

Keval Chheta

Jersey City, NJ | +14019999215 | kevalchheta@gmail.com

EDUCATION

Stevens Institute of Technology, New Jersey

Master of Science - Computer Science (GPA – 3.7)

Coursework: Database Management Systems, Web Programming, Data Structure and Algorithms, Cloud Computing, JAVA Programming
Human-Computer Interaction, Data Analytics & Machine Learning, Financial decision-making

Veer Narmada South Gujarat University, Gujarat, India

Bachelors - Computer Applications & Science (GPA – 3.8)

SKILLS & INTERESTS

Languages: HTML, CSS, JavaScript, Typescript, .Net, JAVA, Node.js, Python, SQL, R, C++, PHP

Tools & Framework: Spring Boot, React, Express.js, WordPress, Jenkins, PowerBI, Adobe, Bootstrap, Vue.js, AWS, Docker

Databases: MySQL, PostgreSQL, MongoDB, NoSQL, Oracle, JDBC

Concepts: A/B Testing, Database Design and Integration, UI/UX Designing, Agile Methodologies

PROFESSIONAL EXPERIENCE

Volcone Web Solutions | Leander, TX

- **Software Developer** (09/2024 - Present)
 - Engineering a health app (React.js, Node.js), integrating symptom checker, health tracker, and appointment scheduler.
 - Creating appointment scheduler with Express.js and JWT for secure bookings and reminders, managing 500+ appointments.
 - Enhancing user engagement by 85% through a health tracker using Chart.js for daily metrics visualization.
 - Optimizing CI/CD pipelines with Docker, deploying the app on Heroku.
 - Collaboration Agile practices, leading daily stand-ups and sprint planning, improving project efficiency and team productivity.
- **Software Developer Intern** (05/2023 - 08/2023)
 - Formulated a food diary and calorie tracker with real-time visualizations using Chart.js for monitoring daily intake and nutrition.
 - Defined a MongoDB database schema to efficiently store and manage users' financial records, handling over 5,000 transactions.
 - Applied the MVC design pattern, and ease of maintenance across the Spring Boot backend and front-end components.
 - Constructed Spring Boot backend boosting data processing by 30%, integrated with Chart.js, supporting 500+ user interactions.

IgnatiusLab Pvt Ltd | India

- **Front End Engineer** (08/2021 - 07/2022)
 - Utilized parsing algorithms (DOM Traversal, Regex, NLP) for web scraping, extracting articles from 20+ respected news sources.
 - Developed backend services (.NET, C#) for efficient data processing, enhancing the application's performance and scalability.
 - Conducted A/B testing on UI/UX features to optimize user interactions and enhance overall application performance.
 - Deployed the news application on AWS, achieving high availability and scalability to support 1,000+ concurrent users.

Primeto Technology | India

- **Software Developer** (08/2019 - 08/2020)
 - Automated scheduled tasks like database backups and data synchronization using Cron jobs with "node-cron".
 - Minimized database load by streamlining caching mechanisms (Redis, Memcached).
 - Increased operational efficiency for property managers by 40% through AWS Lambda for workflows and notifications.
 - Reduced deployment time by 50% by enhancing processes with AWS CodePipeline and GitHub Actions.

ACADEMIC PROJECTS

Event Booking System

- Built a Spring Boot backend to support the Event Booking System's React.js front-end, enabling seamless interaction between event listings, booking forms, and user profiles.
- Set Up Stripe for payment processing, managing over 3,000+ bookings with real-time confirmations.

Interactive EV Charging Station Locator

- Implemented UI components with HTML, CSS, and Bootstrap to enable intuitive navigation and filtering of EV charging stations.
- Redesigned clustering algorithms (K-means, DBSCAN) using Python and integrated the results into the web application.

Real-Time Delivery Route Optimization Dashboard

- Crafted an interactive web dashboard using React.js and D3.js to visualize real-time delivery routes and traffic data.
- Designed and optimized MySQL to efficiently store and retrieve delivery and traffic data, supporting high-performance queries.

ORGANIZATIONAL EXPERIENCE

- **Volunteer Coordinator:** Led 50+ weekly food drives for homeless shelters across India, coordinating donations and volunteers.
- **Event Coordinator:** Planned 10+ campus-wide cultural events, fostering community engagement and student participation.
