

Objectives

Hardworking college graduate with a Master of Computer Application. Aiming to leverage acquired academic knowledge and proven communication, creative thinking, and planning skills to fill the employee role at your company successfully. Frequently praised as focused by my peers, I can be relied upon to help your company achieve its goals.

Experience

Employment History

- **I completed a Data Analytics certificate course, including Python, Data Visualization, Excel, PowerBI, Tableau, and SQL, as I wanted to upgrade my knowledge in my interested field. I am open to working in the field.**
- **Jr. Android Developer** (Development & Designing) at NEXAMUSE from July/2022 to Aug/2024
Design and build advanced applications for the Android platform.
Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
Collaborate with cross-functional teams to define, design, and ship new features.
Ongoing development of existing Android projects.
Work on bug fixing and improving application performance.
Working with backend developers for API requirements in the apps.
Work with outside data sources and APIs.
Developing/customizing Android applications.
- During this gap year, from 2020 to 2021 (COVID time), I had other plans for my further studies abroad, but unfortunately, some of those did not work.
