

KEERTHI KALYAN BOTU

Full Stack Developer

Chicago, IL | +1 (779) 276-7730 | keerthikalyan922@gmail.com | [LinkedIn](#)

SUMMARY

- **Full Stack Developer with 5 years of experience** building scalable web applications across academic, enterprise, and financial domains.
- Built backend services using **Java, Spring Boot, ASP.NET MVC**, and frontend interfaces with **React.js**, supporting APIs handling **10M+ transactions** and **1,000+ concurrent sessions**.
- Managed **CI/CD pipelines** with **Git, Jenkins, and GitHub Actions**, applying **TDD, Agile**, and structured **SDLC** practices to ensure stable delivery cycles.
- Developed **microservices** using **AWS Lambda, Docker, and Kubernetes**, with **JWT-based authentication** and **role-based access control**.
- Worked with **MySQL, PostgreSQL, MongoDB, and GraphQL**, delivering performant data models for both relational and NoSQL workloads.
- Debugged production defects, reviewed code for quality assurance, and supported deployments across **3+ production environments**, improving system reliability and delivery speed.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer | McKesson | USA

July 2025 – Current

- **Engineered** scalable microservices using **Java (Spring Boot)** and **PostgreSQL**, optimizing data pipelines that supported **10M+ monthly transactions** with improved reliability across core health systems.
- **Developed** responsive front-end modules with **React.js** and **TypeScript**, delivering **15+ reusable components** that enhanced user workflows and **cut onboarding time by 4 days** for internal teams.
- **Automated** CI/CD workflows using **GitHub Actions, Docker, and Jenkins**, streamlining production releases across **3 live environments** and **reducing deployment errors by 70+ incidents per quarter**.

Graduate Teaching Assistant | Northern Illinois University | USA

January 2024 – June 2025

- Led **over 16 Java and Data Structures labs**, guiding 40+ students in implementing algorithms and logical structures, enhancing their understanding of core programming concepts.
- Reviewed and assessed **100+ GitHub assignments weekly**, applying detailed rubrics and code validation, resolving 15–20 IDE and logic issues to ensure high-quality submissions.
- Redesigned and updated **2 course modules**, incorporating new content and 5 coding exercises on recursion and memory management, resulting in improved student submission quality and deeper conceptual understanding.
- Facilitated a **series of interactive code walk-through sessions**, demonstrating Java backend workflows, debugging techniques, and real-time execution paths for over 40 students.
- Collaborated **with faculty** to develop engaging course material, including additional coding exercises, quizzes, and resources to complement the textbook and refine the learning experience.
- Monitored and tracked **student progress**, offering feedback and support to ensure 100% participation in lab exercises, fostering an active learning environment.

Senior Systems Engineer | Infosys Ltd | India

June 2022 – July 2023

- Spearheaded the **design and implementation of ASP.NET MVC backend modules**, enhancing **performance** across **3 enterprise platforms** and automating **configuration routines**, saving **60 engineer-hours** during onboarding.
- Mentored **5 junior engineers** by reviewing **architecture patterns**, debugging **application logic**, and enforcing **modular code structure**, leading to faster delivery of **8 internal releases**.
- Integrated robust **validation logic** for **100+ pull requests** using **unit test suites** and structured **review guidelines**, ensuring consistent **build integrity** across **distributed development teams**.
- Troubleshooted and resolved **critical system failures** in **C# and Java**, addressing **15–20 recurring defects weekly** and stabilizing **transaction workflows** across **3 enterprise systems**.
- Built **reusable logic modules** covering **sorting algorithms, memory allocation, and recursive operations** to elevate **backend services** used in **2 client-facing applications**.
- Streamlined **deployment processes** and coordinated **system rollouts** across **3 live environments**, ensuring stable integration with **zero downtime** for **40+ active users**.
- Standardized **engineering workflows** by developing **ASP.NET MVC templates**, eliminating **80+ lines** of repetitive setup logic and reducing **onboarding time** for new developers.
- Provisioned **automated CI/CD pipelines via Jenkins and Git**, supporting integration tests and release validations across code branches, reducing deployment time by **3 days**.
- Directed **performance optimization initiatives** by **profiling resource usage** and improving **query execution paths**, reducing **average response time** across **4 APIs** by **2 seconds**.
- Fostered **cross-functional collaboration** with **product managers, UX designers, and solution architects** to integrate **10+ feature enhancements** into **backend modules** aligned with **business requirements**.

Assistant Systems Engineer | Tata Consultancy Services | India

February 2021 – May 2022

- Engineered **Java backend modules** for **3 academic fee-processing workflows**, incorporating **data validation** and **business logic** to maintain uninterrupted system access across **core applications**.
- Launched **RESTful APIs** handling over **2 million monthly transactions**, integrating **frontend-backend layers** to enable

- real-time operations on **2 enterprise platforms**.
- Enhanced response efficiency by refactoring backend logic and optimizing service calls, reducing API latency from **8 to 3 seconds** across **5 high-traffic modules**.
- Diagnosed **500+ production issues** using **log tracing, JVM profiling**, and code-level diagnostics, improving platform stability and supporting faster sprint delivery through peer collaboration and mentoring of **2 junior developers**.
- Orchestrated batch scheduling workflows using **Java** and **SQL triggers** to automate **daily reconciliation of 150,000+ fee records**, eliminating manual oversight and ensuring data consistency across **3 payment portals**.
- Integrated exception-handling logic within **RESTful API layers**, capturing and logging over **1,200 edge-case scenarios** across **2 enterprise applications**, leading to quicker root cause detection and reducing escalations during business-critical hours.

- Software Developer | Dell Technologies | India****December 2019 – January 2021**
- Designed a **data management system** using **ASP.NET MVC** to manage **50+ financial product records**, optimizing controller workflows to cut query time by **3 seconds** per request.
 - Integrated **auto-search, pagination, and DOM rendering** enhancements for **1,000+ records** via Razor views and query filters, reducing page load time from **10 to 2 seconds** under variable user load.
 - Composed backend documentation and configured deployment steps, accelerating intern onboarding by **4 days**, while managing task tracking and code commits in **JIRA** across **12 sprint cycles**.
 - Constructed database indexing logic using **SQL Server** and **LINQ queries** to optimize access across **1,000+ financial product entries**, decreasing search response time during internal audits by **4 seconds per transaction**.
 - Drafted unit test cases for **15 backend modules** using **MSTest** and **debug logs**, detecting **20+ logic errors** during development and improving build stability throughout **3 internal code reviews**.

- SKILLS**
- Languages:** Java, JavaScript, TypeScript, Python, C#, C++, HTML5, CSS3
 - Frontend:** React.js, Angular, Razor Views, AJAX, DOM Manipulation
 - Backend & Frameworks:** Spring Boot, ASP.NET MVC, Node.js, Express.js
 - Databases:** MySQL, PostgreSQL, MongoDB, SQL Server
 - Web & API Technologies:** REST APIs, GraphQL, JWT Authentication, Axios, JSON, XML, HTTP
 - DevOps & Cloud:** Docker, Kubernetes, Jenkins, GitHub Actions, AWS Lambda, Azure
 - Tools & Platforms:** Git, Postman, Visual Studio, IntelliJ, Linux, Jira
 - Testing Tools:** MSTest, Jest, Cypress, Selenium
 - Development Practices:** Agile, SDLC, TDD, SOLID Principles, Design Patterns, Code Reviews, System Design
 - Security & Compliance:** XSS, CSRF, Accessibility Standards

- PROJECT**
- E-Learning Platform**
Spring Boot, React.js, MySQL
- Architected a full-stack **e-learning platform** using **Spring Boot, React.js**, and **MySQL**, delivering **role-based access** for **students and instructors** with **10+ course modules** and support for **1,000+ interactive sessions** under secure **JWT authentication**.
 - Configured backend **RESTful APIs** in **Spring Boot** to manage **course enrollment, quizzes**, and **sessions** for **3 user tiers**, enabling real-time backend operations.
 - Implemented a responsive **React.js** frontend with **state management, routing**, and **form validation**, optimizing UI across **5 device types** and supporting **1,000+ user records** in **MySQL**.

- EDUCATION**
- Northern Illinois University | USA**
Master's in computer science | 3.9/4

BML Munjal University | India
Bachelor's in computer science | 7.57/10
- August 2023 – May 2025**

August 2016 – May 2020
