

KEERTHI BACHAWALA

Data Analyst | Power BI | SQL | Azure | Marketing & Healthcare Analytics
Atlanta, GA | (334) 394-8319 | hckeerthi4@gmail.com | [LinkedIn](#) | [Hacker rank](#) | [GitHub](#)

SUMMARY

- Data Analyst with over 3+ years of experience in digital marketing analytics, ETL workflows, and automation, optimizing data-driven decision-making.
- Proficient in SQL, Python, Azure Data Factory, Snowflake, and PySpark, managing 5+ TB of unstructured and structured data and automating data pipelines.
- Developed interactive dashboards in Tableau, Power BI, and Salesforce, providing real-time insights into ad performance, audience engagement, and campaign optimization.
- Collaborated with cross-functional teams, implementing data governance strategies and driving a 10% increase in campaign success rates through data-backed insights for media planning and ad spend efficiency.

EDUCATION

Auburn University at Montgomery Master of Science, Computer Science	Jan 2023 – Dec 2024 Montgomery, Alabama
CMR Technical Campus Bachelor of Technology, Computer Science	Jun 2016 - Apr 2020 Hyderabad, India

SKILLS

- | | |
|---|---|
| • Programming & Scripting: | Python (Pandas, NumPy), SQL |
| • Data Analytics & Visualization: | Tableau, Salesforce Analytics, Power BI, |
| • Database Management: | SQL (MySQL, PostgreSQL, Azure SQL Database), Snowflake |
| • ETL & Data Processing: | Azure Data Factory, Azure Synapse Analytics, ETL Pipelines |
| • Big Data & Cloud Technologies: | Azure Databricks, Azure Data Lake Storage, PySpark, AWS (S3, EC2, Lambda) |
| • Data Governance & Quality: | Data Cleaning, Data Validation, Data Governance Standards |
| • Digital Marketing Analytics: | Google Ads, Facebook Ads, Media Buying Optimization |
| • Business Intelligence & Reporting: | KPI Tracking, Campaign Performance Analysis |

EXPERIENCE

McKesson Data Analyst	GA, USA Mar 2025 - Current
• Conducted comprehensive data analysis on healthcare and pharmaceutical datasets using SQL and Python (Pandas, NumPy) to support patient outcomes, operational efficiency, and inventory optimization. • Created interactive dashboards and real-time visualizations in Power BI to monitor key performance indicators including prescription fill rates, patient adherence, and supply chain efficiency. • Applied statistical methods such as descriptive analytics, regression analysis, and hypothesis testing to uncover trends in medication usage, improve risk assessment, and support compliance initiatives. • Automated data aggregation and reporting tasks through Python scripting and advanced Excel (VLOOKUP, PivotTables, Macros), reducing manual effort and improving data delivery turnaround by 40%. • Collaborated with cross-functional teams—including business, clinical, and compliance units—to define data requirements and deliver actionable insights through stakeholder-ready presentations and reports. • Maintained high standards of data accuracy and consistency, supporting internal audit processes and ensuring alignment with HIPAA and GxP regulations. • Supported development of data dictionaries, performed data validation, and contributed to data governance efforts to improve trust and usability of enterprise-wide data assets.	

MediaMint Data Analyst	Hyderabad, India Jan 2021 - Dec 2022
• Built and maintained interactive dashboards in Tableau and Salesforce, delivering actionable insights into digital campaign performance, ad spend efficiency, and audience engagement, achieving a 98% client satisfaction rating by aligning insights with marketing objectives. • Conducted data-driven analysis to optimize ad delivery, audience targeting, and media buying efficiency using SQL databases with over 5 TB of storage, identifying trends that contributed to \$6M in revenue generation for clients through enhanced campaign ROI. • Collaborated with cross-functional teams (creative, sales, and operations) to provide data-backed insights from Azure Databricks processing 10 TB of structured and unstructured campaign data, supporting media planning, and achieving a 15% increase in campaign performance success rates. • Managed SQL databases enabling rapid retrieval of ad performance metrics and client reporting, ensuring seamless functionality and data quality across all reporting systems for real-time campaign optimization. • Engineered data pipelines using Azure Data Factory to automate the integration of ad platform data (Google Ads, Facebook Ads), maintaining reliable data flow and supporting collaboration with clients for timely decision-making. • Developed data governance standards for over 100 datasets, ensuring accuracy and compliance in campaign analytics, which led to a 90% improvement in team proficiency through data-driven training sessions on analytics tools for ad operations staff. • Executed data cleaning processes to eliminate inaccuracies in datasets processed via Azure Synapse Analytics, enhancing reporting	

systems and facilitating accurate, comprehensive analysis for campaign forecasting and client deliverables.

- Optimized ETL workflows with Azure Data Factory across more than 50 data sources, including ad networks and DSPs, reducing processing times and uncovering key insights that improved digital ad workflow efficiency.
- Redesigned data infrastructure using Azure Functions and Azure Data Lake Storage for scalability, automating manual processes in campaign tracking to enhance performance and manage client expectations as an indicator of quality.
- Applied Azure SQL Database and Cosmos DB to optimize storage and retrieval for over 1 million ad impressions and click data, ensuring data accessibility and supporting effective communication with clients on campaign results.
- Built and optimized more than 10 data pipelines using PySpark and Azure Databricks, enhancing processing efficiency for real-time ad performance data and achieving sustainable, production-ready solutions for media operations.
- Engineered over 5 scalable data models in Snowflake, improving query performance for campaign analytics and enabling seamless integration with BI tools, which mapped to client requirements and enhanced team satisfaction.
- Developed robust ETL workflows using Azure Factory to automate ingestion and transformation of media data, ensuring high accuracy and consistency, leading to a significant increase in the adoption of analytics systems by marketing teams.

MediaMint

Hyderabad, India

Data Analyst Intern

Sep 2020 - Jan 2021

- Designed and maintained complex SQL queries for data extraction, transformation, and reporting, ensuring efficient data retrieval and analysis.
- Configured and fine-tuned Snowflake Virtual Warehouses to enhance query performance while maintaining cost efficiency and scalability.
- Partnered with cross-functional teams, including data analysts, engineers, and business stakeholders, to develop data-driven solutions supporting strategic decision-making.
- Coordinated in managing and optimizing 3+ ETL pipelines, automating workflows to improve data processing speed and reliability.
- Conducted data quality monitoring on 50,000+ records, identifying inconsistencies and implementing data cleansing strategies to ensure accuracy and completeness.
- Facilitated 5+ partner data imports and integrations, validating data integrity and resolving discrepancies to maintain consistency across systems.
- Deployed Power BI dashboards at MediaMint displaying key media metrics, ROI trends, and audience insights, enabling clients to make data-driven decisions and improving the adoption of analytics tools across internal and external teams.

Trigent Software

India

Data Analyst Intern

Jan 2020 - Sep 2020

- Systematized transformation, data extraction, and loading (ETL) processes with Python scripts, improving pipeline efficiency and reducing manual work across monthly data operations.
- Pruned complex SQL queries to retrieve and manipulate data from relational databases, enhancing the speed and accuracy of report generation for timely business insights.
- Streamlined data analysis and reporting tasks with Excel models, incorporating advanced functions like Pivot Tables, VLOOKUP, and Macros, automating repetitive tasks and improving weekly workflows.
- Monitored Oracle databases to ensure high availability and reliability, implementing regular backups and disaster recovery procedures to minimize downtime and data loss.
- Secured sensitive data within PostgreSQL databases by applying access controls, encryption, and validation measures, maintaining data integrity, and protecting over 1,000 GB of data from unauthorized access.
- Leveraged Pandas for data aggregation and filtering, manipulating large datasets to uncover actionable insights and support business functions.
- Conducted A/B testing to assess the impact of changes on key metrics, providing data-backed recommendations that upgraded conversion rates and user engagement.

PROJECTS

Python – Predicting App Ratings on Google Play Store using Jupyter Notebook.

- Cleaned and preprocessed a dataset of 10,000+ apps, handling missing data and transforming features with 95% accuracy in data cleansing.
- Delivered actionable recommendations that could increase ratings by 10-15% for apps with optimization efforts. Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.

Power Bi Dashboard Restaurant Performance Analysis and Insights (Zomato App): – ([PowerBi Dashboard](#))

- Constructed a comprehensive Power BI dashboard to analyze restaurant performance, track key metrics, and provide actionable insights for optimizing operations and profitability.
- Analyzed the Global Analysis of Restaurant count, Average Cost, and Average App Ratings.
- Designed interactive visuals, including sales heatmaps, KPI cards, and performance charts, enhancing insights delivery by 20%

Tableau Dashboard Sales Comparisons by Region: – ([Tableau Dashboard](#))

- Analyzed Pandas, NumPy, and Regex to clean and preprocess messy datasets, reducing inconsistencies and missing values by 30%.
- Automated data standardization pipelines with Python scripts, ensuring data for reporting and business analytics.
