SUMMARY

System engineer with 3 years of experience in Oracle and MSSQL systems, skilled in all facets of database management, including installation, configuration, and performance tuning. Adept in Oracle and MS SQL server maintenance, security, backup, refresh, and recovery procedures, additionally I excel in troubleshooting, migrations and implementing HA/DR strategies. My collaborative approach and ITIL knowledge enhance team support and incident management.

WORK EXPERIENCE

Cognizant technology solutions, Bengaluru, India

Title: Sr System's engineer

Feb 2017 – Oct 2019

Client: **Payless and Polo Ralph Lauren**

The aim of these projects is to provide support in expanding needs of the retail operations, focusing on improving inventory tracking, customer behavior analysis, and sales forecasting. My role included designing and implementing a scalable database architecture, optimizing data flows, and ensuring high levels of data availability and security to support real-time analytics and decision-making processes.

- Managed Oracle (9i to 19c) and MSSQL databases in on-premises and Azure environments, overseeing lifecycle phases and daily administration tasks.
- Expert in performance tuning, report analysis, SQL query optimization and index analysis for Oracle and MSSQL databases.
- Conducted real-time troubleshooting, resolving performance bottlenecks, ensuring data integrity with backups and restores.
- Experience in migration, applying service packs, security updates and hotfixes as per the requirement for MS SQL Servers.
- Performed technical troubleshooting across software and hardware, consistently achieving positive feedback from end-users
- Utilized Unix Shell scripting for automating database backup, database health checks, monitoring tasks, and optimizing performance tuning processes reducing manual errors and increasing operational efficiency.
- Knowledgeable in networking fundamentals to assist with connectivity issues and infrastructure maintenance.
- Skilled in Python scripting to streamline data processing and automation tasks, enhancing operational efficiency.
- Established and enforced database security policies, managed user roles and privileges, ensuring compliance with data security and privacy standards enhancing the Identity and Access Management (IAM) structure within Oracle and MSSQL environments.
- Managed and resolved issues using ServiceNow, prioritizing them based on impact and urgency to maintain operational continuity
- Provided excellent customer support, helping them with technical questions and issues via email, chat.
- Delivered high-quality customer service and documentation, ensuring clear communication and issue resolution for diverse users.
- Demonstrated strong problem-solving abilities and customer-focused solutions, maintaining satisfaction and service quality.
- Documented key learnings and best practices to enhance team knowledge sharing and improve future support processes.
- Collaborated with cross-functional teams to improve system reliability and customer focus

TECHNICAL SKILLS

Languages:	PL/SQL, SQL, C, C++, Python, Shell
RDBMS:	SQL Server 2003 – 2016, Oracle 9i, 10g R1/R2, 11g R1/R2, 12c, 19c
Operating Systems:	Linux, AIX, and Windows
Tools/Utilities:	Oracle Management server, MSSQL Server, SSMS, SSRS, Microsoft Azure, AWS RDS, RMAN, OEM, Data pump, VMware, SQL*Loader, Avamar, AWR and ASH reports, PowerShell, SQL profiler, ServiceNow(ticketing)

CERTIFICATION

Microsoft certified: Azure Data Fundamentals

EDUCATION

Visvesvaraya Technological University
Bachelor of Engineering in Computer science

(2012 – 2016)
