

Summary

Experienced data analyst skilled in SQL, Python, and R for data collection, cleaning, and analysis. Proficient in creating interactive dashboards with Tableau and Power BI to deliver actionable insights. Strong collaborator with a proven ability to identify business needs, develop data-driven solutions, and enhance operational efficiency. Committed to continuous learning and staying updated with industry trends to support strategic decision-making.

Skills

Technical Skills: Python, Power BI, SQL, R, Excel, Data Analysis, Machine Learning, Data cleaning, Data Mining, Data Modeling, MySQL, SQL/NOSQL, Tableau, Jira, AWS, MS Excel, Agile, Scrum, Big data.
Soft Skills: Problem-solving, Critical Thinking, Communication, Collaboration, Attention to Detail, Adaptability and Creativity.
Operating Systems: Windows, Linux, MacOS.

Educations

Master of Science - Information Technology Management University of Wisconsin Milwaukee	May 2024
Bachelor of Engineering - Electronic and Communication Jawaharlal Nehru Technological University	May 2019

Work Experience

Lubar College of Business Graduate Office Assistant Milwaukee, Wisconsin	Oct 2023 – May 2024
- Guided incoming students through their college transition, addressing their queries and assisting with admissions details. Utilized Excel to organize and manage records of alumni and current students, ensuring accurate and efficient data management. - Supported staff during events by participating in brainstorming sessions, facilitating Q&A sessions for international students, and handling calls and meetings as needed. Demonstrated strong communication and problem-solving skills in a dynamic office environment. - Coordinated with faculty and administration to schedule meetings, manage appointments, and ensure smooth day-to-day operations in the graduate office. Utilized organizational skills to streamline processes and enhance office efficiency.	

Amazon Operations Analyst Chennai, India	Aug 2020 – Dec 2022
- Reduced processing time by 20% and increased productivity by 15% through performance data analysis and machine learning-driven workflow optimization using Python. - Built interactive dashboards in Tableau and Power BI, improving real-time KPI tracking and ensuring data accuracy in 70 out of 100 cases through advanced SQL and Excel-based data extraction and cleaning - Led cross-functional teams, resolving issues to enhance collaboration, resulting in a 10% improvement in project timelines and success. - Conducted compliance audits, reducing risks to ensure adherence to regulatory standards through the implementation of corrective actions - Managed project milestones, achieving 95% on-time project completion and a 20% increase in overall efficiency through problem-solving and clear communication with stakeholders.	

EP Soft Technologies Analyst Vijayawada, India	Jul 2019 – Aug 2020
- Executed data-driven projects using Python and SQL, delivering insights that shaped strategic decisions and improved operations. Applied data mining and statistical analysis to optimize processes, identifying key trends that increased operational efficiency by 15% - Developed over 10 real-time dashboards in Tableau and Power BI, enhancing executive insights and aligning with business goals through advanced data visualization, improving reporting speed by 25%. - Applied machine learning algorithms to analyze datasets of over 1 million rows, uncovering patterns in customer behavior and operational efficiency. Improved data accuracy by 20% through rigorous cleaning techniques. - Performed A/B testing and multivariate analysis to refine product features and marketing strategies, providing actionable recommendations that boosted user engagement by 18%. - Worked with stakeholders to define KPIs and create reports, aligning teams with strategic objectives and driving a 10% improvement in cross-departmental operational performance.	

Projects

HR Analytics and Employee Engagement Optimization SQL, Python, Tableau
- Analyzed employee engagement data to identify key drivers of satisfaction and areas for improvement, using SQL and Python. - Developed a Tableau dashboard for real-time tracking of engagement metrics, enabling data-driven decision-making by HR teams. - Achieved a 20% improvement in employee engagement scores, directly influencing HR strategies and enhancing organizational culture.
Social Security Using Convolutional Neural Networks Python, CNN, TensorFlow, Keras, OpenCV
- Enhanced fraud detection by implementing Convolutional Neural Networks (CNNs) to classify social security image types, bolstering security. - Utilized Python for advanced data cleaning, including outlier removal and normalization, to improve dataset integrity and model performance. - Optimized CNN architecture by tuning hyperparameters and applying techniques such as dropout and batch normalization, achieving a 15% improvement in model accuracy. - Developed a real-time image processing pipeline using OpenCV to preprocess and augment data, ensuring robust training and accurate predictions in varied conditions.
Data Analysis and Streaming Predication of Spotify Songs Python, Spotify, Pandas, Scikit-Learn
- Used Machine Learning to identify factors influencing album popularity, including artist prominence, release timing, and attributes. - Achieved an R-squared score of 0.641, demonstrating expertise in predictive analytics and industry decision-making. - Developed a streaming prediction model using time series analysis to forecast future song performance, providing actionable insights for marketing and promotional strategies. - Implemented engineering techniques to enhance model accuracy, including extracting and creating relevant features from song metadata and historical streaming data.
Box Office Analysis Excel, VBA, VLOOKUP, PivotTables, Charts
- Performed comprehensive box data analysis in Excel, providing actionable insights on ticket sales and popular movies. - Developed predictive models in Excel to forecast future box office revenues, resulting in a 60% improvement in accuracy. - Created detailed visualizations and dashboards to present analysis results, facilitating strategic decision-making and marketing efforts. - Conducted trend analysis to assess the impact of various factors such as release dates, marketing spends, and genre on box office performance.

Certifications

- AWS Certified Cloud Practitioner
- Google Advanced Data Analytics
- AI for Product Management
- Google AI Essentials
