SUMMARY

Software Developer with extensively experienced in design, development and implementation of software applications using Java, J2EE technologies. Having good expertise in complete Software Development Life Cycle (SDLC) in Software Analysis, Design, Development, Implementation and Web based Enterprise Applications. Professional experience in using Core Technologies like Java, J2EE, Servlets, JSP, Custom tags, JDBC, JavaBeans, JavaScript, HTML, XML, Web Services, Apache Kafka. Experience in working with Angular modules, services, templates, directives, services and dependency injection to create a SPA. Competent in Core Java API, Exception Handling, Multi-threading, Synchronization, Serialization, Collection's framework. Worked with lambda expressions, Java Stream API, Java Time API, Exceptions, parallel operations on collections and for effective sorting mechanisms and many such Java8 features. Experience in Version Control tools like GitHub and SVN for Source Code version management and defect tracking tools like Clear Quest, Quality Center. Experience in implementing and to manage continuous delivery systems and methodologies on AWS. Proficiency in programming with different IDEs like Eclipse IDE, Visual Studio. Sufficient experience of working with and testing on operating systems such as Windows, UNIX. Performed unit testing using JUnit. Followed Agile Scrum methodology and have strong knowledge of End-to-End Agile (SCRUM) Methodologies. Excellent analytical, problem solving, challenging work, communication, and interpersonal skills with ability to interact with individuals at ease.

EXPERIENCE

Full stack Developer

Mercury Financial

June 2022 - Till Date

- Involve in analysis, specification, design, and implementation and testing phases of Software Development Life Cycle (SDLC) and used agile methodology (SCRUM) for developing applications.
- Work with OOP Concepts, Collections Framework, and Exception Handling, I/O System, Multi-Threading, JDBC, Generics which combine to form the core java concepts.
- Use Spring Boot framework for building cloud Microservices and to develop Spring based applications radically faster with very less configuration and responsible for developing the sequential and conditional batch jobs using the Spring batch framework.
- Involve in doing peer review of code before merging in target branch
- Design and develop the application using Angular 12 framework along with HTML5, CSS3, Typescript, Java Script, Bootstrap.
- Deployed applications into Continuous integration environments like Jenkins to integrate and deploy code on CI environments for development testing.
- Perform bug tracking and Unit Testing using JUnit.
- Use JIRA tool for Issue/bug tracking, monitoring of work assignment in the system and using GitHub as code repository.
- Participate in all aspects of agile software development, including design, implementation, and deployment.
- Architect and provide guidance on building end-to-end systems optimized for speed and scale.
- Work primarily in Ruby, Java/ JRuby, React, and JavaScript
- Engage with inspiring designers and front-end engineers and collaborate with leading back-end engineers to create reliable APIs.
- Collaborate across time zones via Slack, GitHub comments, documents, and frequent video conferences.

Software Developer

Edward Jones

Oct 2020-June 2022

- Involved in analysis, specification, design, and implementation and testing phases of Software Development Life Cycle (SDLC) and used agile methodology (SCRUM) for developing applications.
- Experience in OOP Concepts, Collections Framework, and Exception Handling, I/O System, Multi-Threading, JDBC, Generics which combine to form the core java concepts.
- Implemented Java EE components using Spring MVC, Spring IOC, Spring transactions and Spring security modules.
- Created RFP (Request for Proposal) microservice to provide RESTful API and RAML utilizing Spring Boot with Microservices.
- Used Spring Boot framework for building cloud Microservices and to develop Spring based applications radically faster with very less configuration and responsible for developing the sequential and conditional batch jobs using the Spring batch framework.
- Designed and developed the application using Angular 12 framework along with HTML5, CSS3, Type Script, Java Script, Bootstrap.
- Testing and production support of core java based multithreading ETL tool for distributed loading XML data into Oracle database using JPA/Hibernate.
- Development of cloud hosted web applications and REST APIs using Spring Boot with embedded Tomcat.
- Tested Rest APIs in Spring-Controller at backend for JSON data using Postman and Swagger.
- Creation of database objects like tables, views, materialized views, procedures and packages using oracle tools like Toad, PL/SQL Developer and SQL* plus.
- Deployed applications into Continuous integration environments like Jenkins to integrate and deploy code on CI environments for development testing.
- Performed bug tracking and Unit Testing using JUnit.
- Used JIRA tool for Issue/bug tracking, monitoring of work assignment in the system and used GitHub as code repository.

EDUCATION

Master of Science in Computer Science

Texas A&M University

Bachelors in Electronics and Tele Matic's

G. Narayanamma Institute of Technology and sciences

SKILLS

Java, J2EE, Servlets, JSP, Custom tags, JDBC, JavaBeans, JavaScript, HTML, XML, Web Services, Apache Kafka

Angular modules, services, templates, directives, services and dependency injection

Core Java API, Exception Handling, Multi-threading, Synchronization, Serialization, Collection's framework, lambda expressions, Java Stream API, Java Time API, parallel operations on collections

Git, SVN, Clear Quest, Quality Center, AWS

Spring Boot, Spring batch framework, Angular 12 framework, HTML5, CSS3, Typescript, Java Script, Bootstrap, Jenkins, JIRA, JRuby, React

Eclipse IDE, Visual Studio, Windows, UNIX, JUnit, Agile Scrum methodology, End-to-End Agile (SCRUM) Methodologies, OOP Concepts, Collections Framework, and Exception Handling, I/O System, Multi-Threading, JDBC, Generics, Spring MVC, Spring IOC, Spring transactions, Spring security modules, RESTful API, RAML
