data cleaning, transformation, and statistical analysis to uncover business trends.
- Conducted **data validation and quality assurance** checks to maintain accuracy and reliability across multiple data sources.
- Partnered with cross-functional teams to translate business requirements into visual and analytical data solutions.
- Performed **A/B testing** and campaign-performance analysis to identify optimal marketing strategies.
- Optimized complex SQL queries and implemented indexing strategies, improving query performance by up to 30%.
- Supported data governance and compliance initiatives to ensure consistent data quality and integrity.
- Delivered actionable insights through interactive dashboards and executive summaries tailored for non-technical stakeholders.
- Assisted in the **migration of reporting systems** from Excel-based solutions to **Power BI** and **Snowflake**, modernizing analytics workflows.
- Collaborated using **GitHub**, **JIRA**, and **Confluence** under **Agile methodology**, contributing to sprint planning and progress reviews.
- Designed and built user interfaces with sections, harnesses, and portals to improve user experience.

## KATE TECHNOLOGIES

*Data Analyst Intern*

**Sep 2020 - Nov 2021**

*Hyderabad, India*

- Extracted, cleaned, and transformed raw datasets using **SQL** and **Python** for analytical and reporting purposes.
- Built and maintained **Power BI** dashboards and Excel reports to visualize operational and performance metrics.
- Automated recurring data processes using **Python (pandas)**, reducing manual reporting time by 30%.
- Collaborated with cross-functional teams to define KPIs and deliver actionable insights for business decisions.
- Conducted **trend and variance analysis** on application performance and customer behavior datasets.
- Ensured **data quality and consistency** by implementing validation checks and documenting data workflows.
- Streamlined workflows by implementing data-driven solutions, resulting in a 25% improvement in efficiency.
- Designed and maintained databases to ensure the accuracy and integrity of project-related information.
- Initiated the digital transformation of project and operational data, shifting from manual records to a centralized digital system, resulting in a 50% decrease in data entry errors and enhanced accessibility via implementation of Project Management software.
- Implemented dynamic dashboards and reports using tools like Tableau, Excel, and Power BI to facilitate real-time performance tracking and enhance stakeholder communication.

## KL University

*Teaching assistant/Mentor, Data analytics (Under HOD Data Science)*

**Aug 2019 - May 2022**

*Hyderabad, India*

- Conducted regular study sessions and office hours to address students' queries and reinforce their understanding of course content.
- Helped evaluate student progress by aiding in the grading of assignments and providing constructive feedback.
- Assisted faculty in developing and refining course materials, including lecture notes, assignments, and project guidelines, to enhance student learning.
- Collaborated with faculty and other peer mentors to create a supportive and engaging learning environment.

## Projects

### Smart Health Monitoring

- Developed a health monitoring system that collects real-time physiological data from wearable sensors and mobile apps
- Implemented the backend using Java Spring Boot, handling user authentication, API routing, and secure data storage in MySQL.
- Built a Python-based microservice that analyzes patient vitals using machine learning to detect anomalies and send alerts
- Integrated Java and Python services via RESTful APIs and containerized them using Docker for modular deployment.
- Created user roles for doctors and patients, allowing dashboard access to historical trends and health predictions.

**Technologies Used:** Java (Spring Boot, Maven), Python (Flask, pandas), MySQL, REST APIs, JSON, Docker, Postman, Swagger, Git, GitHub.

### Multi-Language Secure File Transfer System

- Designed and developed a cross-platform secure file transfer system combining Java for the user interface and Python for encryption services
- Built a desktop application using JavaFX to upload/download files, with secure authentication using JWT
- Developed a Python microservice for file encryption and decryption using AES-256 before transmission.
- Established RESTful communication between Java and Python components, enabling seamless file transfer with encryption.
- Implemented access control, logging, and error handling to ensure robust and secure file operations.

**Technologies Used:** Java (JavaFX, Swing, HTTP APIs, Socket Programming), Python (Flask, PyCryptodome), AES-256 Encryption, JWT, REST APIs, File I/O, Postman, Git, GitHub

## Certificates

- **Google Data Analytics Professional: Coursera.**
