

KHUSHALI PATEL

Seattle, WA | khushalibpatel@gmail.com | 2136569583 | [Github](#)

SUMMARY

Software Engineer with 1+ years of experience building production-ready backend systems and AI-powered web applications. Skilled in object oriented design, C#, .NET, SQL, and cloud platforms like AWS, Azure. Strong foundation in software engineering best practices, including testing, CI/CD automation, and scalable architecture. Eager to work across the stack to deliver clean, efficient, and maintainable code to support the design of software systems, including LLMs/SLMs.

EDUCATION

University Of Southern California (MS Computer Science)

Cumulative GPA: 3.6/4

Los Angeles, CA

Aug 2023 - May 2025

Pandit Deendayal Energy University (B.Tech Information Technology)

Cumulative GPA: 9.65/10

Gandhinagar, India

Aug 2019 - Jun 2023

WORK EXPERIENCE

Software Engineer | Good Work Hub

Los Angeles, June 2025 - Current

- Enhanced the AI-driven grant matching system by implementing a robust backend for data extraction and web-ready APIs for real-time integration, using **Python, Django, Pytest, AWS Fargate, RDS, Docker**.
- Deployed an AWS Lambda function for automated retrieval, filtering, and storage, boosting matching efficiency by 70%.
- Built **RESTful APIs** to scale the platform from beta to production, growing the user base 10x with 1000+ additional users.

Software Engineer, Data | Information Sciences Institute

Marina Del Rey, March 2024 - May, 2025

- Automated data extraction from TikTok APIs to collect videos, comments, metadata by building ETL pipelines on AWS. Used **Glue, Athena, ECS, S3 and Snowflake**. Processed 1M+ posts using **Apache Spark and SQL**.
- Designed a modular scraping system with **Firecrawl + Supabase**, supporting API-triggered crawls and storage of structured content from menus and grocery listings, supporting research into food distribution systems.

Machine Learning Researcher | Cohere for AI

Remote, July 2024 - Aug 2024

- Worked independently to **identify mislabeled instances in the Aya multilingual dataset** for the Aya101 LLM.
- Developed a language identification ensemble model to detect and classify mislabel types for over 65 languages, filtering out errors on the dataset.

Research Assistant | PDEU, ICT Department.

Gandhinagar, India, Jan 2023 - May 2023

- Engineered XAI models (SHAP, PDP, random forests) to categorize and elucidate credit risk factors for home equity loans. End-to-end deployment with **Flask interface, Google Cloud backend, and Nginx**.
- Enhanced user engagement by displaying immediate, clear insights into their credit risk factors.

Software Engineer Intern | Larsen & Toubro Ltd.

Vadodara, India, May 2022 - July 2022

- Spearheaded the creation of a Microsoft Teams chatbot to extract answers from unstructured documents, reducing query time from hours to less than 5 seconds. Used **Azure Custom Question Answering, SQL, C#, .NET framework**.
- Integrated and developed a user feedback mechanism, state management and context switching.

PROJECTS

Text Humanizer App

- Built a full-stack AI Humanizer web app using **React (Tailwind CSS), Typescript and Supabase** (Auth, PostgreSQL, Storage), with features including login/logout, credit tracking, project dashboard for storing past projects, pricing.
- Integrated AI humanization APIs (Undetectable AI, Sapling) to deliver high-quality text rewriting, supporting tier-based credit limits; deployed via **Netlify**

TECHNICAL SKILLS

Languages: Python, C#, C++ | **Database Management and Systems:** MySQL, MongoDB | **AI/LLM Frameworks:** LangChain, Huggingface-Transformers, Llama, Cohere Rerank | **Python Packages:** Sklearn, SciPy, NumPy, Pandas, OpenCV, BeautifulSoup, NLTK | **Development Technology:** Django, .NET, HTML, CSS, React, Typescript, Angular
