CAREER OBJECTIVE

Detail-oriented Business Analyst with 2.5 years of experience in Banking and Finance, specializing in process optimization for global clients. Skilled in SQL, Python, and stakeholder management, focusing on improving operational efficiency and driving project success through cross-functional collaboration. Seeking to leverage analytical expertise and industry knowledge to contribute to strategic decision-making in a dynamic Business Analyst role

EDUCATION

Masters in Information Systems, Northeastern University | Boston, MA **Expected May 2025**

Relevant Courses: Data Management and Design, Data Warehousing for Business Intelligence, Data Science Engineering Tools, Agile Software Development

Bachelors in Information Technology, Mumbai University | Mumbai, India **Aug 2017 – Jun 2021**

TECHNICAL SKILLS

Programming Languages : Java, Python, R, SQL
Database Technologies : MS SQL Server, MySQL, Oracle, MongoDB, PostgreSQL
BI & ETL Tools : Tableau, Power BI, Talend, Alteryx, Azure Data Factory, Snowflake
Cloud Platforms : AWS
Python Libraries : Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Software & Tools : SharePoint, JIRA, GitHub, MS Office, Salesforce, Jupyter Notebook, E/R Studio
Certifications : Salesforce Associate, AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

LTI Mindtree | Mumbai, India **Business Analyst** **Jun 2021 – Jun 2023**

- Collaborated with business stakeholders to document functional requirements using Agile, created BRDs and user stories, contributing to a 15% improvement in customer satisfaction KPIs
- Created PowerPoint presentations, 50+ test cases, and monthly status reports, streamlining decision-making and saving 15 hours per project cycle
- Improved financial report accuracy by 10% using SQL for data extraction and Excel for detailed analysis
- Minimized defect resolution time by 25% using JIRA through 8 UAT & 24 SIT testing cycles for QA
- Boosted team productivity by 20% through cross-functional coordination, leading meetings and implementing routine check-ins to streamline project updates
- Expedited project timelines by 15% through documentation of business processes, risks, and improvements

Trivia Softwares | Mumbai, India **Python Developer Intern** **Dec 2019 – Feb 2020**

- Spearheaded the creation of a Student Management System, using Python & Oracle, managing over 15k records
- Optimized SQL data retrieval with indexing, reducing access time by 20%
- Developed 10+ Python functions to automate CRUD operations, database updates, and user validation

PROJECTS

Zomato Delivery Analysis | Python, EDA, Logistic, Random Forest, Decision Trees **Mar 2024 – May 2024**

- Conducted analysis on a dataset containing over 50k rows to identify trends, patterns, and anomalies
- Achieved 96% accuracy in pricing with feature engineering, segmentation analysis, and machine learning models using sci-kit-learn
- Visualized data insights using Matplotlib and Seaborn creating bar charts, pie charts, and histograms

Motor Collision Analysis | Talend, Alteryx, Power BI, Tableau, E/R Studio **Jan 2024 – Mar 2024**

- Devised scalable ETL processes and data pipelines to integrate over 3 million records across 3 datasets to perform data profiling, modeling and transformation while adhering to data governance policies
- Reduced data processing time by 40% through regular quality checks, ensuring data reliability and integrity
- Designed and integrated over 10 interactive Power BI & Tableau dashboards for data-driven insights

YouTube Data Analysis | AWS S3, Glue, Lambda, Athena, Quicksight, SQL **Oct 2023 – Dec 2023**

- Architected an ETL pipeline with AWS S3 and Glue to process YouTube data, reducing preparation time by 30%
- Automated workflows with AWS Lambda and optimized SQL transformations in Athena
- Enhanced insights into platform trends for 10,000 videos by designing Quicksight dashboards

Sports League Management System | MS SQL, Tableau **Oct 2023 – Dec 2023**

- Implemented database solutions by programming 2 triggers, 3 stored procedures, 3 views, and 3 User-Defined Functions in MS SQL Server
- Integrated Tableau with MS SQL Server, creating 4 visualizations (player performance, match statistics, user distribution, and transaction trends)
