SUMMARY:

Solutions-driven Data analyst with experience leading cross-functional teams in the development, documentation and delivery of process innovations and driving the attainment of business goals. Seek opportunities to transform company practices into fresh, cost-effective solutions leading to more efficient operations.

EDUCATION:

Texas A&M University, Commerce

Dec 2023

Master's in Business Analytics | GPA: 3.65/4.0

Visvesvaraya technological University

Dec 2017

B.S., Computer Science

TECHNICAL SKILLS:

Visualization: Tableau, Power BI

Languages: Python, SQL, PL/SQL

Tools: JIRA, AWS, Advanced Excel, SharePoint, MS Office, Jupiter Notebook

BUSINESS EXPERIENCE:

Innov IT, Dallas, USA

Business Analyst.

Feb 2024 – Present

- Write complex SQL and PL/SQL queries to extract, aggregate and transform data for report generation.
- Tuned query performance by optimizing SQL queries using different types of indexing and joins.
- Wrote technical papers, gathered technical requirements, and compiled them to help the design system.
- Assist the team and product owner to prioritize the User Stories/PBIs using prioritization techniques.
- Ensured regular updates to the Product sponsors, stakeholders with Metrics and Dashboards.
- Created and modified several database objects such as Tables, Views, Indexes, Constraints, Stored procedures, Packages, Functions and Triggers using SQL and PL/SQL.

Value Prospect Consulting, Noida, India

Business Analyst.

Dec 2017 – Nov 2021

- Owned business development and met 96% of deadlines by identifying and mitigating engineering roadblocks.
- Perform data cleansing and manipulation using NumPy and Pandas library.
- Developed Tableau dashboards for visualizing client demographics to increase business efficiency.
- Contribute to planning and review sessions and participate in status meetings with Business Users, Developers and QA (Quality Assurance) teams.
- Created Unified Modeling Language (UML) diagrams such as Use Case Diagrams, Activity Diagrams, Class Diagrams, navigational flows, story boards, UI specifications and Sequence Diagrams.
- Gathered functional and supplemental requirements, defined current and future state, use case documentation (as needed) for all assigned projects.

Academic Projects:

Machine Learning (EDA, Classification and Clustering) | Python: NumPy, Sklearn, Pandas, Matplotlib | **R:** caret, ggplot

- Developed kernel KNN classification algorithm from scratch, implemented different kernel distance measures and evaluated using k-fold cross validation on datasets from the UCI repository.
- Performed unsupervised learning, clustering techniques to generate a big picture model of weather at a local station using Texas weather data.
- Implemented Decision Tree using different impurity measures and achieved an F1 score of 0.96.

Database Management | SQL, ORACLE

- Developed a relational database for airlines and implemented complex SQL queries to serve business needs such as efficiently managing customers, schedule flights, find the busiest airports etc.

Exploratory Analysis of Olympic history | Python: NumPy, Sklearn, Pandas, Matplotlib

- Conducted Statistical exploratory analysis, aggregation, filtering, visualization, predictive modelling, and other descriptive operations using NumPy, Pandas, Seaborn and Matplotlib libraries in python on Jupiter notebook.
