

Kavya Samanthapudi | Business Data Analyst

NJ, USA | +1 (656) 201 0706 | ksamanthapudii@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Business Data Analyst with 3.5 years of experience delivering **data-driven insights** to improve **decision-making**, streamline **operations**, and enhance **customer experience** across the **insurance**, **finance**, and **technology sectors**. Skilled in analyzing **business processes**, identifying **gaps**, and translating complex **requirements** into actionable strategies. Adept at building **executive-facing reports** and **dashboards** that influence **strategic planning** and operational improvements. Experienced in **cross-functional collaboration**, gathering **stakeholder requirements**, and supporting **Agile project delivery**. Recognized for driving **process efficiencies**, improving **retention rates**, and standardizing **reporting practices**. Passionate about using **data analysis** to solve real **business problems**, support **product enhancements**, and contribute to **organizational growth**. Proven track record of balancing **analytical thinking** with **business acumen** to deliver high-impact results in **fast-paced environments**.

TECHNICAL SKILLS

Programming & SQL:	Python (Pandas, NumPy), SQL (Joins, CTEs, Window Functions), Jupyter Notebooks
Data Analysis:	EDA, KPI Tracking, Forecasting, Data Wrangling, Ad Hoc Reporting, A/B Testing, Root Cause Analysis
ETL & Data Management:	ETL Pipelines, Data Integration, Data Cleaning, CSV/JSON/Parquet Handling
Cloud & Big Data:	AWS (S3, RDS, Redshift, Athena, Data Pipeline), Google BigQuery
BI & Visualization:	Tableau, Power BI, Looker, Excel (Pivot Tables, VLOOKUP, Power Query), Microsoft Office
Business Analysis:	Requirements Gathering, BRD/FRD Documentation, GAP Analysis, Stakeholder Communication
CRM & Tools:	Salesforce, HubSpot, CRM Tools, JIRA, Confluence
Agile & Collaboration:	Agile/Scrum Methodologies, Sprint Planning, User Stories, Cross-Functional Teams
Version Control:	Git, GitHub
Soft Skills:	Critical Thinking, Communication, Business Acumen, Data Storytelling, Presentation Skills

PROFESSIONAL EXPERIENCE

Allstate, NJ, USA Aug 2024 – Current

Business Data Analyst

- Developed and automated end-to-end **ETL workflows** using Python (Pandas, NumPy) and AWS (S3, Redshift, Athena), streamlining data ingestion processes and cutting manual reporting effort by 60%.
- Designed and deployed interactive dashboards in **Tableau** to track KPIs for underwriting, claims, and customer service teams, accelerating data-driven decision-making.
- Conducted exploratory data analysis (EDA) and statistical testing to evaluate the impact of customer experience initiatives, supporting a 12% uplift in retention rates.
- Defined and documented complex business logic in **SQL** (joins, CTEs, window functions) to support ad hoc requests and standardized reporting across multiple departments.
- Facilitated requirements gathering sessions with product owners, translating stakeholder needs into detailed **BRDs, FRDs, and user stories** for the engineering team.
- Created executive-facing reports combining business and technical insights, enhancing quarterly review meetings with clear data storytelling and actionable recommendations.
- Coordinated with data engineering, QA, and compliance teams during sprint cycles to ensure proper data validation, deployment readiness, and regulatory compliance.

Hexaware Technologies, India

Mar 2021 – Dec 2022

Data Analyst

- Built advanced SQL queries and reusable scripts to transform raw datasets into insightful reports for operations, marketing, and finance departments.
- Processed and standardized complex files (CSV, JSON, Parquet) using Python, improving data quality and reducing data cleaning time by 35%.
- Migrated legacy reporting infrastructure to **Google BigQuery** and **AWS Redshift**, improving query performance and scalability for enterprise dashboards.
- Created automated dashboards using **Looker** and **Excel (PivotTables, VLOOKUP, Power Query)** to visualize sales performance, forecast trends, and reduce manual workload.
- Integrated data from **Salesforce and HubSpot**, producing customer journey reports that identified high-conversion segments and optimized the sales funnel.
- Engaged cross-functional teams to align KPIs and metrics definitions, supporting consistent reporting standards across the organization.

R-Financial, India

Jan 2020 – Feb 2021

Business Analyst

- Gathered and documented functional and non-functional requirements through interviews, workshops, and workflow analysis, producing detailed BRDs, SRS, and use case diagrams.
- Conducted **GAP analysis**, process mapping, and root cause analysis to support system improvements that reduced SLA violations and enhanced turnaround times.
- Created dynamic KPI dashboards and data models to monitor financial metrics and operational risk indicators, increasing visibility for senior leadership.
- Supported UAT by defining test cases, validating data outputs, and coordinating with QA teams to ensure deliverables met business needs.
- Delivered concise data insights and business recommendations to stakeholders using visualization tools and slide decks, contributing to a 15% increase in efficiency across teams.

- Collaborated with developers and QA analysts in Agile sprints to ensure timely delivery of data-driven features and business logic enhancements.

EDUCATION

Masters in Computer Science (STEM) Pace University, New York City, NJ	Dec 2024
Bachelors in Electronics and Communication Engineering Institute of Aeronautical Engineering, India	Aug 2021

CERTIFICATION

Google Data Analyst Certified | JP Morgan & Co. Agile Certified
Tableau Certified | Model United Nations Human Rights Organizer

PROJECTS

- COVID-19 Vaccine Distribution Optimization**
- Simulated vaccine demand across various geographic regions using **Python (Pandas, NumPy)** and **SQL**, integrating public health datasets to model supply chain needs under uncertainty.
 - Designed and implemented a **predictive distribution model in Tableau**, reducing vaccine wastage by **20%** through optimized delivery scheduling and cold chain management.
- Customer Churn Analysis for Subscription Service**
- Performed **cohort analysis and segmentation using SQL**, identifying churn triggers such as inactivity periods, usage drop-offs, and support ticket frequency.
 - Developed a **predictive churn model using logistic regression** and visualized key churn drivers in **Power BI**, enabling targeted retention strategies that led to a **15% increase in customer retention**.
- Sales Performance Dashboard for Retail Chain**
- Built an interactive **Power BI dashboard** using hypothetical retail data to visualize KPIs such as sales by region, product category, and period, enabling easy drill-down for store managers.
 - Conducted **trend and comparative analysis** across multiple stores and regions, which improved **sales forecasting accuracy by 25%** and informed promotional strategy adjustments.
- ETL Pipeline for Financial Reporting**
- Designed and developed a distributed **ETL pipeline** using **Apache Spark for data transformation**, **Airflow for orchestration**, and **SQL** for structured storage and aggregation of multi-source financial data.
 - Integrated **Power BI for real-time financial dashboards**, reducing manual reporting effort by 40% and enhancing **decision-making speed and accuracy** for finance teams.
