

Kavishka Patel

Data Analyst

Location: IL | Mobile: (801)-228- 0078| Email: kavishkapatel498@gmail.com Visa: USC

SUMMARY

Data Analyst with 6 years of experience in developing and optimizing data pipelines, conducting advanced analytics, and delivering actionable insights to drive business outcomes in healthcare, finance, and retail sectors. Proficient in Python, SQL, R, and tools such as Apache Airflow, Pandas, and Scikit-learn, I have automated workflows, reducing processing times by up to 40% and saving organizations over \$2 million annually through cost reduction and fraud detection initiatives. Skilled in building interactive dashboards using Tableau, Power BI, and Plotly to visualize performance metrics, enhancing stakeholder decision-making.

SKILLS

Methodologies: SDLC, Agile, Waterfall, Process Optimization, Operations Efficiency
Language: Python, R, SQL, XML
IDEs: Visual Studio Code, PyCharm, Jupyter Notebooks, RStudio
Packages: NumPy, Pandas, Matplotlib, SciPy, Seaborn, Ggplot2, Plotly
Data Analysis & Visualization Tools: RStudio, RapidMiner, Tableau, Power BI, Excel, Google Data Studio
Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch, Amazon SageMaker
Cloud Platforms: AWS (Amazon Web Services), Google Cloud Platform (GCP), Azure
Big Data Technologies: Hadoop, MapReduce, Hive, Apache Spark, Pig, Databricks
Workflow Automation: Apache Airflow
Collaboration & Development Tools: Microsoft Teams, Anaconda
Database: MySQL, SQL Server, NoSQL (MongoDB, Cassandra), PostgreSQL
Analytics: Data Analysis, Data Cleaning, Data Wrangling, Relationship Management, Customer Support, Strategic Planning
Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving
Operating System: Windows, Linux

EDUCATION

Master of Business Administration, Management
DePaul University, Kellstadt Graduate School of Business, Chicago, IL
Bachelor of Science in Information Systems
University of Illinois at Chicago, Chicago, IL
Relevant Coursework: Business Statistics, Multivariate Analysis, Finance, Accounting, Spreadsheet Analysis, Operations Management, Intro to Business, Programming, Programming for Data Science, Business Database Technology, Business Data Mining, Business Forecasting, Competitive Strategy
Honors: UIC College of Business Dean’s List
Vice President of ISA (Indian Student Association)

EXPERIENCE

Cigna, IL | July 2024 - Current | Data Analyst

- Developed and optimized data pipelines using Python, SQL, and Apache Airflow to automate claims processing workflows, reducing processing time by 25% and improving operational efficiency.
- Conducted advanced data analysis using Pandas, NumPy, and SciPy to identify trends in healthcare claims data, enabling strategic planning for cost reduction initiatives that saved \$1.2M annually.
- Created interactive dashboards in Tableau and Power BI to visualize patient outcomes and provider performance metrics, enhancing stakeholder decision-making and supporting customer relationship management.
- Implemented machine learning models with Scikit-learn and TensorFlow to predict high-risk claims, improving fraud detection accuracy by 15% and supporting compliance teams.
- Leveraged AWS cloud services (S3, Redshift) and MySQL databases to manage and analyze large datasets, ensuring scalable and secure data storage for regulatory reporting.
- Collaborated with cross-functional teams via Microsoft Teams to align data analytics with business objectives, presenting actionable insights to senior leadership using Plotly visualizations.
- Streamlined data cleaning and wrangling processes using R and Jupyter Notebooks, reducing data preparation time by 30% for actuarial analysis.

PNC Financial Services, IL | Jan 2021 - July 2024 | Data Analyst

- Designed and executed SQL queries in PostgreSQL and SQL Server to extract customer transaction data, supporting risk assessment models that reduced loan default rates by 10%.
- Built predictive models using Python, Scikit-learn, and Keras to analyze customer credit profiles, improving loan approval processes and increasing revenue by \$800K annually.
- Developed data visualizations with Seaborn, Matplotlib, and Google Data Studio to track financial performance metrics, enabling executives to monitor portfolio health in real-time.
- Utilized Azure cloud platform for data storage and processing, integrating Apache Spark and Databricks to handle big data analytics for customer segmentation projects.
- Automated reporting workflows using Apache Airflow and R scripts in RStudio, cutting down manual reporting time by 40% for compliance and audit teams.
- Enhanced data quality through rigorous data cleaning and wrangling with Pandas and Excel, ensuring accuracy in regulatory submissions and customer analytics.
- Facilitated stakeholder collaboration using Anaconda and PyCharm for reproducible analyses, delivering presentations with critical thinking and communication skills to drive strategic initiatives.

Techno IT Solutions, Schaumburg, IL | Nov 2018 - Dec 2020 | Data Analyst

- Performed complex data analysis using R, Python, and SQL in Jupyter Notebooks to uncover insights from client datasets, driving a 20% increase in client retention through targeted recommendations.
- Developed custom visualizations using Ggplot2, Plotly, and RapidMiner to present market trends and consumer behavior insights, supporting client strategic planning and marketing campaigns.
- Deployed machine learning algorithms with PyTorch and Amazon SageMaker to forecast demand for client products, achieving a 12% improvement in inventory optimization.
- Managed big data workflows using Hadoop, Hive, and MapReduce to process unstructured datasets, enabling scalable analytics for retail and e-commerce clients.
- Designed NoSQL databases (MongoDB, Cassandra) to store and query high-volume transactional data, improving data retrieval speeds by 35% for real-time analytics.
- Automated data ingestion and transformation processes with Apache Airflow and Pandas, reducing manual effort by 50% and enhancing operations efficiency.
- Led client workshops to communicate analytical findings, leveraging presentation skills and Tableau dashboards to translate complex data into actionable business strategies.
