Experience

Unilever

Sales Operations Analyst

Karachi, Pakistan

Aug 2023 – June 2025

- Developed Power BI reports to monitor distributor's special orders & end stocks using SAP & DMS, ensuring compliance with supply forecasts and maintain optimal stock cover days & inventory levels. Supported ad hoc reporting for LT business reviews.
- Planned and validated weekly replenishments & secondary targets allocation for 400+ distributors across 11 geographies.
- Managed distributor's credit balances and invoicing to support daily dispatch planning. Assessed credit exposure & resolved order holds with O2C, Logistics, AR & Finance due to limit breaches & bounced payments, ensuring maximum order fulfillment.
- Created Power BI dashboards using DAX measures and Power Query Editor to monitor sales KPIs, returns, dispatch rate & On-Time delivery losses, ensuring a DR above 90%, by sourcing data from SAP & Datalake to support informed decision making.
- Handled SKU cost changes in the system, ensuring data integrity & timely communication to stakeholders.
- Managed and validated distributor claims at the national level, along with DSR incentives based on performance metrics. Expedited and reconciled payouts, and assisted with audit reconciliations. Created ageing reports.
- Acted as a key liaison for territory teams & customers, managed customer relationship and resolved day-to-day operational & system queries & escalations. Handled user profiling & onboarding documentation, ensuring data integrity across systems.
- Collaborated with cross-functional teams to implement a CRM for automating daily operational tasks, reducing TAT by 50%. Designed workflows, budget working, requirement gathering, optimized processes, define SLAs, conduct UAT & train end-users. Translated business needs into technical requirements by coordinating between functional and technical teams.
- Monitoring of Trade Promotion scheme utilization & effectiveness using Power BI & DMS. Supported category and territory teams in executing new launches and related activities across territories and distributions.
- Led territory planning initiative supporting GTM strategies, resulting in ~90 tonnes of additional monthly volume growth.

Safety Data Analyst

Feb 2023 – July 2023

- Led end-to-end deployment of a generative AI solution to shift from reactive to predictive decision-making. Managed requirements, vendor coordination, UAT, issue resolution, stakeholder communication, and user training materials/sessions.
- Created Power BI dashboards to monitor key safety metrics using SQL and Power Query & identifying recurring incident trends and root causes, sharing insights with leadership, contributing to an 80% reduction in violations through targeted policy.
- Responsible for collecting, cleaning, analyzing, and standardizing data for a fleet of 450+ functional vehicles through recurring EDA from various sources such as databases, SharePoint, and internal safety portals.

Dolmen Group – DREM

Karachi, Pakistan

HR Intern – Data Visualization

Aug 2022 – Oct 2022

- Transferred employee data from SharePoint files to Tableau, reducing time in manual data consolidation. Created interactive dashboards to address HR leadership's specific inquiries and monitor KPIs. Implemented alerts to maintain data integrity.
