

KAVYA MUNIYUR LAKSHMINARAYANA

Chicago, IL | 312-545-7792 | kmuniyurlakshminaray@hawk.illinoistech.edu | [LinkedIn: Kavya](#) | [Github](#)

EDUCATION

Illinois Institute of Technology, Chicago, IL	Anticipated Dec 2025
Master of Computer Science, GPA 3.9	
Relevant Coursework: Advanced Database Organization, Information Retrieval, Machine Learning, Bigdata Technologies.	
MVJ College of Engineering, Bangalore, KA	July 2023
Bachelor of Engineering, Computer Science, GPA 3.72	
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Organization and architecture.	

SKILLS

- Programming Languages:** Java, Python, C++, JavaScript, HTML5, CSS3.
- Frameworks and Libraries:** React.js, Next.js, Spring Boot, Hibernate, Flask, Bootstrap, JPA, NumPy, Pandas, Seaborn, Scrapy.
- Databases and cloud:** MySQL, PostgreSQL, MongoDB, DynamoDB, AWS.
- Tools:** IntelliJ IDEA, NetBeans, Bitbucket, Git, REST APIs, JSON, Linux, Kafka, Swing, JavaFX.

PROFESSIONAL EXPERIENCE

Teaching Assistant – Software Project Management (CS587)	May 2025 - Present
Illinois Institute of Technology, United States of America	
- Graded Agile, scheduling, and quality metric assignments and projects for 20+ students. - Explained virtual labs and assignment expectations on estimation, risk management, and planning. - Clarified student doubts on SEI CMM, resource allocation, and development process models. - Enhanced engagement by connecting academic content with real-world project management practices.	
Software Engineer Intern	August 2022 - January 2023
Airobosoft, India	
- Supported development of a Java Swing inventory system, reducing stock discrepancies by 30% through automated tracking. - Integrated MySQL to centralize product, supplier, and transaction data, cutting errors and improving access speed by 40%. - Designed an intuitive user interface that streamlined staff workflow and reduced training time by 50%. - Implemented real-time analytics to monitor demand trends, improving sales forecasting accuracy by 25%. - Built dynamic dashboards with live KPIs (inventory levels, order queues, supplier metrics), accelerating order fulfillment by 20% and improving inventory cycle times by 15%.	

PROJECTS

Real time Analysis of Stock market	April 2025
Developed a real-time stock analytics pipeline using Python, Apache Kafka, and AWS, streaming data for 7+ companies via the yfinance API. Ingested over 10,000 stock records using a Kafka Producer and stored them in DynamoDB through a Python-based Consumer. Deployed the system on AWS EC2 with Zookeeper coordination, achieving sub-second latency for data insertion and querying. Performed real-time analytics and visualized 2 years of stock trends using pandas and seaborn in Google Colab.	
Web Based Search Engine	October 2024
Created a web-based search engine with a modular Crawler, Indexer, and Query Processor using Scrapy, Flask, and Scikit-learn. Enabled custom crawling (500+ pages, 10+ depth), and constructed an inverted index for 10,000+ documents using TF-IDF and cosine similarity. Supported JSON-based free-text queries with 90% accuracy. Handled 500+ HTTP requests with sub-second response times.	
Task Management System	June 2024
Developed a web-based Task Management System using Java and Spring Boot to streamline task creation, assignment, and progress tracking, increasing team productivity by 35% through centralized task workflows. Enhanced backend efficiency by integrating Hibernate and JPA, enabling consistent and rapid retrieval of 1000+ task records. Implemented automated deadline alerts and progress dashboards, improving task completion rates by 25% and reducing project delays.	
Kindra – Crowdfunding Platform for Verified Charities	January 2024
Identified gaps in transparency and security in donation platforms; developed a full-stack system to support verified charitable campaigns with KYC, secure payments, and efficient media handling. Built and deployed the platform using Java, Spring, Oauth2, Postgres, reduced media upload time by 50%, and enhanced donor trust with fraud-resistant verification workflows.	

VOLUNTEER EXPERIENCE

Student Success Coach	August 2024 – Present
Provided academic and career guidance to a caseload of 25 students through personalized coaching, progress monitoring, and collaborative support to enhance success and retention.
