Work Experience

VNS Health | New York City, USA

June 2025 – August 2025

Product Management Intern

- Enabled data-driven decision-making by implementing Pendo Analytics, building dashboards, and launching guides that cut page time by 10% on a digital health assessment form
- Cut completion time in the hospice referral form by 15% by analyzing field usage in Pendo, streamlining redundant fields, and ensuring alignment between technical teams and business stakeholders to release a new form
- Led product discovery to replace the outreach team's Excel system with a digital form; bridged stakeholder communication, defined requirements, wrote a PRD and user stories, and cut completion time by 15%
- Analyzed impact of an ML-driven mortality risk model by evaluating an AI summary feature; demonstrated a 10% reduction in clinician page time by streamlining verification

Diaza Sportswear LLC | New York City, USA

January 2025 – April 2025

Marketing and Data Analytics Intern

- Generated market insights from social and web data to refine campaigns, boosting brand reach and engagement
- Generated and shared dashboards, reports, and KPIs for the e-commerce website using Google Analytics; identified root causes of declining sales leads and drove a 15% increase

Amin Machinery Private Limited | Vithal Udyognagar, India

May 2021 – August 2021

Project Management Intern

- Managed eight project lifecycles in a fast-paced environment, boosting efficiency by 15% through planning, prioritization, and stakeholder coordination
- Directed resource optimization and risk anticipation to cut project costs and improve on-time delivery by 15%
- Utilized MS Project to create Gantt charts and apply Critical Path Method (CPM) for defining project timelines and optimizing task scheduling
