CAREER OBJECTIVE

Motivated and detail-oriented DevOps and Cloud Engineer with 1.5 years of industry experience seeking to leverage expertise in cloud infrastructure, CI/CD pipelines, and automation tools where I can apply my skills in AWS, Jenkins, Docker, and Terraform to drive operational efficiency and support rapid software delivery cycles while continuously learning and growing in the DevOps domain.

EDUCATION

Campbellsville University Masters, Department of Computer Science	<i>2023 - 2024</i> CGPA: 4.0
Vasireddy Venkatadri Institute of Technology B.Tech, Department of Information Technology	<i>2017 - 2021</i> CGPA: 6.25

SKILLS

- **Cloud Platforms:** AWS (EC2, ASG, ELB, S3, Lambda, CloudWatch, RDS, EKS, IAM, VPC, WAF, Route53)
- **Containerization and Orchestration:** Docker, Kubernetes
- **CI/CD Tools:** Jenkins, Git, Maven, SonarQube, ArgoCD
- **Infrastructure as Code:** Terraform, Ansible
- **Security:** DevSecOps, Trivy Image Scan, Secure CI/CD Pipeline
- **Scripting:** Shell/Bash Scripting, Python
- **Other Tools:** Linux, MYSQL, AWS CloudFormation, CloudFront, CDN, EFS, SNS, AMI, Route 53

EXPERIENCE

DevOps Engineer

Shree Global LLC /Lewisville, Texas/June 2025-Present

- Implementing Infrastructure as Code (IaC) using Terraform to provision and manage AWS cloud infrastructure.
- Automating configuration management and deployments with Ansible, improving efficiency and reducing manual errors.
- Managing containerized applications and deployments in Kubernetes clusters, ensuring scalability and high availability.
- Building and maintaining CI/CD pipelines to streamline application delivery and infrastructure updates.
- Collaborating with development teams to integrate automation into workflows, enhancing reliability and deployment speed.

JUNIOR-DEVOPS ENGINEER

MIND CIRCUIT Pvt Ltd./Hyderabad, India/March 2021 - August 2022
Banking Application

- Deployed and managed cloud infrastructure on AWS, including EC2, S3, RDS, IAM, and VPC, ensuring scalability and high availability of production systems.
- Designed and maintained CI/CD pipelines using Jenkins, automating build, test, and deployment processes across multiple environments.
- Containerized applications using Docker, and orchestrated services with Kubernetes for better workload management and resource efficiency.
- Used Terraform and CloudFormation to automate infrastructure provisioning (IaC), improving deployment time and minimizing manual errors.
- Monitored application and system health using tools like Prometheus, Grafana, and CloudWatch, responding proactively to system alerts.
- Collaborated closely with development and QA teams to streamline deployments and improve release cycles through DevOps best practices.
- Wrote automation scripts using Shell and Python to support infrastructure tasks and reduce repetitive manual work.

PROJECT IN B.TECH

The BookStore Web Application :

- In this project my role is Designed and deployed the BookStore web application infrastructure on AWS Cloud, ensuring high availability and fault tolerance.
- Launched and configured EC2 instances for hosting the frontend and backend applications.
- Launched and configured VPC for keeping EC2 instances of frontend and backend and RDS applications.
- Integrated Amazon RDS for a scalable, secure, and managed database solution.
- Implemented Route 53 for domain name management and routing traffic efficiently to web servers.
- Used IAM to manage secure access and defined roles/policies for different components and users.

List of AWS Services is used in the Project: Amazon Route 53, EC2, Auto Scaling, certificate manager, RDS, VPC, IAM.

STRENGTHS

- Team Player • Fast Learner • Time Management • Good Communication Skills
