

BACHAWALA KEERTHI

Data Analyst

bachawalakeerthi@gmail.com | (334) 394-8319 | [LinkedIn](#) | Atlanta, GA (Open to Relocation)

SUMMARY

- Highly Skilled **Data Analyst** with over **3+ years** of experience in **SQL, Python, data modeling, ETL** development, and data quality management.
- Skilled in acquiring, cleaning, and transforming data from multiple sources to ensure **accuracy** and **consistency** across systems.
- Proven record of improving **reporting efficiency**, automating **data validation processes**, and **delivering insights** that drive measurable business impact, including increased sales and reduced manual reporting time.

EDUCATION

Auburn University at Montgomery Master of Science, Computer Science	Jan 2023 – Dec 2024 Montgomery, Alabama
---	---

CMR Technical Campus Bachelor of Technology, Computer Science	Jun 2016 - Apr 2020 Hyderabad, India
---	--

CORE COMPETENCIES

- **Data Analysis & Modeling:** SQL, Python (Pandas, NumPy), Power BI, Tableau, Data extraction, transformation, and loading (ETL), Data modeling from multiple sources and data warehouse integration, Data flow design and data conversion validation
- **Data Quality & Integrity:** Data validation and quality scorecard monitoring, Root cause analysis and data accuracy troubleshooting, Database maintenance and system integrity tracking, Automation of data quality checks
- **Reporting & Visualization:** Ad hoc reporting and statistical analysis, Interactive dashboards and real-time KPI monitoring, Automated templates and tools for recurring data submissions, Advanced Excel (Power Query, Pivot Tables, Macros)
- **Business & Communication:** Requirement gathering and stakeholder collaboration, Vendor and cross-functional coordination, Documentation and presentation of analytical findings

EXPERIENCE

Johnson & Johnson Data Analyst	Remote Mar 2025 – Current
--	--

- Conducted end-to-end data analysis, from acquisition to modeling, ensuring data completeness and compliance.
- Created and validated **financial** and **operational datasets**, improving reporting reliability and decision accuracy.
- Implemented data accuracy checks and error-tracking procedures, reducing inconsistencies by **40%**.
- Analyzed large datasets to identify process inefficiencies and proposed solutions that improved operational performance by **15%**.
- Produced ad hoc and scheduled reports for business users, ensuring timely access to accurate insights.
- Generated presentations, narrative reports, and visualizations for management, facilitating informed decision-making.
- Trained **5+** junior analysts and interns on reporting processes and systems, improving team productivity.
- Conducted ad hoc research and data analysis, providing insights that contributed to a **10% increase in revenue through optimized resource allocation**.

Media Mint Finance Data Analyst	Hyderabad, India Jan 2021 - Dec 2022
---	---

- Extracted and integrated data from multiple systems (**CRM, ERP, SQL Server, Snowflake**) into centralized databases improving data accuracy by **25%**.
- Automated recurring **data validation reports**, reducing manual effort and saving **15+ hours weekly**.
- Designed and maintained **Power BI** dashboards to track **KPIs** and sales metrics, contributing to a **12% increase in revenue** through data-driven insights.
- Performed detailed statistical and trend analysis to identify gaps in data flow and accuracy.
- Developed **SQL** queries and **ETL** pipelines to streamline reporting processes and ensure data consistency across systems.
- Monitored data quality scorecards and collaborated with data stewards to resolve data discrepancies.
- Built data templates and automated data submission tools to improve accuracy and reporting turnaround time by **30%**.
- Supported data conversion validation and testing during system migrations to maintain data integrity.
- Built **cross-functional dashboards** that streamlined performance tracking and helped management identify trends that drove a **12% improvement in sales productivity**.
- Automated recurring data validation workflows using Power Automate and SQL, reducing manual effort by **50%**.
- Analyzed customer and operational data to identify inefficiencies in ad delivery processes, optimizing resource allocation and **reducing turnaround time by 20%**.

Media Mint

Data Analyst Intern

Hyderabad, India
Sep 2020 - Jan 2021

- Verified and validated large marketing datasets for consistency and completeness.
- Assisted in system testing and **ETL performance optimization**, improving query efficiency and reliability.
- Extracted and transformed large datasets using **SQL** and **Python** to support financial and marketing reporting.
- Assisted in the creation of **Power BI reports and visuals**, increasing reporting efficiency and clarity for leadership.
- Supported ETL testing and Power BI data refresh troubleshooting, improving dashboard reliability by **25%**.
- Conducted KPI analysis and presented insights that optimized client marketing campaigns.
- Supported business teams in **KPI tracking** and performance reporting for client and internal dashboards.
- Assisted in developing **data pipelines and ETL processes** for product and operational datasets using **SQL** and **Python**.
- Built **visual reports and dashboards** tracking user behavior and operational efficiency, improving leadership visibility into product performance.
- Developed **Power BI** dashboards to communicate data insights clearly to leadership and non-technical stakeholders.
- Partnered **with cross-functional teams, including data analysts, engineers, and business stakeholders**, to develop data-driven solutions supporting strategic decision-making.
- Deployed Power BI dashboards at MediaMint display **key media metrics, ROI trends, and audience insights**, enabling clients to make data-driven decisions and improving the adoption of analytics tools across internal and external teams.

Twinix Info media

Data Analyst Intern

India
May 2019 - Sep 2020

- Systematized transformation, data extraction, and loading (ETL) processes with **Python scripts, improving pipeline efficiency and reducing manual** work across monthly data operations.
- Automated recurring product and marketing performance reports using Python and Excel macros, reducing manual reporting time by 40%.
- Conducted **data analysis on user engagement metrics** to identify trends and support product optimization initiatives.
- Collaborated with engineers and product teams to troubleshoot data discrepancies and propose system improvements.
- Conducted complex **SQL** querying and optimization to enhance reporting accuracy and reduce query runtime.
- Utilized **Excel (VBA, Macros, Power Query)** to automate recurring financial reports and reconciliations.
- Partnered with cross-functional teams to address data integrity issues and design corrective measures.
- Pruned complex SQL queries to retrieve and manipulate data from **relational databases, enhancing the speed and accuracy** of report generation for timely business insights.
- Monitored Oracle databases to ensure high availability and reliability, implementing regular backups and disaster recovery procedures to minimize downtime and data loss.
- Secured sensitive data within PostgreSQL databases by applying access controls, encryption, and validation measures, maintaining data integrity, and protecting over 1,000 GB of data from unauthorized access.
- Conducted **A/B** testing to assess the impact of changes on key metrics, providing data-backed recommendations that upgraded conversion rates and user engagement.

PROJECTS

Python – Predicting App Ratings on Google Play Store using Jupyter Notebook:

- Cleaned and preprocessed a dataset of 10,000+ apps, handling missing data and transforming features with 95% accuracy in data cleansing.
- Delivered actionable recommendations that could increase ratings by 10-15% for apps with optimization efforts.

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.

Power Bi Dashboard Restaurant Performance Analysis and Insights (Zomato App):

- Constructed a comprehensive Power BI dashboard to analyze restaurant performance, track key metrics, and provide actionable insights for optimizing operations and profitability.
- Analyzed the Global Analysis of Restaurant count, Average Cost, and Average App Ratings.
- Designed interactive visuals, including sales heatmaps, KPI cards, and performance charts, enhancing insights delivery by **20%**.

Tableau Dashboard Sales Comparisons by Region: ([Tableau Dashboard](#))

- Analyzed Pandas, NumPy, and Regex to clean and preprocess messy datasets, reducing inconsistencies and missing values by 30%.
- Automated data standardization pipelines with Python scripts, ensuring data for reporting and business analytics.
