

Khyati Desai

Software Developer

Dallas, TX | 469-588-0883 | khyati.d@itjobmail.com | LinkedIn

SUMMARY

- 4 years of expertise in software development, specializing in Object-Oriented Programming (OOP), Service-Oriented Architecture (SOA), distributed systems, and enterprise-level web applications using Java/J2EE technologies.
- Skilled in managing all phases of the Software Development Life Cycle (SDLC).
- In-depth experience developing robust backend solutions with Java/J2EE technologies, including Java, Servlets, JSP, Struts, Spring MVC, Spring Boot, Hibernate, JAXB, JDBC, and Web Services.
- Adept at designing responsive user interfaces for desktop and mobile platforms, creating wireframes, user flows, sitemaps, and rapid prototypes.
- Proficient in HTML5, CSS3, JavaScript, jQuery, AngularJS, and Bootstrap, with a focus on usability and cross-platform compatibility.
- Expertise in full-stack JavaScript frameworks, particularly the MEAN stack (MongoDB, Express.js, AngularJS, and Node.js).
- Skilled in using CSS preprocessors (LESS, SASS) and task runners like Grunt.js, Gulp.js, and Webpack for efficient front-end development.
- Proficiency in working with relational databases such as PostgreSQL, MySQL, and Oracle, alongside NoSQL databases like MongoDB, ensuring optimized and scalable data solutions.

SKILLS

Methodology: SDLC, Waterfall, Agile

Programming Languages: Java, C++, PL/SQL

Frameworks: Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, Node.js, React.js, Angular JS

J2EE Technologies: Servlets, JSP, JDBC, JUnit, JAXB, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, JSTL, Multithreading, and Collections

IDEs: IntelliJ IDEA, Eclipse, Visual Studio Code

Web Technologies: HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap

DevOps: Docker, Kubernetes, Jenkins, Bamboo, Ansible

Cloud Platforms: AWS, Azure, Google Cloud Platform (GCP)

Databases: Oracle, MySQL, SQL Server, DB2, PostgreSQL, MongoDB, Cassandra, Cosmos DB, DynamoDB

Version Control & Other Tools: Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant

Testing and Logging Tools: Junit, Mockito, Selenium, TestNG, Power Mock, JMeter, Jest, Enzyme, Cucumber, Log4J

Soft Skills: Effective verbal and written communication, Problem-solving, and Troubleshooting skills

Operating Systems: Windows, Linux, Unix

EDUCATION

Bachelor of Science in Computer Science | University of Texas at Dallas, TX

Associates in Computer Science | Dallas county community college, TX

EXPERIENCE

Johnson & Johnson, USA | Software Developer

March 2023 - Current

- Successfully managed the complete software development lifecycle using Agile methodologies, ensuring timely and efficient delivery of high-quality solutions.
- Built and enhanced responsive Single Page Applications (SPA) using React.js and AngularJS frameworks.
- Leveraged NPM (Node Package Manager) for component integration and utilized Redux for efficient state management.
- Collaborated with UI teams to deliver interactive interfaces using HTML5, CSS3, JavaScript, jQuery, and Bootstrap.
- Implemented User Interface Applications using Java Server Faces (JSF) to deliver scalable, component-based designs.
- Extensively utilized Spring Framework modules, including Dependency Injection (IoC), Auto Wiring, JDBCTemplates, and Spring Security, to build robust enterprise applications.
- Migrated legacy applications to a microservices architecture, developing and deploying microservices using Spring Boot.
- Deployed Dockerized Spring Boot microservices to AWS EC2 instances using the AWS Management Console and AWS Lambda for seamless application execution.
- Crafted efficient server-side code using Node.js and MongoDB, ensuring seamless integration with front-end technologies.
- Leveraged JUnit and Power Mock frameworks to ensure comprehensive unit testing for microservices, improving reliability and maintainability.

Intuit, USA | Software Developer

Jan 2021 - Feb 2023

- Applied the Waterfall methodology for projects requiring detailed initial planning and strict adherence to specifications, ensuring alignment with business goals.
- Designed and implemented dynamic, responsive UIs using HTML5, CSS3, JavaScript, and React.js, delivering engaging user experiences.
- Built resilient web applications leveraging server-side technologies like Servlets, JSP, JDBC, and Spring MVC for seamless functionality and performance.
- Developed APIs and backend logic using Node.js, Express.js, and Spring Boot, supporting scalable and efficient systems.
- Utilized Spring Framework modules - Spring MVC, DI, AOP, ORM, REST, and Security to build robust applications, achieving a 25% boost in customer satisfaction and a 20% reduction in maintenance costs.
- Streamlined deployment workflows by implementing Kubernetes for CI/CD runtime environments and leveraging OpenShift on AWS cloud infrastructure.
- Enhanced data processing by devising stored procedures, triggers, functions, and cursors in MySQL and other relational databases.
- Designed and developed SOAP-based web services using JAX-WS, thoroughly tested with SOAP UI tools for reliability and functionality.
- Configured AWS Elastic Load Balancers and auto-scaling groups to ensure cost-effective, and high-availability cloud environments.
- Worked closely with designers using Figma to transform mockups into fully functional, pixel-perfect UIs.
- Established and maintained CI/CD pipelines to automate testing and deployment, ensuring reliable and efficient software delivery.
