

SUMMARY

Java Developer with 5+ years of experience building scalable, high-performance applications using Java, Spring Boot, Microservices, Hibernate, and REST APIs. Strong background in cloud technologies (AWS), CI/CD automation, and database optimization across MySQL, Oracle, and PostgreSQL. Proven ability to improve system performance, enhance user experience, optimize deployment pipelines, and lead Agile initiatives. Adept at collaborating with cross-functional teams to deliver reliable, secure, and high-quality software solutions.

SKILLS

- **Languages & Frameworks:** Java, Spring Boot, Spring MVC, Microservices, Hibernate, Servlets, JSP
- **Web Technologies:** HTML, CSS, JavaScript, jQuery, AJAX, Bootstrap
- **Databases:** MySQL, Oracle, PostgreSQL
- **Tools & DevOps:** Git, GitHub, Jenkins, Maven, Docker, Postman, JIRA
- **Testing:** JUnit, Mockito
- **Methodologies:** Agile (Scrum), SDLC
- **Servers:** Apache Tomcat, WebLogic
- **Cloud:** AWS, Microsoft Azure
- **Other:** REST API Development, CI/CD Pipelines, Debugging & Troubleshooting

EXPERIENCE:

Java Developer

JPMorgan Chase, USA | February 2023 – Present

- Built and enhanced RESTful APIs using Spring Boot and Hibernate, improving data retrieval speed by 25%.
- Contributed to Agile ceremonies, enabling 95% on-time task completion across sprints.
- Reduced development cycle time by 30% through improved collaboration and microservices enhancements.
- Improved front-end responsiveness by developing dynamic JSP and JavaScript components, boosting UX by 20%.
- Implemented CI pipelines with Jenkins and Maven, reducing deployment time by 30% and increasing release reliability.
- Resolved 90% of production issues within SLA using advanced debugging and root-cause analysis.
- Achieved 85% code coverage for new modules by creating robust JUnit and Mockito test suites.
- Streamlined deployments via CI/CD pipelines integrating Git, Jenkins, and Docker, accelerating release cycles and code reviews.

Java Developer

Barclays, India | March 2021 – August 2022

- Developed internal web applications using Java, Spring MVC, JSP, and Oracle, ensuring seamless integration between UI and backend services.
- Built reusable DAO components with Hibernate, reducing database access latency by 20%.
- Improved logging and exception handling, decreasing system downtime by 40%.
- Conducted API testing using Postman and maintained development documentation using Swagger.
- Participated in peer reviews, improving code maintainability and consistency across teams.

Associate Application Developer

Oracle, India | August 2019 – February 2021

- Developed enterprise-grade applications using Java, Servlets, and JSP in alignment with evolving business requirements.
- Integrated third-party APIs to enhance functionality, resulting in a 15% improvement in application capabilities.
- Deployed applications on Apache Tomcat and optimized server-side logic for stable performance.
- Collaborated with QA during UAT, reducing post-release bugs by 25% through effective debugging and regression testing.

EDUCATION

Saint Louis University

Master of Science in Computer and Information Systems

St. Louis, MO

August 2022 – May 2024

Holy Mary Institute of Technology and Science

Bachelor of Technology in Electronics and Communication Engineering

Hyderabad, India

August 2016 – December 2020

PROJECTS

Masters Research Project, Saint Louis University | October 2023 – May 2024

- Developed a master’s level 25-pages research article examining the integration of biometric authentication and encryption for cloud-based applications, enhancing security and privacy.
- Research on privacy-preserving systems, ensuring secure biometric data storage, transmission, and compliance with privacy regulations.

Hackathon Coordinator, Saint Louis University | November 2023 - December 2023

- Coordinated and managed hackathon program, organizing coding challenges that leveraged Java and Python, ensuring teams had clear objectives and technical support throughout the event.
- Provided mentorship to participants, offering guidance on using Java and Python to build scalable, efficient solutions while adhering to best coding practices.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Certified Microsoft Azure Fundamentals
