Summary

- Data analyst with 4 years of experience in data analysis, data cleansing & quality, and data visualization.
- Experience working in the Public Health, Sales, and Marketing domains.
- Proficiency in handling sensitive healthcare data, including PII and PHI.
- Skilled in building and maintaining ETL pipelines using SSIS to automate data integration.
- Expert in SQL-based query optimization for data modeling, data extraction, and manipulation.
- Operational and dynamic reporting experience using SSRS and Power BI.
- Knowledge of Python, Oracle, and cloud databases on AWS and Azure.

Experience

Data Quality Analyst, State of Nevada - Carson City, NV

Jan 2024 - Mar 2025

- Responsible for analyzing and reporting immunization data quality at the Division of Public and Behavioral Health.
- Maintained PHI and PII data in collaboration with 2000+ medical providers, including CVS, Walgreens, and Costco Pharmacy, while adhering to HIPAA regulations and IG standards.
- Built and tested ETL workflow scripts for cleansing, transforming, validating, and integrating immunization data across staging and production environments using SQL and manual QA checks.
- Led troubleshooting activities in ETL and implemented corrections to enhance data quality in an agile environment.
- Monitored data pipeline logs to identify errors and performance bottlenecks, reducing the failure rates by 40%.
- Authored SQL scripts for preparing monthly and ad-hoc reports on immunization timeliness, completeness, and data accuracy of the providers.
- Developed 30+ standardized reports and dashboards on Power BI, including KPIs for management and automated feedback reports using Power Automate.
- Debugged reporting errors caused by SQL joins, aggregation mismatches, and inaccurate field mappings.
- Developed data quality and vaccine order tracking reports on WebIZ (Statewide immunization records) using Power BI.
- Actively used SSRS features to generate paginated reports with scheduled delivery and built parameterized reports featuring filters and drill-downs.
- Maintained documentation for data processes and issue escalation procedures, and regularly communicated findings to the Health Program Manager.

Python Developer, Technology Square - Remote, NJ

May 2023 - Jan 2024

- Development of frontend client-server enterprise applications using Python libraries like pandas, matplotlib, and HTML.
- Working with core AWS deployment tools like Docker, Kubernetes, and MySQL database.
- Utilized Amazon EC2 for application hosting and S3 to securely store static files and data assets.
- Writing and reviewing requirements, test plans, test cases, designs, and documents.

Software Data Analyst, RAAM Group - India

May 2017 - Feb 2019

- Responsible for design, development, and testing of relational and procedural database code for data migration projects.
- Used Relational Databases such as MySQL, and Oracle to analyze raw data and build into meaningful data.
- Authored SQL scripts to create and modify tables, implement business rules, and define data relationships.
- Practiced Agile methodologies and provided additional information to the scrum master as needed.

Data Analyst Intern, BSNL - India

April 2015 - May 2015

- Examine structured and unstructured data from multiple disparate sources and visualize data findings using Power BI.

Skills

Coding Language: Python, SQL, T-SQL, C#

Database: MySQL, MS SQL Server, Oracle, MS Access

Tools and Frameworks: Power BI, Tableau, Excel, dbt, AWS, Azure, Databricks

Education

Master's in computer science

Jan 2021 - Dec 2022

California State University, Fullerton

Bachelors in Electronics and Communication Engineering

Sep 2013 - May 2017

Kakatiya University, India
