SUMMARY

Full Stack Developer experienced in developing and deploying web applications using React.js, Django, Node.js and TypeScript. Skilled in integrating RESTful APIs and optimizing user interaction for improved application performance in Agile environments. Successfully contributed to projects showcasing expertise in web solutions and automated CI/CD pipelines for efficient development workflows. Aiming to apply technical skills to drive innovative full-stack web application development.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, JavaScript, TypeScript, SQL, Node.js, FastAPI, Express.js, React.js, Angular
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Artificial Intelligence and Frameworks:** Gen AI, Prompt Engineering, LLM, ML, NLP, DL, AI Automation, Langchain, LangGraph
- **CI/CD & DevOps:** GitHub Actions, Jenkins, GitLab CI
- **Tools:** Visual Studio Code, Eclipse IDE, Jupyter Notebook, STS, Postman, Jira, Jenkins
- **Cloud & Infrastructure:** Fundamentals of AWS (Lambda, S3, API Gateway, IAM), Azure (Basic), Docker, Terraform
- **Version Control:** Github, Gitlab
- **Frontend Technologies:** HTML, CSS, JavaScript, React.Js, Angular.Js, Next.Js, Vue.Js
- **Development Practices:** RESTful APIs, Microservices, Agile/Scrum, Unit Testing

PROFESSIONAL EXPERIENCE

Saint Louis University

Aug 2024 - May 2025

Student Worker

- Collaborated on multiple full-stack web applications as part of academic coursework, executed with full adherence to industry-standard software development practices.
- Participated in Agile Scrum processes including sprint planning, daily stand-ups, and client review meetings to simulate real-world project environments.
- Engaged in regular client calls with faculty and project stakeholders to gather requirements, provide updates, and refine solutions.
- Developed and deployed applications using React.js and Django, implementing responsive UIs and secure backend APIs.
- Used Git for version control, conducted peer code reviews, and contributed to shared documentation and delivery pipelines.

Blast Back Studios LLC

Jun 2024 - Sep 2024

Software Engineer Intern

- Designed and implemented multiple RESTful APIs using TypeScript and the Fastify, providing robust support for user management, authentication, and authorization.
- Collaborated closely with cross-functional teams to ensure the smooth deployment of new features and optimize the overall application performance.
- Participated in Agile ceremonies, sprint reviews, and handled CI/CD integration with GitHub Actions.

DBS Tech

Jul 2022 - Jul 2023

Backend Application Developer

- Developed features for the Paylah application, including reward transactions, special credit card functionalities, and EnaaS services.
- Acquired expertise in microservices and backend development by working on complex projects, leading to improved system architecture and performance
- Created new APIs for various application features, improving data integration and user experience
- Contributed to implementation of automated testing and CI/CD pipelines, reducing deployment time and increasing the reliability of software releases.

Persistent Systems

May 2021 - Jul 2022

Project Intern

- Developed frontend components using React.js, enhancing the project's user interface and contributing to a more responsive design
- Designed dynamic and user-friendly interfaces, improving user interaction and experience.
- Integrated RESTful APIs with frontend components for seamless data flow and interaction.
- Applied Agile methodology and virtual DOM concepts to streamline project workflows, enhancing team efficiency and project delivery
- Collaborated with the QA team to identify and resolve critical bugs, improving system stability

EDUCATION

Saint Louis University

Master of Sciences, Artificial Intelligence

- GPA: 3.57

Aug 2023 - May 2025

Saint Louis

PROJECTS

TutorQuest AI

- Developed a full-stack AI web app that generates personalized learning plans, recall notes, and adaptive quizzes using LangChain, OpenAI, React, and FastAPI.
- Integrated MongoDB for user-specific progress tracking and secured the platform with JWT-based authentication.
- Designed an interactive UI with Tailwind CSS, enabling topic breakdown, smart scheduling, and resume-based interview prep features.

Full Stack web app for SaamCars LLC | <https://www.saamcars.com>

- Built and deployed a full-stack web app for SaamCars LLC to showcase and manage car inventory using React, TypeScript, and PostgreSQL.
- Implemented JWT authentication, responsive UI, and protected admin routes for secure access.
- Collaborated with the team to deliver client requirements and currently integrating a payment system.

AV's Right-of-Way Decision making System

- Built a full-stack simulation system using Python, YOLOv5, React.js, and OpenCV to help autonomous vehicles make real-time right-of-way decisions.
- Detected vehicles, pedestrians, and traffic signs from real-world datasets and applied rule-based logic for movement decisions.
- Designed a frontend dashboard for scenario visualization and integrated video stream processing via OpenCV.

Automated AI FeedbackSystem Using LLM

- Built a full-stack web app using FastAPI (backend) and React.js (frontend) to deliver real-time, AI-generated feedback on student answers.
- Integrated Unsloth LLaMA with custom prompt engineering to evaluate free-form responses based on academic rubrics.
- Designed an intuitive UI for students to submit answers and receive structured, educational feedback instantly.
- Implemented backend text preprocessing and input validation to ensure model accuracy and fairness.
- Worked closely with the Dean of Computer Science to align AI feedback with grading standards.
- Enabled self-corrective learning, reducing manual grading time and enhancing the learning experience.

A Fullstack Web Application for FFFA Football

Association in Saint Louis

- Developed a full-stack web app using React.js, Node.js, and MongoDB to manage teams, schedules, and live match data.
- Built dynamic UI components for player RSVPs, score tables, and match highlights.
- Integrated RESTful APIs to enable real-time updates and admin-side content management.
- Followed Agile practices and implemented responsive design for mobile accessibility.

PUBLICATIONS

- Enhancing Telecom Customer Retention: Question Answering System Using Natural. accepted at International Business Analytics Conference (IBAC) 2025.
- Advanced Predictive Modeling Approaches Language Processing. Published in VOL. 4 NO. 12 (2021) IJRESM on Dec 12, 2021

CERTIFICATIONS, PARTICIPATIONS, & VOLUNTEERING

- **Certifications:** Programming for Everybody, Object-Oriented Programming using Python (Coursera); DevOps Foundations, Microservices (LinkedIn Learning); DevNet Associate (CISCO); Application Developer Onboarding Certification, Data Management Framework (DBS Learning Hub).
