

KEERTHANA GAJARI

201-589-9111 | gajari.keerthana1407@gmail.com | github.com/Gajari-keerthana | linkedin.com/in/gajarikeerthana

Data Science graduate student with expertise in statistical analysis, predictive modeling, and data visualization. Hands-on expertise in Python, SQL, and cloud platforms (AWS, Azure) design scalable data solutions and deliver insights. Experienced in handling large datasets, building machine learning models, and developing dashboards for decision support. Strong collaborator with the ability to translate technical results into clear, business-focused insights.

TECHNICAL PROFICIENCIES:

- **Programming Languages:** Python, R, SQL, PostgreSQL, C#, Node.js, Java, HTML, CSS, Javascript
- **Data Analysis & Visualization:** Excel, Exploratory Data Analysis (EDA), Tableau, Power BI, Looker, Quick, Matplotlib
- **Frameworks & Libraries:** Flask, React, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, OpenCV, Agile Methodologies
- **DevOps & Tools:** Linux, ETL, Git, CI/CD, Hadoop, Snowflake, Apache Spark, GCP, AWS, Azure, Appium, Selenium, A/B Testing
- **Technologies & Architectures:** Machine Learning, Data pipelines, Linear Algebra, Statistics, Deep Learning

WORK EXPERIENCE:

I-RAY IT Solution | Hyderabad, India

January 2023 - November 2023

Automation Test Engineer

- Develop a C# automation framework using SpecFlow, NUnit, and POM, enhancing test scalability, maintainability, and code reuse. Streamlined automation processes to reduce manual effort and improve overall testing efficiency.
- Automat real-device Android testing with Appium, integrating Appium Inspector & UI Automator Viewer for element inspection and debugging. Boosted test reliability and accelerated defect detection in mobile applications.
- Design and execute BDD test cases in SpecFlow (Gherkin syntax), enabling clear, human-readable scenarios. Improved collaboration between QA, developers, and business stakeholders in Agile/CI/CD environments.
- Implemented SpecFlow hooks in C# to manage test setup, teardown, and environment configuration. Reduced test flakiness, ensured stable execution, and maintained clean environments across runs.
- Enhanced test reporting and analysis with ExtentReports, LivingDoc, and ADB commands. Delivered interactive dashboards, streamlined debugging, and reduced analysis time by over 25%.

Wipro | Hyderabad, India

March 2018 - October 2018

Associate Risk Analyst

- Led investigations into fraud cases and implemented risk mitigation strategies, cutting losses by 20% and strengthening fraud controls. Leveraged data-driven analysis to detect anomalies, minimize risks, and enhance transaction security
- Analyzed and enforced fraud risk policies and procedures, ensuring 100% compliance with regulatory standards. Partnered with compliance, legal, and product teams to improve prevention in high-risk transactions.
- Led initiatives to close fraud detection gaps and enhance monitoring controls, improving detection accuracy by 30%. Reduced false positives through advanced risk modeling, data validation, and automated rule optimization.
- Orchestrated weekly meetings with cross-functional teams, including legal and product, presenting emerging fraud trends and aligning strategies to mitigate risks, resulting in 15% fewer high-risk transactions.
- Supported management in creating strategies for emerging fraud patterns and evolving threats. Adapted detection frameworks in challenging environments, achieving a 25% faster detection rate.

PROJECTS:

Student Support Chatbot – Python Build Project | The Build Fellowship by Open Avenues

May 2025

- Designed Python-based chatbot using Tkinter and OpenAI GPT for 24/7 student support, implementing decision-tree logic for intents like login/enrollment issues with LLM responses and fallback escalation, reducing resolution time by 25%.
- Initiated decision-tree logic for intents like login issues and enrollment status, with fallback escalation to live agents.
- Integrated LLM-powered responses for complex queries, enhancing user experience.

Tax and Payment Tracking System | Data Science Engineer

May 2024

- Developed a Python (Flask) and SQLite-based system for small businesses, implementing RESTful APIs for CRUD operations.
- Built an interactive web UI with HTML, JavaScript (jQuery), featuring advanced filtering and real-time tax calculations.
- Created a real-time tax summary dashboard, reducing manual effort by 30% through automated updates.
- Utilized GitHub for version control and collaborated in an Agile development workflow.

CAMPUS/ COMMUNITY SERVICE:

- **RAISE 2025 (Rutgers AI Competition):** Won as part of a team developing an NLP/LLM-driven sentiment analysis tool using DeepSeek, Cohere, and TextBlob for predictive analytics in real-world applications.
- **Google Data Analytics Certification:** Completed Coursera certificate, mastering Excel, SQL, Python, R, and Tableau.
- **JS Techdays at Swecha:** Organized at Swecha by managing event logistics, scheduling talks, and mentoring 20+ participants.
- **Medical Camp Leader:** Managed registration for monthly camps, analyzing patient data to guide future strategies.

EDUCATION:

Montclair State University | Montclair, NJ

December 2025

Master of Science (MS) in Data Science | **GPA:** 3.7/4.0

Jawaharlal Nehru Technological University | Hyderabad, India

May 2017

Bachelor of Technology (B.Tech) in Computer Science and Engineering | **GPA:** 3.5/4.0
