SUMMARY

Computer Science graduate with hands-on experience in **full-stack application design** and **UI/UX-focused front-end development** using **HTML5, CSS3, JavaScript, TypeScript, React, Bootstrap, Vue.js, Node.js, npm, yarn and MySQL**. Real-time experience as an Associate Software Engineer at **DXC Technology**, contributing to **UX migration**, front-end enhancements with interactive **UI components**, **RESTful API integration**, database management, and Java backend optimization. Proficient in programming languages including Java, C/C++, and Python, with a strong foundation in data structures, algorithms, and Agile collaboration. Passionate about building scalable, **user-centered applications** with clean, efficient code.

EXPERIENCE

DXC Technology, India

Jun 2022 – Feb 2023

Associate Software Engineer | Java Full Stack Developer

- Contributed to the **UX migration** of Starr's Workers' Compensation web application, improving accessibility and performance.
- Developed interactive modal screens using **HTML, CSS, JavaScript and Java** ensuring enhanced user experience with **interactive UI components**.
- Participated in all stages of the **SDLC**, collaborated with the team on requirements gathering, **design discussions**, development, testing, and deployment for seamless project execution.
- Assisted in identifying and resolving minor performance bottlenecks in **SQL queries, Front-End and Java backend services**.
- Worked with SQL for database queries and basic data manipulation to support backend functionality.
- Supported **debugging** and **unit testing efforts**, contributed to issue identification and resolution, ensuring optimal application performance and **user experience**.

SKILLS

- Methodologies:** SDLC
- Programing Languages:** C/C++, Java, Python, SQL, JavaScript
- Front-End:** HTML5, CSS3, JavaScript
- Frameworks/Libraries:** React.js, Node.js, Vue.js, Bootstrap
- Databases:** MySQL, MongoDB
- API:** RESTful API integration, Client-Server communication
- Tools:** GitHub, Visual Studio Code, Eclipse, Netlify
- Concepts:** Data Structures, DBMS
- Soft Skills:** Problem-Solving, Team Collaboration, Debugging & Troubleshooting

ACADEMIC PROJECTS

- Web-Database Application | Vue.js, Node.js, HTML, CSS, JavaScript, GitHub, Netlify**

Built a **responsive full-stack cloud-based web application** with dynamic **UI components** and integrated **REST APIs**. Used **npm and Yarn** for efficient package management and build processes and **MongoDB** for database. Deployed the front-end on **GitHub, Netlify** and integrated with a custom **Node.js** server to enable real-time data display and seamless **client-server interaction**, focusing on performance and **user experience**.

- Pet Adoption Management System | MySQL, SQL**

Implemented a relational database management system using **MySQL** for real-time data retrieval and transaction control with **ER diagrams**, normalized schemas, and automated processes using SQL scripts, joins, views, and triggers. Optimized database performance with indexing and transaction control, **showcasing strong skills in database design** and real-world data management.

- Multi-Agent Strategies for Tic Tac Toe | Q-learning, Min-Max Algorithm, Alpha-Beta Pruning, Algorithm Design, Python**

Developed intelligent Tic Tac Toe agents using reinforcement learning and adversarial search techniques. Implemented Q-learning, Min-Max, and Alpha-Beta pruning algorithms to optimize gameplay with tree-based data structures. Evaluated agent performance through extensive simulations, comparing effectiveness, efficiency, and winning rates.

EDUCATION

- Master of Science in Computer Science**

University of New Haven, Connecticut — May 2025

GPA: 3.67/4.0

- Bachelor of Technology in Computer Science**

SRM Institute of Science & Technology — May 2022

CGPA: 9.06/10

TRAINING AND CERTIFICATIONS

- Certificate of Appreciation – **UI Development Workshop** (HTML, CSS, JS, Bootstrap & React.JS) – HTML Hints
- The Complete **Full-Stack Web Development Bootcamp** | Udemy
- Smart India Hackathon 2020 – Internal Hackathon Participant at SRM University (C/C++).
- Programming for Everybody (**Python**) | University of Michigan via Coursera
