

Khyathi Chittineni

Software Engineer

(716) 276-0142 | khyati.ch@mycvhire.com | [LinkedIn](#) | [GitHub](#) | Seattle, WA

Summary

- Around 4 years of experience in the complete software development lifecycle, with expertise in building scalable, high-performance applications that address complex business requirements.
- Proficient in crafting modern web applications using a diverse tech stack, including Java, C++, Python, Kafka, Spring Boot, React.js, Node.js, and TypeScript, ensuring robust and maintainable solutions.
- Proficient in using ORM frameworks for relational databases like MySQL and PostgreSQL, as well as NoSQL databases like MongoDB.
- Experienced in Agile/Scrum methodologies with strong communication skills and a proven ability to collaborate effectively with cross-functional teams to deliver high-quality software.

Work Experience

M&T Bank

Feb 2024 – Current

Software Engineer

- Developed a real-time trade metrics dashboard using Java, Spring, Kafka, and React.js, delivering actionable insights with real-time updates and interactive visualizations for daily users, reducing decision-making time by 30% and enhancing operational efficiency.
- Designed and implemented high-performance REST APIs in Java Spring Boot to process payloads for financial products, seamlessly integrating with Apache Kafka for real-time data streaming.
- Optimized search performance by 50% for bond data retrieval by configuring and scaling Elasticsearch clusters, improving response times for critical financial queries.
- Achieved 99.99% system uptime and reduced duplicate message processing by 95% by developing an Active-Active Messaging Framework using Apache Kafka and Redis.
- Managed reliable data persistence of over 1 million messages daily into PostgreSQL, ensuring robust backups and seamless integration with real-time systems.

Broadridge Financial Solutions, India

Sep 2021 – June 2022

Software Engineer

- Built a scalable data feed service processing 5 million contracts daily, improving efficiency by 25% and enhancing risk management with real-time validation.
- Developed secure payment gateway portals for leading banks, enabling \$10M+ in monthly transactions with robust compliance and data protection using Java Spring Framework and JWT.
- Automated data certification workflows using Apache Airflow and Python, reducing processing time from 8 hours to 30 minutes, boosting efficiency by over 90%, and improving financial data availability by 40%.
- Enhanced database performance and integrated Redis caching, boosting system efficiency by 40%, lowering cloud costs, and ensuring 99.9% data integrity for high-volume financial operations.

Broadridge Financial Solutions, India

Jan 2020 – Aug 2021

Software Engineer

- Migrated an enterprise Node.js component to AWS Lambda, improving execution speed by 40% and reducing memory usage by 30%.
- Enhanced MongoDB query execution by restructuring queries and implementing indexing strategies, reducing admin list view load times by over 35x, significantly improving data retrieval speed and user experience.
- Refactored legacy functionalities into scalable APIs using Spring MVC, achieving 90%-unit test coverage and enhancing code maintainability by 40%.
- Improved execution speed of a shared job service across 10+ microservices by 40% through database optimization using Hibernate and MySQL partitioning.
- Streamlined release processes by configuring CI/CD pipelines with Git, Jenkins, and Maven, enabling automated builds, security scans, and blue-green deployments, reducing release times by 60%.

Academic Projects

Foundry Digital - MS Project Development

Aug 2023 - Jan 2024

- Built an invoicing system integrated with Jira using Node.js, React, TypeScript, and MySQL. Streamlined ticket-to-invoice processes, eliminated manual data entry, and increased accuracy by 25 percent. Initiated secure authorization and authentication via JWT.
- Orchestrated real-time data integration with AWS RDS using HTTPS and Webhooks, while spearheading the implementation of spare parts management to automate the generation of 500+ invoices per month
- Simplified client invoicing by introducing PDF/CSV export and direct email capabilities, resulting in a 40% reduction in manual data entry and processing time. Implemented the solution on Amazon EC2, bolstering system resilience.

Music Copyrights Through Blockchain

Jan 2023 - June 2023

- Devised a decentralized application (DApp) to convert over 100+ musical copyrights into non-fungible tokens (NFTs), providing a secure, blockchain-based solution for digital rights management.
- Created an intuitive user interface to facilitate smooth interactions between clients and copyright owners. Utilized a NoSQL database for efficient data storage, while the smart contract, written in Solidity, underpinned the DApp.
- Deployed the application across 2+ cloud platforms, Google Cloud Platform (GCP) and Heroku, ensuring compatibility across platforms.

Chatbot Using Data Scraped from Reddit

Aug 2022 - Jan 2023

- Engineered a chatbot by harnessing Reddit-scraped data indexed on Apache Solr, achieving an exceptional response rate exceeding 75 percent.
- Hosted the backend model using Flask and Python and created an engaging frontend web application with React JS, deployed on the Google Cloud Platform.

Achievements

- Ranked in the top 0.5% of 1.5 million students in the 2017 IIT JEE ADVANCED examination.
- Core team member at the programming club, IIT Mandi.
- Published a paper on Air Quality Monitoring, Prediction, and Warning at the 16th ICDCIT '20, Bhubaneswar, India, and received funding from the Government of Himachal Pradesh for further development of the project.
- Received the Best Employee Award at Broadridge for showcasing exceptional dedication to delivering flawless, bug-free code.

Skills

- **Methodologies:** SDLC, Agile/Scrum
- **Programming Language:** C, C++, Java, C#, Python, Solidity
- **Frameworks/Libraries:** Spring Boot, Spring MVC, Django, Flask, .NET, React.JS, Node.JS, Express.js, GraphQL
- **Web Technologies:** HTML5, CSS3, JavaScript, jQuery, Ajax, JSON, XML, Redux, TypeScript, RESTful API, Bootstrap
- **Cloud/Application Server:** AWS (EC2, SNS, Elastic Beanstalk, Lambda, Code Deploy, and CloudWatch), GCP, Azure
- **Testing Framework:** Postman, SOAP UI, Mockito, JUnit, Jira
- **Database:** MySQL, PostgreSQL, Redis, Oracle, NoSQL (MongoDB)
- **Tools and others:** Git, GitHub, Maven, Gradle, Jenkins, GraphQL, Docker, SOAP UI, Grafana, Linux, Kubernetes
- **Soft skills:** Leadership, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication

Education

Masters in Computer Science and Engineering

University at Buffalo, NY

Bachelors of Technology

Indian Institute of Technology, Mandi, India
