

Khushboo Patel

Business Data Analyst

San Jose, CA | khushboo.p8976@gmail.com | 669-287-1932 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Business Data Analyst with 8+ years of experience delivering actionable insights to support strategic decision-making across complex business environments. Adept at uncovering trends, monitoring performance, and streamlining reporting processes to enhance data accuracy, accessibility, and efficiency. Proven success in aligning cross-functional teams, automating workflows, and translating analytical findings into clear business recommendations. Recognized for bridging the gap between technical execution and stakeholder expectations, driving compliance, operational improvements, and long-term value.

SKILLS

Programming & Scripting	Python (Pandas, NumPy, Statsmodels, Matplotlib, Seaborn), SQL (T-SQL, PL/SQL, ANSI SQL), VBA, DAX
Databases & Warehouses	PostgreSQL, MySQL, Oracle, SQL Server, DB2, Snowflake, Google BigQuery
ETL & Data Integration	Alteryx, AWS Glue, DataStage, Power Query, VBA, Python Automation
BI & Data Visualization	Tableau, Power BI, QlikView, Google Data Studio, Looker, MS Office (Excel, Macros, Power Query, Pivot Tables)
Advanced Analytics	Statistical Modeling, A/B Testing, ANOVA, Hypothesis Testing, Time Series Forecasting, Regression (Linear/Logistic), Clustering, PCA, Outlier Detection, Correlation Analysis
Automation & Reporting	Google Sheets Automation, Alteryx Automation Server and Alteryx Desktop, Python Scripts, Scheduled Dashboards, Batch Reporting
Big Data & Processing	Hadoop, AWS EMR, Amazon S3
Cloud Platforms	AWS (S3, Redshift, Glue, Athena, Lambda, QuickSight, SageMaker, CloudWatch, CloudFront) GCP (BigQuery, DataPrep), Snowflake, ipython shell, google collab, Azure Data Factory, Data Lake Storage, Synapse Analytics, Databricks, Blob Storage, Azure SQL, Azure Functions, AKS, Azure Monitor, Logic Apps)
Documentation & Modeling	BRD, FRD, User Stories, Use Cases, BPMN, Flowcharts, Wireframes, ER Diagrams, Star & Snowflake Schemas, Dimensional Modeling
Tools & Productivity	Git, GitHub, Bitbucket, Confluence, Jira, ServiceNow
SDLC & Methodologies	Agile, Scrum, Waterfall, Kanban, CI/CD Concepts, UAT, SIT, QA Testing, Business Process Reengineering (BPR), Data Governance
Soft Skills & Collaboration	Stakeholder Management, Requirements Gathering, Executive Reporting, Cross-functional Collaboration, Communication, Critical Thinking, Data Storytelling

EDUCATION

Masters in Management of Technology | **New York University** | Aug 2015 – May 2017

Bachelor of Engineering in Computer Science | **Rajiv Gandhi Prodyogiki Vishwavidyalaya, India** | May 2011 – Jun 2015

Professional Experience

Business Data Analyst | First Republic Bank, CA | Feb 2025 – Current

- Led data analysis initiatives to support strategic decision-making across credit card customer data and banking operations using structured data retrieval and ETL requests; Designed and maintained interactive dashboards and visualizations (e.g., donut charts, tree maps, bar graphs) using Tableau and Power BI for delivering executive-level insights.
- Currently working on the automation of old data retrievals, reporting and AWS data migration for FRB post-merger with JP Morgan & Chase using Alteryx Automation tool & schedule it on server.
- Developed advanced SQL queries with CTEs, window functions, and subqueries to extract, cleanse, and analyze large volumes of data from PostgreSQL, Oracle, and other enterprise systems.
- Collaborated with business stakeholders and cross-functional teams to define and track KPIs such as timely case resolution, SLA compliance, and operational performance metrics; Automated recurring reporting processes and data pipelines using Alteryx, scheduled workflows on servers, and reduced manual effort using Python scripting and Excel Macros.
- Conducted UAT (User Acceptance Testing), prepared test cases, validated datasets, and ensured accuracy and integrity of financial reports across multiple environments. Analyzed trends, outliers, and anomalies in customer behavior using regression, hypothesis testing, and forecasting.
- Designed and implemented an end-to-end data analytics pipeline by orchestrating ingestion with Azure Data Factory, processing large-scale datasets using Azure Databricks, storing structured and unstructured data in Azure Data Lake Storage Gen2, and enabling enterprise-level reporting and ad-hoc analysis through Power BI.
- Integrated and transformed data from cloud sources like Snowflake and Amazon Redshift to build centralized reporting layers and support real-time analytics; Created ad-hoc reports, executive scorecards, and operational dashboards using Tableau, SSRS, and Excel.
- Built data dictionaries, metadata documentation, and supported data governance to ensure consistency, quality, and compliance; contributed across the SDLC using Agile methods, including sprint planning, backlog grooming, QA, and release documentation.

Senior Data Analytics Associate | JP Morgan Chase & Co, Mumbai, India | Apr 2021 – Mar 2024

(Data Analytics Reporting Team, Consumer Community Banking, USA Project)

- Built an end-to-end downstream data lineage system using Alteryx, SQL, and Python to monitor metrics such as Availability, Productivity, Schedule Adherence, and Occupancy for customer case resolution teams; reduced month-end processing time by 6 hours through server-scheduled Alteryx workflows.
- Analyzed AML transaction data to identify loan defaulters, assess forbearance periods, and calculate cumulative late fees, supporting

- compliance and credit risk functions; Designed and executed ETL pipelines to develop a reusable Dart Data Repository for downstream reporting and dashboarding needs; participated in the migration of data workloads to AWS, ensuring data integrity and optimized query performance.
- Delivered analytical solutions using SQL, Python, Tableau, and Alteryx, including Health Check Monitoring systems for internal databases to maintain operational readiness; Partnered with business and technology stakeholders to conduct requirements gathering, wrote functional requirement documents (FRDs), and translated business questions into technical specifications.
- Worked on data pipelines by ingesting raw files into AWS S3, transforming data with AWS Glue, and loading into Amazon Redshift for analytics and reporting; applied Agile practices using Jira, visualized sprint metrics in Tableau, and mentored two analysts in testing and documenting Alteryx workflows and dashboards across UAT.
- Developed performance dashboards using Tableau to track Service Level Agreements (SLA), and escalation trends in credit card servicing operations; Integrated data from Snowflake, PostgreSQL, and Oracle into unified Tableau views to support enterprise-level self-service analytics.
- Created dynamic reports and executive scorecards using Power BI, Excel, and PowerPoint for senior leadership review and regulatory updates; built data validation scripts in Python and SQL to cross-check backend metrics against source systems, ensuring accurate KPI reporting.
- Ensured data governance standards were maintained by building lineage documentation, data dictionaries, and access control logs; Leveraged advanced Excel for KPI trending, forecast analysis, and variance reporting using Power Query, PivotTables, slicers, and formulas.

Senior Data Analytics Associate | JP Morgan Chase & Co, Mumbai, India| June 2019 – April 2021 **(Compliance, Consumer Community Banking, USA Project)**

- Conducted analysis of monitoring and testing activities related to regulatory frameworks (FDPA, FHA), assessed coverage adequacy, and recommended enhancement strategies for improved risk controls.
- Developed interactive dashboards using Tableau Desktop to visualize sprint progress, velocity, and team performance; used in daily standups and sprint retrospectives under Agile framework; Led the design and execution of Scrum-based sprint cycles, managing Alteryx development pipelines, backlog prioritization, and QA coordination for continuous delivery of compliance analytics.
- Automated cross-system data validation checks using Python, SQL, and Alteryx to ensure consistency and accuracy in compliance metrics reporting; Designed executive-level reports and visualizations using Power BI, PowerPoint, and Excel (Power Query, Macros) for compliance leadership and audit stakeholders.
- Streamlined enterprise data workflows by integrating Azure Data Factory for ETL orchestration, transforming data with Azure Databricks, storing layers in Azure Data Lake Storage, while enabling analytics, performance dashboards through Power BI and Tableau.
- Conducted UAT for new workflows and dashboard deployments; documented test cases, resolved issues with QA teams, and supported post- deployment monitoring; leveraged Snowflake and SQL Server to extract and transform compliance datasets for centralized reporting.
- Followed SDLC practices for compliance reporting projects from requirement gathering and design to testing, documentation, and release; Implemented KPI tracking dashboards to monitor coverage levels, policy adherence, SLA compliance, and report submission timelines.

Data Analyst | MetLife, Mumbai, India | Oct 2018 – May 2019

- Designed Power BI dashboards and automated workflows in Microsoft Dynamics CRM and ClickDimensions to support lead tracking, campaign analytics, and investor engagement across marketing operations.
- Collaborated in Agile sprint cycles to document BRDs/FRDs, supported SDLC phases for report development and enhancement, and managed project tracking through Jira and Confluence.
- Performed data wrangling using Informatica and Power Query; automated reporting pipelines with Excel Macros, built Tableau dashboards (donut, bar, treemap) to visualize KPIs and SLAs, and applied dimensional modeling (star/snowflake schemas) for structured reporting.
- Orchestrated data pipelines using Azure Data Factory, processed datasets in Azure Databricks, and built reports in Azure Synapse Analytics; used ipython shell for Python-based validation, Alteryx for QA preparation, and managed collaboration/documentation via SharePoint, MS Teams, Slack, and Trello.

Data Analyst | Star Mountain Capital, NY | Aug 2017 – Aug 2018

- Analyzed investor lifecycle and lead generation data using MS Dynamics CRM and SAS (Proc SQL, Proc Freq, and Proc Summary) to support fundraising strategy; validated outputs through SQL Server queries for financial reporting accuracy.
- Conducted comprehensive data quality checks and root cause analysis on CRM exports vs. internal databases; automated email workflows and report scheduling using ClickDimensions, aligning with SLA targets.
- Built interactive Power BI dashboards to track KPIs including fundraising milestones, campaign engagement, and investor trends, driving data-informed decision-making across leadership.
- Created ETL documentation and data mapping logic in FRDs; leveraged Excel (Power Query, PivotTables, and Macros) for budget variance analysis and operational reporting.
- Executed UAT and regression testing during CRM upgrades; automated profiling and reporting using Python/Jupyter, applied dimensional modeling for Tableau/Power BI, and managed tasks via Jira, Confluence, and SharePoint.

CERTIFICATIONS

Certification of excellence in tools such as **'Tableau Desktop', 'Oracle Database 11g/12C, Advanced SQL** from Eureka (License No. Y3FAMNKM). Certification of ETL tool **Alteryx Core 2020** via Alteryx Community.
