

Kevinkumar Bhingaradiya

DATA ANALYST

Location: NJ, US | Mobile: 201-856-1466 | Email: kevinp8298@gmail.com | LinkedIn

SUMMARY

Data Analyst with 3+ years of experience in transforming complex datasets into actionable insights, resulting in a 25% improvement in forecasting accuracy and a 15% increase in customer retention. Demonstrated expertise in automating ETL processes, managing cloud data warehouses, and creating impactful dashboards, contributing to a 60% reduction in data processing time and a 10% decrease in operational costs. Proficient in SQL, Python, and R, with a proven track record in optimizing data workflows and enhancing decision-making through advanced analytics.

EDUCATION

Master of Science in Computer Science Stevens Institute of Technology, Hoboken, NJ, USA	December 2023
Bachelor of Science in Information Technology Parul University, Vadodara, Gujarat, India	May 2020

SKILLS

- Methodologies:** SDLC, Agile/Scrum, Waterfall
- Programming Languages:** Python, SQL, R, Bash
- Data Visualization:** Power BI, Tableau, Looker
- Database:** Snowflake, SQL Server, MySQL, PostgreSQL
- ETL Tools:** Azure Data Factory, SQL Server Integration Services (SSIS)
- Big Data Technologies:** Apache Kafka, Hadoop, AWS Redshift
- Cloud Platforms:** AWS, Microsoft Azure, Google Cloud Platform (GCP)
- Version Control:** Git, GitHub
- Machine Learning:** Scikit-Learn, TensorFlow, Keras, XG Boost
- Other Tools:** Excel, Jupyter Notebook, Power Automate

EXPERIENCE

Northern Trust, United States Data Analyst	Feb 2024 – Current
- Developed a data visualization system using Power BI and SQL to monitor key operational metrics, enhancing process efficiency by 25% and streamlining healthcare delivery. - Created a patient segmentation model using Python and Pandas to identify at-risk groups, resulting in a 15% improvement in targeted intervention strategies. - Automated ETL processes with Azure Data Factory to manage healthcare data from multiple sources, achieving a 60% reduction in data processing time and improving data consistency. - Implemented a real-time data processing system using Apache Kafka and Snowflake to analyze patient feedback, boosting engagement by 20% through timely interventions. - Designed interactive dashboards in Tableau to visualize patient care metrics, enabling a 10% reduction in operational costs through improved resource allocation. - Performed data profiling and validation in SQL to reduce discrepancies and enhance the accuracy of healthcare analytics. - Analysed patient behaviour data using Python and SQL to identify trends, influencing new care protocols and increasing patient satisfaction by 12%.	
CitiusTech, India Data Analyst	July 2019 – Jan 2022
- Conducted market basket analysis with Python to identify patient service combinations, optimizing cross-service recommendations and driving an 18% increase in service utilization. - Led the migration of healthcare data to Snowflake on AWS, cutting data query times by 50% and reducing storage costs by 40% through effective data management practices. - Designed a scalable ETL pipeline using SQL Server Integration Services (SSIS) to integrate data from various electronic health records (EHR) systems, enhancing data accessibility and reducing reporting errors by 50%. - Created real-time monitoring dashboards in Looker, integrating data from MySQL databases, which improved decision-making efficiency for clinical operations by 15%. - Performed extensive data cleansing and transformation with SQL and Pandas, improving data accuracy in health analytics and reducing errors in reporting by 35%. - Developed a predictive maintenance system using Python and TensorFlow to analyze IoT sensor data from medical equipment, reducing downtime by 20% and optimizing maintenance schedules. - Transitioned financial reporting from Excel to Power BI, halving manual reporting efforts and enhancing the visual presentation of financial data for stakeholders. - Conducted cohort analysis using SQL and R to track patient retention patterns, providing actionable insights that led to a 10% increase in long-term patient engagement.
